

YESTERDAY

Yesterday, my friend Toby Toddlers and I were standing near the charge desk in the Reserve Library, remarking the extreme courtesy and willingness to help evidenced by those charming posts, the desk clerks.

"They make me feel," said Toby, referring to some of the more torpid pages, "like Brother Jones. There was once a Baptist minister who was baptizing a crowd of converts through the ice, through a hold in the ice, I mean. One poor devil, Brother Jones, disappeared after immersion and did not reappear. He probably drifted ten or fifteen feet from the hole, and was at the time vainly gasping under ice as many inches thick. After pausing a few minutes, the minister said: 'Brother Jones has evidently gone to Kingdom Come. Bring on the next.'"

"I can understand your feeling," I replied. "It must be a little like that experienced by one of the numerous graduates of Harvard University who infest our Law School here. This particular individual was up in court one day, testifying about something and getting balled up as only a Harvard graduate can. The cross examiner was becoming rather tired. He didn't know his witness was a Harvard man. He had thought he was intelligent. He asked the fellow what his position was.

"Oh, I am a graduate of Harvard College."

"A what?"

"A Harvard graduate."

"Oh, yes. We hung one of them the other day."

"The effort was thrown away," said Toby. "A Harvard man can't understand a thing like that, which causes me to remember that principle of justice first enunciated by our Saviour: 'Never pass judgment upon your fellowman, for there may be a bean in his eye.' And here is a joke to illustrate it. An Irish immigrant had been admitted to the bar of this state, and after so long a time and many political battles, to the Supreme Bench. One day a young countryman rose in the court to make a motion, and spoke in the hard brogue of the north of Ireland.

"Jawn," said the judge in a low voice to the clerk of the court, 'who is this newcomer?'

"His name is Clements, judge."

"What part of the country does he hail from, in the name of all that's woondherful?" asked the judge.

"County Antrim."

"Well, well," said the judge, 'did ye ever come across such a froightful accint in the whole coorse av yer born loife?'

"We ought to flavor our attitude with more tolerance," I said. "As in this instance: a smart juryman who wanted to get off from service, addressing the clerk while the latter was administering the oath, said:

"Speak up, I cannot hear what you say."

"Stop," cried the judge, 'are you deaf?'

"Yes, yer honor, in one ear."

"Then leave the box. It is necessary that judymen should hear both sides."

"I hope that you will be stern enough with yourself to always be so just," replied Toby. "You should be like the old negro who was asked what an oath was.

"Yah sah, I knows what an oath is. When a man swears to a lie he's got to stick to it."

And I think so too.

Commencement Exercises Will Begin August 28

Baccalaureate Sermon Will Be Preached by Rev. Green

AT THEATER

Commencement week for summer graduates will begin with the Baccalaureate exercises, which will be held at the Open Air Theater, Sunday, August 28.

The Baccalaureate sermon will be delivered by Dr. George Green of the First Baptist Church of Austin. Musical selection for the occasion, including numbers by a quartet, will be in charge of David Griffin.

Form, Procession

Formal commencement will take place at the Open Air Theater Wednesday night, August 31. The graduate students will form a procession on the walk west of the Main Building and march towards the theater where they will take seats which have been reserved for them. The speaker who will give the annual address has not yet been selected. The diplomas will be presented by Dr. Benedict.

The music at the commencement exercises will be under the direction of Burnett Pharr.

Extension Made in Mining School

Directed Toward Development of School to Include College of Arts

Inaugurated in the expansion plan of the El Paso School of Mines and Metallurgy, and aimed toward the development of the school into a college of arts instead of merely a technical school, one building is being converted from a dormitory into a classroom building, plans are being made for one new building, and the power plant is being enlarged.

Kelley Hall, formerly used as dormitory, will be remodelled to become a classroom and office building. The new building is to be a metallurgical laboratory, enabling the school to turn the present metallurgical laboratory into a chemical lab.

Workmen are putting in an additional boiler to the heating plant to give more heating capacity and to take care of emergencies.

Landscape architects are studying the campus with the intention of beautifying the grounds, planting trees and shrubs and perhaps constructing an artificial lake.

The El Paso school expects to enroll at least 500 students the coming long session, having had around 200 heretofore.

Two-Term Plan Leading Ballot

Students Favor Two Six-Week Sessions in Votes Counted

Results of the student poll on the future of the summer term which was taken all day Friday in classes have not been fully and definitely tabulated as yet, according to information from the office of Dr. D. A. Penick, dean of the second term, but some estimate of the trend of the vote has been obtained.

Of the votes turned in by instructors so far, 150 have given first place to an arrangement of two terms of six weeks each with classes of one hour and a half.

Of the remaining ballots, the other two plans proposed drew about 27 votes each, showing definitely the preference of the second term new students for the two term six weeks plan.

There are a great many votes yet to be turned in by instructors, it developed, but officials do not expect that these tardy votes will change the result materially.

Full announcement will be made of the student referendum at some later date, it was said.

Faculty Members Swim at Bartons

Visiting Members of the Educational Faculty Hold Picnic Friday

Visiting members of the Educational faculty were guests at a picnic held at Barton Springs, Friday evening August 12. Instructors, students, and visiting members met at the Y. M. C. A. corner at 5:30 p. m., where cars awaited all who did not have means of transportation of their own.

The picnic took the place of the regular weekly meeting of the Educational Association, which meets each Friday noon at the campus cafeteria.

The evening program consisted of an hour's swim in the Barton Springs pool, after which a cafeteria supper was served. The supper hour was the occasion for the 150 attending to become better acquainted.

It is reported that this was the largest attendance of any previous educational picnic, and much of the success of the occasion was due to the careful management under the direction of Dr. H. T. Manual.

The visiting professors were: Dr. Julia Kirkwood, G. W. Godke, C. F. Arrowood, J. G. Fowles, F. P. O'Brien, and J. P. Buck.

ENGLISH JUDGES WORK OVERTIME

With the purpose of seeing that no one graduates without a decent standard of English, the committee on Students' Use of English is now working overtime to go through the seniors who have fallen below the required level and those who have not yet been checked off by the committee. Every student who expects to graduate this summer has been warned to make sure that his English has been passed on by the committee, whether he has been reported as unsatisfactory or not, according to Dr. D. L. Clark, chairman of the committee.

Requirements Listed

"The requirements are that the student be able to write correct and forceful English as regards spelling, grammar, punctuation, and the handling of ordinary sentence structure, rather than what is known as literary English," Dr. Clark stated.

"There are about 12 'knotty' cases to be cleared up by the committee between now and commencement day," it was said. "And anyone who has not had his English approved by the committee should appear before it to make sure of full

Pre-Med Fraternity Moves Into New Home

Omega Beta Pi, pre-med fraternity at the University, is moving to their new home, the Mayfield home on 27th street, from 2411 Nueces where they have been in the past. The Mayfield home is being repaired in preparation for occupancy.

The Mayfield home was occupied by the Zetas last year, they having moved to the Devereaux house, which they bought. The Mayfield house used to be on the corner of 27th and Guadalupe, but is now moved to face south of 27th.

The grounds are being beautified.

PROGRAM

Monday, August 15:

7 o'clock—Telescope view of Saturn from south of Education Building under the supervision of Dr. H. Y. Benedict.

Tuesday, August 16:

5 o'clock—Lecture: "Tennyson's In Memoriam," Professor W. O. Raymond.

8 o'clock—Czech Night. Open Air Theater.

Wednesday, August 17:

8 o'clock—Band Concert by Longhorn Band. Open Air Theater.

Thursday, August 18:

8 o'clock—Campus Concert directed by David Griffin. Open Air Theater.

Friday, August 19:

8 o'clock—Lecture: "Types of Texas Vegetation," illustrated, by Dr. B. C. Thary. Open Air Theater.

Saturday, August 20:

4 o'clock—Visit to International Institute and City Filtration Plant. Meet at 5th and Nueces.

8 o'clock—Motion Picture, "The Courtship of Miles Standish." Open Air Theater.

9 o'clock—All-University Dance. Women's Gym.

Benedict Stages Telescope Night Tomorrow Evening

Students Will Be Enabled to See Saturn Through Telescope

MOON IS CLOSE

Monday evening beginning at 7 o'clock, Dr. H. Y. Benedict will stage his "telescope night" at the Education Building, at which time he will enable those students present to see Saturn and other bodies in the solar system. He will use a five and a half inch telescope set at a 45 degree angle.

Dr. Benedict has planned this night for the students who are interested in the planets and their actions. Due to the unusual brightness of the moon, which has been passing close to the bodies which are to be viewed, he has only now been enabled to stage this.

No Lecture Given

Benedict states that he will give no accompanying lecture other than to give information necessary for the understanding of the bodies to be viewed.

Students will each pass before the telescope to view the constellation individually.

Sixteen Veterans Eligible for Varsity Football Team

CZECH NIGHT FEATURED BY NATIVE SONGS

Thirty-five University students, members of the Czech Club, will assist in a Czech Night at the Open Air Theater Tuesday night.

In the presentation of their program, they will be aided by a men's choir from Temple, eight in number. This choir will sing a number of Czech songs.

Mrs. Horak from Caldwell will also sing a number of Czech songs. She will be accompanied by a violinist and pianist from Caldwell.

Czech Songs

David Griffin will present two of his pupils in Czech songs in native costumes.

There will be a number of Czech dances given by the members of Mrs. Crooke's dancing class. The dancers will be in native costume.

In addition there may be a number of slides showing the interesting scenes in and around Prague, including the famous Prague University.

Mr. Horak of Caldwell will be the announcer.

F. HOPKINSON DESIGNER OF U.S. ENSIGN

—HASTINGS

Dr. George E. Hastings, professor of English in the University of Arkansas, and visiting professor in the University for the second term this summer, spoke on the "Origin of the American Flag" Friday afternoon in Garrison Hall auditorium. The correct origin of the flag was discovered by Dr. Hastings, in research for his doctor's dissertation on the "Life and Works of Francis Hopkinson."

Up till the last few years it was generally conceded that Betsy Ross designed and made the original flag of the United States; but in studying the life of Francis Hopkinson very closely, Dr. Hastings found that the tradition was without foundation.

Records of Congress

In the records of Congress notation was found to the effect that Hopkinson had presented a bill for the designing of the flag and the continental currency. The bill was approved by every department that had anything to do with such approval. The bill was never paid, because Hopkinson had some personal enemies in Congress. But they never denied that he was the designer of the flag.

Hopkinson was head of the Navy Board, a position that now corresponds closely to the Secretary of the Navy. Since the navy is the first part of a country to need a flag, it is more than likely that the officers in charge of the ships should be the ones to take steps to adopt a flag, Dr. Hastings said.

Authority on Heraldry

Francis Hopkinson was a noted authority on heraldry, having studied in England, and he had designed a number of seals for institutions in the United States. All this adds evidence to the correctness of the statement that he was the designer of the flag.

Canby Paper

Little thought of who the designer of the Stars and Stripes was, ever entered the minds of American citizens until 1870, when W. J. Canby read a paper before the Pennsylvania Historical Association, in which he stated that the flag was made by his grandmother, Mrs. Elizabeth Ross.

The new idea lighted the imagination of the American people, and in a few years the whole country accepted Mrs. Ross as the designer of the flag. Scholars, however, did not take much interest in the tradition, Dr. Hastings pointed out.

From that time until the present the public has accepted Betsy Ross as the maker of the flag, and it has almost become tradition. But with the research of Dr. Hastings and his discoveries, based on records in Congress, the true designer of the flag was Francis Hopkinson, a statesman, painter, musician, and poet of high rank in revolutionary times.

SHOULD HAVE GREAT BACKS, SPEEDY LINE

With sixteen letter men, a number of reserves, and a hoard of freshman players as material, the University should be a potent but uncertain contender for the 1927 football championship of the Southwestern Conference.

Clyde Littlefield, a new coach in major football, will whip the material into playing shape and on his success in forming a well-coached team will depend part of Texas' fortunes. His coaching will not be unfamiliar to the men, because he has trained most of them as freshmen, but his system will necessarily be new, as he will be coaching his own ideas and not teaching the system of another coach.

Sixteen Veterans

A young team will absorb football under Coach Littlefield. Nine of the sixteen letter men are playing their second year, and several of the veterans will take the sidelines in deference to more powerful freshmen. A great mass of strong track men will go out for football for the first time and several of them are potential stars.

The men who have played one year before are Dusty Rhoades of Dallas, Herb Tigner of Houston, Jack Cowley of Blossom, Steve Wray of Donna, Ike Sewell of Wills Point, Cotton Mobley of Houston, Bill Ford of Dallas, Tommie Hughes of Texarkana, and Leo Baldwin of Wichita Falls.

John Terrell of Decatur, Pottle McCullough of Waco, Joe King, Johnnie Estes and Ox Higgins of Dallas, Patsy Allen of Luling, and Rufus King of Austin will be playing their third season.

Depends on Cripples

Should Higgins, Estes, Baldwin, and Eddie Beular of Beaumont, the cripples of 1926, suffer no ill consequences from their old injuries, Texas may have a great team. If these four men return in perfect physical condition, they will add dynamite power to the team's punch. Each was all-conference material, but three of them were forced entirely off the team last year because of leg injuries, and much of Higgins' power was drawn by the same trouble.

With seven letter men in the backfield and nine in the line, the veteran material is well divided. And of the double leadership of the team, Co-Captain Higgins will play tackle, while Co-Captain Rufus King will boss the team from the fullback position.

Open Style of Play?

Coach Littlefield's style of play will be difficult to forecast from the standpoint of the one he has used for seven years as freshman coach. During this period, he alternately groomed his charges in the system to be used by the major

(Continued on Page 4)

Tien Lai Huang Continues Tour

Leaving Austin Thursday night at 10:15, after delivering a lecture on "What Is Happening in China," Dr. Tien Lai Huang, who is one of modern China's noted representatives, will continue his speaking tour of the United States. He is discussing the economic and social conditions of China and the influence on the future history of the world in his lectures, and at the same time is making a plea for a better understanding of China.

Dr. Huang's next lecture will be delivered at Huntsville, where he will address the students of the Sam Houston State Teachers College. He will then go to Denton and present a lecture to the girls of the College of Industrial Arts. Leaving Denton, he will work back to Chicago and then to New York, from which place he will, ultimately, sail to Honolulu to represent his country at the Pacific Peace Conference.

Dr. Huang was very much delighted with Austin, he said. "It is hot here," he remarked, "and it makes me think of China. It is very beautiful too, and if I could stay a few days I should fall in love with the town."

CHEMISTRY DEBRIS BURIES THOUSAND DOLLARS BULLION

Each passing day lessens the evidence that the old Chemistry Building was ever a reality, as its naked and charred walls are forced down and the bricks are hauled away.

Some of the men working with the wreckage assisted in the construction of the building many years ago.

Built It—Tears It Down

One old negro, bent with age now, mixed all the mortar that went into the building when he was a mere boy. Today he is knocking it off again with an air of resignation.

Eighty-five per cent of the bricks in the structure were saved, according to the authorities. These are being cleared of mortar and loaded in trucks. Approximately 1300 loads of junk, averaging one and a half tons to the load, have been taken from the building.

\$100 in Gold

Every now and then workers unearth some very interesting articles. Many pounds of mercury, which has been dropped by careless chemistry

students during the past few years and found resting places in the crevices of the floors, have been discovered. There is said to be \$900 worth of platinum and \$100 worth of gold also in the mass of brick and mortar.

Authorities say that the wreckage could be removed in five days, but in order to save the cost and time of storing the brick and handling them twice, they are being hauled away as fast as the contracting parties can receive them. It will probably be about the first of September when the last wisp of dust from the old Chemistry Building departs from the campus.

MAJOR EXAM REPORTS

According to Dr. Wharey the reports in major examinations will probably be out after Monday, August 15.

BAND PRACTICE—
FINANCIAL AND OTHERWISE
A ACCORDING to Burnett Pharr, who was recently elected to lead the Longhorn Band for the coming year and revive and direct the University Orchestra, concert work will be stressed relatively more than it has been in the past. Financing will be taken care of through blanket tax apportionments and appropriations from the Board of Regents.

In the past the financing of the band has been on a very uncertain basis. The band had certain agreements with the Athletic Department that led in many instances to misunderstanding. This year the organization will have more definite assurances of just what it can expect than before. It is well that plans have been made to give added importance to the concert feature. After all, the musical organizations of a university have an importance of their own that has nothing to do with the work they do at football games.

CHINKS, DAGOES, AND DAMN-YANKEES
A PROPOS of the frequent misunderstanding between Americans and Chinese, Dr. Tien Lai Huang, who recently addressed a University audience on conditions existing in the new China, very aptly remarked: "Americans think that Chinese live on snails and rats. But Chinese often think that Americans eat only hot dogs, so it is all the same. The pot calls the kettle black, and the kettle calls the pot black. Neither is right." There is a story that when he was approached by a stranger on a train with the query "Are you a Jap or a Chinaman?" he responded: "I am neither; I am a Chinese Gentleman." From which remarks it would seem that Dr. Huang is a very keen minded man endowed with the ability to make nice discriminations. Dr. Huang gave those who heard him a better understanding than most of them had before of some of the forces that are now active in China today. Most important of all he gave them a historical perspective that should prove of value in the consideration of questions dealing with Chinese nationalism. "China has had her days of glory; Egypt, Babylon, Greece, and Rome have had their days and have fallen; China still lives, the lecturer explained. China holds the key to the future of the world. Whether the future holds world brotherhood or world hatred will be determined by China and the way she is treated by the occidental countries. The Chinese people are trying to free themselves from the encroachment of the western world. They are trying to get a representative government and to eliminate imperialism and militarism."

To decide just how far facts justify these statements would be difficult to determine. Too many things must be taken into consideration. He is probably right in his statement regarding the impossibility of peaceful co-operation between the Occident and the Orient on the basis of the present system of exploitation. It might seem that it is a bit optimistic to state that the Chinese are fighting to get a representative government and to eliminate imperialism and militarism; but every patriot must be permitted his enthusiasms. What is of genuine significance is not the motives, which may or may not be as pure and simple as the declarations would indicate, but the fact that a geographical section of the earth including within its boundaries some 400,000,000 is in the process of becoming a nation.

It would seem, therefore, that Dr. Huang's more informal utterances are not less important than his formal ones. They serve to clarify, and, in a measure, to explain, the true import of his others. Four hundred million people are not stirred into a consciousness of nationality without a leavening of intelligent leaders. In forming opinions of a movement of such magnitude, it is well to remember that all who live in China are not "Chinks" anymore than all who live in Italy are "Dag-

goes," or in America "Damn-Yankees." Some are Chinese gentlemen. There will always be strife and misunderstanding in the world, for there will always be conflicting interests; but the problems that arise from these conflicts need not be made more impossible of solution by a blind racial prejudice.

From Other Pens

A CODE FOR TEACHERS
A MANUAL of ethics is to be distributed to Boston's 4,000 public school teachers. Every profession has its own code, and it is a good thing for newcomers, or teachers new to Boston, to have it set down in written form.

As a rule, a code is best stated in its simplest form, with the application left to the individual. The Persian boy had to learn "to shoot, to ride, and to speak the truth," and that was sufficient for him. Today codes are necessarily more complicated, but when one is so elaborate that it comprises chapter on chapter, like this from Boston, it is of doubtful value.

If a teacher does not know that "it is unprofessional to waste school time, or to occupy it with other than school work," to harbor ungenerous feelings of spite and jealousy against other members of the profession, to indulge in cheap, idle gossip," it seems futile to write them down in a book, and hope that she will read and obey.

The positive side of this code seems better. So also are explanations of matters which might reasonably be questioned, such as joining any organized group, or criticizing methods or persons in the school system.

An interesting item is the statement that parents are not to be treated as parents, but as "clients." Whether this is a suggestion of Big Business in the schools, or only a figurative method of recommending courteous and friendly relations with parents, one can only guess. New York Times.

RETRIBUTION
FRIDAY there were hung in Joliet prison, Illinois state penitentiary, three desperate criminals. All three had been incarcerated in the first place for serious offenses, and then, in a break for freedom, they had killed a guard of the prison, for which they finally hung. Fortunately Illinois as a state has a means for dealing with such despicable crimes, and the three men who participated in the murder of this guard have now been placed in a position where they are scarcely a menace.

It is reminiscent of an incident a few years ago in our own Marquette prison, where a guard was stabbed by convicts in an attempt to escape. The result was that the guilty prisoner was put in solitary confinement for a few days, and then allowed his usual freedom and the usual liberty to kill another guard. About two weeks ago another attempt was made in the same place, and the reason a guard was not killed was certainly not because the prisoners failed to attempt it. They, too, were punished in some minor way, in order not to offend the prison reformers, and now they are free to attempt another murder. The worst that can possibly happen to them is a little longer wait for their inevitable pardon or parole, and the result of all this is the woeful situation in which we now find ourselves in regard to disciplining prisoners.

If the last legislature was too soft-hearted to exact a proper penalty from murderers, they could at least have protected the men who guard our jails. There is something wholesome just about the execution of the murderers in the Joliet jail that should be gratification even to the widow of the guard, who begged to be allowed to spring the trap.

When Illinois executed those three men it came just three persons nearer to being a respectable state. Michigan still has neglected this means of approaching respectability. It is too late to bemoan the failure of the bill in the last legislature, but it is not too early to commence agitation for it in the next. The citizens of Michigan should certainly begin to recognize the operation of a just and reasonably expeditious system of retribution.—The Michigan Daily.

Official Notices

A SERIES of conditioned, postponed, and advanced standing examinations solely for candidates for degrees at the end of the Summer Session of 1927 will be held on Monday, August 22. Application to take these examinations must be in the Registrar's office by Monday, August 15.

E. J. MATHEWS, Registrar.

PROSPECTIVE cruise-around-world students will please take notice that the Committee on Admission from other Colleges of the University of Texas has definitely voted to promise no credit on any work taken on any cruise.

CHEM 1 Students: Notice. For Tuesday morning's class, learn Articles 14, 15 and 16 in chapter 12.

Tuesday at 3 p. m. a final examination will be given on oxidation-reduction as presented so far.

E. P. SCHOCH.

PROFESSOR RAYMOND will deliver the only 5 o'clock lecture to be given this week on Tuesday afternoon, August 16, at Garrison Hall auditorium.

A SERIES of conditioned, postponed and advanced standing examinations solely for candidates for degrees at the end of the summer session will be held on Monday, August 22.

Applications to take these examinations must be in the Registrar's office by Monday, August 15.

E. J. MATHEWS, Registrar.

THE EXAMINATION in foreign languages will be held on August 15, in rooms 209 and 219 Main Building at 2 o'clock for candidates for degrees in August and for those who do not return for the long session.

Please register at the Registrar's office before August 11 (inclusive). CHAIRMAN.

Work Progressing on Distribution Chamber

Work on the steam and electric distribution chamber, which is being constructed at the rear of the Main Building, is progressing swiftly, according to authorities in charge of construction.

The chamber will be the central distribution agency for both the electricity and steam to be used by all buildings on the campus.

No definite date for its completion has been set, but it will be in readiness when the first cold norther comes whistling through the campus.

LETTER COLUMN

To The Texan:

It gives me pleasure to acknowledge your splendid co-operation in calling to the attention of the student body the referendum vote in regard to the future of the Summer Session. I believe that your publicity both in the stories and in the editorial column helped in a material way to bring the matter to the attention of the student body and to impress upon the students the importance of serious consideration and action.

Very truly yours,
D. A. PENICK,
Assistant Director of the Summer Session

COON TEACHES

Ruby Coon, graduate student in the University, has recently been elected as assistant professor of Spanish and Education in Sull Ross State Teachers College at Alpine.

She received her degree from Stephen F. Austin State Teachers College at Nacogdoches in 1926. While a student she was assistant editor of the college annual. Miss Coon is at present a member of the Texan staff.

She attended Peabody college and the University before taking her degree. Last year she taught school in Henderson.

Tharp to Lecture on Plants Friday

Discusses Woods and Grasses at Texas at Open Air Theater

"Types of Texas Vegetation" is the subject of a lecture by Benjamin Carroll Tharp, associate professor of botany, at the Open Air Theater Friday evening at 8 o'clock.

The lecture will be divided into two sections, one dealing with the woody vegetation, and another enlarging on the grasslands of Texas.

40,000 Miles Covered

Dr. Tharp has traveled over 40,000 miles in Texas and the states bordering on Texas and into Mexico, gathering material upon the various types of vegetation. However, Tharp says that he will use in his lecture only the Texas types. The material used and the slides are of Tharp's own collection. They were made by the Bureau of Visual Instruction from films made by Dr. Tharp.

Every type of vegetation to be found in Texas anywhere will be illustrated by the lantern slides in the lecture. Some of the types to be

shown will be the woody vegetation from east to west, the pine forest, the oak-hickory forest, the mesquite, which may or may not be mixed with prickly-pear.

Proceeding west, will be shown the chapparal, then still further west, the semi-arid with grease-wood, sage brush and sotol, and last of all the oak and pine forests of the mountains, which are quite different from that of the East.

Grasslands

The grasslands consist of the plains, mixed plains, prairies, coastal and marsh plains and sand-dunes. The sand-dunes, he said, form a very interesting study of vegetation.

Few types of flowers will be shown, as the study is mostly of the impressions received of the open country.

BENEDICT TO SPEAK

Dr. H. Y. Benedict will address the Young Men's Business League of Austin on the subject "Some Items that Must Be Considered in a Better-Yet University Program" at their luncheon to be held at the Driskill Hotel today at noon.

FINAL CLOSING OUT SALE

You have one more chance to buy nice Gift Books, good Noveles, Children's Books, Tablets, Composition Books and other school supplies at HALF-PRICE.

R. Barrow
910 Congress Ave.

shown will be the woody vegetation from east to west, the pine forest, the oak-hickory forest, the mesquite, which may or may not be mixed with prickly-pear.

Proceeding west, will be shown the chapparal, then still further west, the semi-arid with grease-wood, sage brush and sotol, and last of all the oak and pine forests of the mountains, which are quite different from that of the East.

Grasslands

The grasslands consist of the plains, mixed plains, prairies, coastal and marsh plains and sand-dunes. The sand-dunes, he said, form a very interesting study of vegetation.

Few types of flowers will be shown, as the study is mostly of the impressions received of the open country.

BENEDICT TO SPEAK

Dr. H. Y. Benedict will address the Young Men's Business League of Austin on the subject "Some Items that Must Be Considered in a Better-Yet University Program" at their luncheon to be held at the Driskill Hotel today at noon.

SOCIETY

Bridge Party

Eleanor Woolford entertained with three tables of bridge Monday afternoon honoring her guest, Mrs. Joe Dunlap, of Dallas. Refreshments of orange ice, nut wafers, and orangeade were served. A lovely guest prize, a hand painted picture, was presented by the hostess to Mrs. Dunlap.

Arthur Baldwin of the Texas house has returned to his home in Houston after having finished his Geology course for the summer.

James Fomby and Harold Van Cleave have returned from a fishing trip to Port Arthur.

Mr. and Mrs. B. B. Faubion of Galveston are visiting with their parents, Mr. and Mrs. J. E. Ponton. Faubion is a graduate of the University and is now connected with the Galveston News.

Mr. and Mrs. Theodore A. Werkenthin of Lima, Ohio, are visiting with their parents, Mr. and Mrs. Werkenthin and Mr. and Mrs. J. E. Ponton. Werkenthin is connected with the Solar Refining Company of Lima, Ohio as chemical engineer in charge of research and development work.

Henry Morris, of Chicago, former instructor in romance languages in the University, visited friends Friday and Saturday.

Jack Halsell, Sigma Chi, has gone to Laredo for the week-end.

Catherine Randle, Theta, of Ft. Worth is visiting friends at Mrs. Stelfox's.

Rocky Rundell, who has been a councilor at the Stewart Camp at Kerrville, has returned to his home in Austin.

Evelyn and Eleanor Thompson, Alpha Phis, have returned to their home in Austin after spending several weeks on a ranch near San Angelo.

Mrs. J. L. Boggs, of Sulphur Springs, and young daughter, passed through Austin Friday night on their way to Kerrville. They stopped over with Mary Boggs for the night.

Dick Fender, of Ft. Worth is visiting at the D. K. E. house.

Jimmie Welch, of the Editorial Staff, is spending the week-end in New Braunfels.

Corrine Stallings, Alpha Delta Pi, is visiting at her home in San Antonio this week.

Anna Gene O'Banion, of Grace Hall is spending the week-end in San Marcos.

Hugh J. McCarroll, Jr., is visiting his brother Paul at the Delta Theta Phi house.

Herman Murchison, Alpha Rho Chi has returned from a short trip to California.

Stroemer-Crook

Clara Lee Crook and Clarence Stroemer were married Thursday morning at 9:00 o'clock at the University Methodist Church with Dr. K. P. Barton officiating. Mrs. K. C. Miller, Jr., sang before the ceremony, and Mary Grace Davis played. After a short wedding trip, Mr. and Mrs. Stroemer will be at home at 209 West 33.

Mrs. Stroemer is the daughter of Mr. and Mrs. P. H. Crook of Austin, and a former student of the University. For the past two years she has been connected with the Travis county rural schools, and she was recently re-elected to the presidency of the Travis County Educational Association. Stroemer is the son of Mr. and Mrs. G. A. Stroemer of Austin, and a graduate of the University. He is now a member of the firm of Stroemer brothers.

Margaret McFadden, Pi Phi is visiting in Abilene, after attending summer school at the University of Colorado at Boulder. She will return to Austin soon.

George Fields, S. A. E. who graduated in 1924 is visiting in Austin.

Virginia Eckhart, Pi Phi, has returned to Austin.

Oscar Eckhart, Sigma Chi, former football and baseball star, is visiting his family in Austin. He is now head coach at Canyon Teachers' College.

Helen Hart, Zeta Tau Alpha, will spend the week-end in New Braunfels.

Ed Pressler, Phi Phi, has left for the University of California where he will continue his post graduate work in Geology.

Mary Jo Hairston will motor to Colorado Friday.

Floy Smith is visiting in Corpus Christi.

Frances Wells and her mother have been visiting in Victoria.

Royce Pember of Slaton passed through Austin recently and visited at the D. K. E. house.

Initiation Meeting by Phi Delta Kappa

Phi Delta Kappa, professional educational fraternity for men, held an initiation meeting in the Education Building, room 310, Thursday afternoon at 4 o'clock at which time the following men became members of the chapter:

Thomas Guy Rogers of San Antonio, James Lloyd Head of Temple, S. M. Loyd of Dallas, and A. B. C. Deen of Rusk.

Phi Delta Kappa is composed of most of the leading men in the field of education and represents an organization of educators similar to those of many other professions.

Emil Jannings and Phyllis Haver in the Victor Fleming Production "The Way of All Flesh" A Paramount Picture

Survey Twelve Miles of Lake

Ninety-five Per Cent of Lake Capacity Silted in 13 Years

Professor Banks McLaurin of the Civil Engineering Department is making a survey of the sifting of Texas reservoirs. He is now actively engaged in making a cross sectional survey of the lake above the Austin dam.

The part of the lake affected is twelve and a half miles long. Soundings and surveys are made about one mile apart.

The last surveys completed by

Dean Taylor show that the lake from 1913 to 1926 had silted about 95 per cent of the original capacity up to the crest of the present dam, which is a level of 51 feet.

Next week Professor McLaurin will make a survey of the dams at Sweetwater, Abilene and Brownwood.

No Power in 27 Years Actual measurements have to be obtained to get real figures, and Professor McLaurin intends to spend next month in the field in making surveys.

The present dam across the Colorado River at Austin is the second built at the same place. The original dam washed away in April 1900. The present dam has been in the course of construction and lit-

gation since 1913.

Austin in its whole history has actually operated with water power a little less than seven years. All this was used from the old dam and ended 27 years ago. The new dam has never been operated as a power concern.

The lake now consists of only a shallow strip of water bordered by two bands of silt.

Eight Teachers Are Appointed

Dozier Leads Committee to Bring Pedagogues and Jobs Together

Within the past week, the Teachers' Appointment Committee has received a number of calls for teachers for good positions, according to Miss Miriam Dozier, secretary of the committee, and the Committee was able to recommend applicants for each of these positions.

Among the vacancies to which the Committee was asked to recommend candidates are the following: Instructor in Education for five weeks' summer term in good denominational senior college.

Instructor in History and Sociology for five weeks' summer term in denominational senior college.

Mathematics in good senior high school.

Mathematics, science, and athletics in senior high school.

Teacher of chemistry in Junior college and high school.

Instructor in mathematics in out of state College at \$2,000.

The Committee was able to recommend applicants for each of these positions, Miss Dozier stated.

Rathbone Works With Textile Experiments

Miss Lucy Rathbone, head of the clothing and textiles division of the department of home economics of the University, is spending the summer in Washington, D. C., where she is working with the Federal Bureau of Home Economics.

Miss Rathbone is assisting in compiling studies of textiles from data obtained from all over the United States. The object of these studies is to find the relation between weight and warmth of various textiles.

Miss Rathbone will also work at the Bureau of Standards while in Washington, testing fabrics for strength and other qualities. She will return to Austin in September to resume her teaching at the University.

Geology Exhibition Removed to B. Hall

Alterations are being made in one of the buildings situated upon the "Little Campus" of the University, preparatory to the removal of the Bureau of Economic Geology to the new location.

In one room of the basement the large and remarkable collection of various kinds of precious and base minerals of Texas was on exhibition, but on account of the more or less isolation of the location it was visited by comparatively few people, and not many students were even aware of its existence.

This exhibit will be displayed to better advantage in the building to which it is to be moved, and it is expected that it will attract more public attention than it has in times past.

CHANGE FEES FOR 1927-1928

Amounts Apply Alike to All
Branches of the Uni-
versity

In order to conform with the provisions of a recent statute regulating charges at state educational institutions which was passed by the legislature, the administrative authorities of the University have rearranged the fees and deposits for the University long session of 1927-28. These amounts will apply alike in all schools and colleges in all branches of the University.

The registration fee in all the colleges and schools of the Main University, in the Medical Branch of the University at Galveston and in the College of Mines and Metallurgy at El Paso has been set at \$30. This fee will be required of each long session student and is to be paid at registration.

Laboratory fees will vary as to length of courses. That is, for each laboratory course of three semester hours or less a fee of \$2 shall be charged, and for each such course of four semester hours or more a laboratory fee of \$4 shall be charged each student. In case a student drops such a course, one-half of the laboratory fee will be refunded for the semester not begun.

Deposits against breakage will be required in all laboratory courses. This deposit in every case will be \$2 with the exception of chemistry laboratory when the deposit will be \$6. A library deposit of \$6, subject to charges for fines assessed against the depositor or for books lost or injured, will be required of every student. These deposits, less charges for breakage or loss, will be returned to the student at the end of the session or upon his withdrawal from the University. In case a student's deposit is exhausted before the end of the session, he will be required to renew it.

Persons who are not registered for courses in the University will be allowed to visit one or more courses upon payment of a fee of \$5. In case these persons desire library privileges, they will be required to make the regular library deposit of \$5.

In accordance with these rules, in the session of 1927-28, all scholarships awarded by the University will carry exemption from the registration fee in any college or school of the University.

In this re-arrangement of fees the University authorities call attention to the fact that certain fees hitherto charged are no longer required. These fees are the following: matriculation fee, medical fee, library fee, service and maintenance fee, condition examination fee, degree card fee, diploma fee, delayed registration fee, record of work fee, receipt fee, change fee, unpaid check fee, and gymnasium fee.

Football

(Continued from page 1)

coach in Varsity football and in that to be used by the next gridiron antagonist. Some things can be gleaned from the play of the first-year men, however.

One of the most persistent styles used on the freshmen was a wide-open formation that unleashed some

powerful back to run, kick or pass from ten to fifteen yards behind the line. This style would place Baldwin, a great halfback, in his glory. Baldwin is the type of player who can hit through the line or around end to an infinite number of yards on this play. He is also a great passer and the best kicker on the team. Beular and Big Un Rose of Dallas will also find this style of play exactly suited to their talents.

Can Kick a Mile

Punting will find Texas with but one great kicking back and that is Baldwin. He ought to send as many 50-yard boots spinning into the air during the campaign as any other man in the conference. Burr McKinnon of Plainview can punt farther than any man on the squad, and he may develop into an all-around player. Paul Krueger of Austin, Big Un Rose and Pap Perkins of Bastrop, from the freshmen, are good kickers with possibilities.

Rufus King, the greatest plunging full in the conference, will do most of the line plowing. He will have the assistance of Krueger and Beular, who is small but carries a punch.

Baldwin, Joe King, and Beular can pass well, while Rufus King, who passed most balls last year, is an excellent flinger.

Bill Ford, Big Un Rose and Dusty Rhoades will give the passers excellent targets, since all are receivers above the average.

Playing S. M. U. and A. & M. away from home, Texas will face her hardest conference games on hostile territory. T. C. U., Rice and Baylor will appear in Austin.

A great running backfield should play for Texas. With the smart, resourceful Beular in quarterback's post, the team should be directed by a master hand. Beular knows how to play football and has punch and speed. He will be assisted by Joe King, who is a seasoned player. Passing and broken field running are his greatest accomplishments.

Baldwin, Rose to Star

Baldwin, of the 1925 team, Rose, Ford, Hughes, Estes and Allen are the most plausible halfback contenders. The versatility of Baldwin and Rose in kicking, passing and running; the pass-catching ability of Ford; the sturdiness of Hughes; the tackle tearing of Estes and the speed of Allen will make them valuable men.

THINGS THAT NEVER HAPPEN

By GENE BYRNES

Then there are Holly Brock, Jimmy Boyles, Walker White, Burr McKinnon and Pap Perkins, all good men.

Rufus King will play full, and he can do everything but run fast. He plunges, runs, passes, tackles, and sometimes punts. Krueger will be a valuable understudy for this position.

Co-Captain Higgins will play tackle again, the post that made him famous in 1925. He will have as mates Tigner, a fast tackle, Cowley

of giant power, Gordy Brown of San Antonio, the best freshman linesman last year, Beary and Hawn.

Wray, all-conference guard last year, will be better this season; Ike Sewell, veteran from 1925, and Mobley are the letter men who are candidates for guard. Charlie Reynolds, a good athlete from the track team, Trifon, Phillips, Hargrove, McLemore, McCutcheon, Burnett, Speights, Robbins, Garrett, Hahn,

Witsell, Adleta, and Gholson will also play.

No doubt that McCullough, two-year veteran, will play center. He is the smartest linesman in the conference and is a hard player. Frank Cheatham of San Antonio will be a good understudy.

Rhoades and Terrell will form a fast end combination. Rhoades is a great pass receiver, while Terrell is a hard-hitting defensive end. Nona Rees of San Antonio, from the freshman ranks, should prove to be a well-

trained end and a hard tackler. Ivan Ward of Greenville, Cecil Smith of Austin and Wilbanks are other prospects.

WALLER TO O. U.

John L. Waller, instructor in history at the University during the past year, will become assistant professor of history at the University of Oklahoma at Norman this fall. Mr. Waller has been teaching during the summer term at the University of Oklahoma.
