

November 15, 1938

Mr. J. L. Staed
123 rue Clovis
Rheims
Marne, France

Dear Mr. Staed:

Your letter of October 10 has been forwarded to me at my present address, which you can see from the letter head of this letter.

I remember indeed with great pleasure the exchange of Tertiary fossils which we had several years back. I would be very glad to exchange with you again, and am sending you a list of my duplicates. In return I would be very much interested in obtaining some of your material. Please send me your complete list of the Tertiary of France and any Recent Mollusks you may have for exchange.

Very sincerely yours,

H. B. Stenzel, Geologist
