

# research + pizza

Supported by

**Austin's Pizza**

Digital rendering of the Pecan Street Project's Home Research Lab.

Director of the School of Architecture's state-of-the-art **Facade Thermal Lab**  
**Matt Fajkus** talks about sustainable architectural design strategies, focusing on  
building envelopes and efficient facade systems.

Fajkus's research informed his part in the collaborative design of the **Home  
Research Lab**, built as part of the **Pecan Street Smart Grid** experiment to  
integrate scientific research with sustainable living strategies for the public.

👉 **Free Pizza** provided by program supporter **Austin's Pizza**.
