University of Texas
Austin, Texas

Dear Dr. Stenzel:

I have recently made some fossil collections from the Claiborne, Jackson and Vicksburg of Louisiana, Mississippi and Alabama. I have tentatively identified a part of the collection, but may need help with the rest of the fauna. I wonder if you could spare me a few hours some day, if I find that I do need assistance. I can phone for a definite appointment before coming to see you, if you can give me a rough and general idea when it would be convenient for you.

Naturally, if there any duplicate specimens, or any particularly rare species which you would like to add to your own collection, you would be welcome to them.

Very truly yours

C. I. Alexander

Dear C. I. Alexander,
Your letter and offer is very tempting.
I am working now in Houston County in the field. This is far another community. If it is report, you could look me up in sufficient you could look me up in Crockett. I live in the Brownberg residence (see map). If you think we need a lot of literature we could meet in Austin, I am returning soon out to Houston anyway.

Tuesday

and during one of these next few days you could come to Houston. I have an excellent car catalog for you. I have an excellent car catalog for you. I have an excellent car catalog for you.
