Dr. H. B. Stenzel  
Bureau of Economic Geology  
Austin, Texas

Dear Dr. Stenzel:

In a paper on Weches Ostracoda (Journal of Paleontology, vol. 20, 1946, p. 298), Stephenson mentions an unpublished report by you on a stratigraphic study of the Weches Formation in central Texas.

I am working on the paleoecology of the Weches section at Smithville, based on Foraminifera, and am very anxious to have all available data on the Weches stratigraphy in the area. So far I have not found a reference to publication of your report, and would be very grateful if you would tell me whether it has been published, and if so, where.

Any information or help you can give me on the stratigraphy of the Weches in this area will be greatly appreciated.

Cordially yours,

*Neville M. Curtis, Jr.*

Neville M. Curtis, Jr.

My wife (Doris Malkin) sends her very best regards.
