Dr. H. B. Stenzel,
Bureau of Economic Geology,
Austin, Texas

Dear Dr. Stenzel:

I thank you for your letter of January eighteenth and also for the two crab papers received today.

I am glad you have found some of my material interesting and helpful and am glad that we might contribute even in this small way to the fund of knowledge being assembled and classified for the future by scientists such as yourself and others at the University.

I prize my specimens and feel sure you will not let them get mixed with others or misplaced.

With assurance of my kind regard, I am,

Sincerely,

Fred. T. Moseley
