Dr. Reilly Begins Survey of Local Trade Sections

Similar Work Done in Various Other Texas Cities

Study Aids Austin Merchants

To extend the trade territory of Austin merchants into contiguous communities where their business is weak, Dr. W. J. Reilly in charge of marketing studies of the University, yesterday began a scientific survey of the retail trade territory of Austin merchants.

The Austin survey follows closely on to similar surveys made by Dr. Reilly in other Texas cities. Trade territories of various Texas cities will be shown on a map which is being prepared by the Bureau of Business Research.

The Bureau of Business Research was established about six months ago by the University, and has for its purpose the collection of impartial information concerning the trade territory of important cities in Texas.

The survey by Dr. Reilly and his assistant, Arthur H. Bert, has the approval of Austin merchants.

Oil Royalties Go Over Eight Million Mark

REVENUE from oil royalties of the University went over the \$8,000,000 mark Tuesday when \$115,168 was received from four of the major producing companies operating on the University lands. This money makes up the permanent fund of the University.

The checks from the various companies were as follows: Big Lake, \$68,712; Texon, \$19,990; Atlantic Producing Company, \$16,529; and Pecos Oil Company, \$9,937, making a grand total of \$8,128,716.

First Tryouts Wroe Oratorical Contest Friday

Prizes Amounting to \$100 For Undergraduate Winners

Preliminary tryouts in the Wroe Oratorical Contest will be held Friday evening at 7:30 in the auditorium of the Law Building. The finals will be held Tuesday, February 28, at 8 p. m., according to Ellwood Griscom of the Public Speaking department.

Open to Students

The contest is open to any student in the University not registered in the Graduate School, Mr. Griscom said.

Orations for the contest are to be written by the speakers themselves and are to be not more than twelve minutes in length. Each oration must have the approval of the chairman of the department of public speaking.

\$100 in Prizes

The total of the cash prizes in this contest amounts to \$100, and is to be divided into awards of \$50, \$30, and \$20 to the first, second and third speakers, respectively. According to Mr. Griscom, the highest ranking contestant without a degree will represent the University of Texas in the Missouri Valley Oratorical Contest on March 16 at St. Louis.

There will be five contestants in the final contest.

East and West Hear KUT Radio Program

Although the University of Texas radio station, KUT, has frequently received messages from persons on either side of the United States and even from foreign countries, it has for the first time heard from both sides of the continent regarding the same evening's program, according to Dr. S. L. Brown, faculty director of the station.

After one of the recent Friday evening programs, the station received messages from New York City and Oxnard, California. Messages were also received from several other cities in New York state.

GIRL SCOUT COURSE GIVEN BY MISS PAULINE WHERRY

Miss Pauline Wherry, Regional Director of Girl Scouts, will give a girl scout course in the University in April, according to Dr. David K. Brace. Further information concerning the course will be given later.

Penick's Texts Adopted by State Textbook Commission

Patterson Writes Text For High School Use in Texas

Latin text books written by Dr. D. A. Penick, professor of classical languages in the University, in collaboration with Leslie C. Proctor, superintendent of schools of Temple, and a text book on civics, written by Dr. C. P. Patterson, professor of government in the University, in collaboration with J. B. Hubbard, Belmont lawyer, have been adopted by the state textbook commission.

Bureau of Business Research Ranks Texas First in Natural Resources

Soils, Forests, Range Grasses and Forage Plants, Make Texas Economic Empire Of the Southwest

Texas has played a part in American economic development which should be the source of pride of every person in the state or in the whole United States, according to Elmer H. Johnson, industrial geographer of the Bureau of Business Research of the University of Texas. Mr. Johnson in a summary of some of the particular characteristics and some of the special comparative advantages of "this economic empire of the Southwest," which comprises twelve per cent of the total area of the United States, gives a number of facts regarding the size of the state along with its resources and possibilities.

Four Divisions

"The natural resources of the state may be grouped into four large divisions—soils, forests, range grasses and forage plants, and petroleum and other minerals," Mr. Johnson said.

"Included in the original area of the southern pine forest in Texas were 30,000,000, or an area of three-fourths the total extent of the original forests of all the New England states," according to Mr. Johnson.

Petroleum Production Large

"The total of Texas petroleum production has amounted to more than a billion and a half barrels, the large share of which has been produced since 1900. Oil production, as every one knows, is of considerable economic significance to the state of Texas; so also is oil refining, in which Texas stands as one of the two leading states."

First in Exports

"The importance of the agricultural activities of the state is also shown in an analysis of the exports of Texas. In 1924, Texas stood first in volume of exports in our foreign trade according to the figures of the department of commerce at Washington. During the years 1925 and 1926, Texas stood easily second among the states in value of these exports, New York state ranking first."

Farms and Ranches

"The income of Texas in the past has come predominantly from its farms and ranches. As early leading state in the number of as 1860, Texas had come to be the beef cattle, as shown by the records of the Federal census.

"In regard to soil resources, Texas occupies a unique place; the state's heritage from nature in the way of soils is an especially fortunate one. I believe that in soil resources Texas is the richest state in the Union. Furthermore, it appears that with proper care the productive capacity of these soil resources can be effectively maintained. The combination of advantageous physical factors, particularly of climate and soils, has made possible the position Texas occupies in the nation's agricultural production. Texas produces 8 per cent of the total value of all crops raised in the United States."

Agricultural Production

"The types and kinds of agricultural production and the intensity of utilization of the lands of Texas whether for crops, forests, live stock or industrial establishments are intricately tied

up with the combinations of natural resources and physical conditions in the various natural regions of the state. Future policies and economic readjustments will demand a keener insight into the physical bases of production in these sections of the state. It will be necessary to know considerable also of the possibilities of competing or supplementary sections outside Texas."

Spanish Leads All Romance Tongues On List of Exams

Applicants who intend to satisfy their foreign language requirements with Spanish in the foreign language examinations Saturday almost double those of any other language and are equal to all the others combined.

Eighty-five applications have been turned in for Spanish. French follows Spanish with 44, while Latin surpasses German by one. Latin applicants are 12 and German 11. The total number of applicants is 152.

Examinations to satisfy the foreign language requirements come Saturday, February 18, at 2 o'clock in Main Building 250. The last date for receiving applications was Wednesday, February 15, at noon. This was the last chance for seniors who expect to graduate in June, since the requirement must be satisfied before March 15.

WESTERN COPY ACCEPTED

MISSOULA, Mont., (IP)—The Frontier, literary magazine of the University of Montana, has announced its intention of becoming an all-midwest and far-west literary production, accepting copy from other than college students. It is an effort on the part of the editors to create some such magazine as the Midland.

Battle Tells of Ancient People in First Public Lecture of Semester

Ancient Modernists Compared to Modern Modernists in Texture and Scope; Futuristic Designs Produced

"Not content with creating beautiful things, the artists of pre-Greek culture along the Mediterranean used the enormous colors of modernist painters in decorating their pottery. It seems to have had great popularity for a short time but probably didn't last any longer than our modernist painters will," said Dr. W. J. Battle of the Greek department in his lecture on "A Lost Civilization Recovered" in Garrison Hall auditorium last night at 8 o'clock.

"The Greeks were not interested in their predecessors on the Peleponessus but they had a few traditions regarding them. The Greeks had as high an idea of their own importance as the present day 100 per cent American," Dr. Battle further stated.

Schliemann Responsible

"Heine Schliemann who is responsible for the excavation of Troy was the son of a German clergyman. He made a fortune in business and becoming a great devotee of Homer determined to excavate the site of Troy. He was for a time living in California and became an American citizen. He returned to Germany and became married. Later, his marriage having gone on the rocks, Schliemann returned to America that he might get a divorce.

"Schliemann then went to Greece where it was pointed out to him that marriage was considered almost necessary in Greece and consequently he became married to a Grecian maiden.

Permission Received

"He received permission of the Turkish government to excavate the site of Troy. The exact location of Troy had long been subject to controversy. He decided to excavate on the Trojan hill on the Asiatic side of the Hellespont. He discovered his most important finds here.

"Later Schliemann made excavations at Mycenae, Tiryns, Vaphio, Orchomenus and later the island of Melos. He wanted to excavate at the site of Cnossus in Crete, but wasn't allowed to. This excavation was later accomplished by Sir Arthur Evans.

"After Schliemann had excavated the site of Troy, he returned to do the work more thoroughly with the assistance of Dr. Durrfeldt. As a result characteristic traces of no less than thirteen towns have been found on the site of Troy.

Nine Trojan Strata

"The nine most complete towns coming up on the chronological scale are: Stratum I, before 2500 B. C.; stratum II, 2500-2000 B. C.; this was thought by Schliemann at first to be Homeric Troy; stratum III, IV, V, three prehistoric villages, 2000-1500 B. C.; stratum VI, Homeric Troy, 1500-1000 B. C.; stratum VII, early Greek settlements of two periods, 1000-700 B. C.; VIII, Greek Ilion, 700 B. C. to 1 A. D.; stratum IX, Roman Ilion, 1-500 A. D.

"At Mycenae, several cities one on top of the other, were found architectural characteristics of the buildings at Mycenae included huge stone columns which supported larger stones to form the doorways of the tombs. These huge stones were topped by corbelled arches in order that too much weight would not rest on the top stone."

Alabaster Friezes

"Wall decorations consisted of carved alabaster friezes inset with pieces of blue glass. The most characteristic decorative elements were rosettes and spirals.

"Pottery was shown in evolution from the first forms made without the potter's wheels and either completely undecorated or decorated with mere scratchings through line drawing designs, designs of the human figure and of animals and plant life, to final exquisite paintings of characteristic contemporary life."

Bull Fights Favored

It was pointed out that notable elements of the painting of these periods were a predilection for (Continued on page 2)

University Gets Special Volumes From Argentine

Republic Adopts Plan As Educational Feature

Texas One of Four Depositories

Texas University has been designated by the Argentine government as one of four depositories in the United States to receive especially selected volumes from that country, which plans to distribute this literature throughout North and South America.

Argentina has within the last three years adopted the plan of distributing to standard libraries throughout both continents selected books by Argentinian authors as a potent factor in bringing about better understanding of her civilization and progress.

In keeping with this policy, she has appointed a committee which selects the works, and passes upon applications for books from libraries.

Forty-three selected new books have been donated to the University in a recent shipment from the committee. Among them are volumes on history, law, poetry, and socialism, novels and biographies.

Texas University, The Catholic University, the Library of Congress, and one other library in the East comprise the four depositories.

Spanish Club to Give 2-Act Play

Present "El Barbero de Sevilla" at Hancock

At the Spanish Dramatics club meeting it was decided to give a dance in the near future and it was also announced that the club intended to present "El Barbero de Sevilla" at the Hancock theater in April. The meeting opened with a two-act play entitled "Uno de Ellos Debe Casarse." Among the cast were Marian Eikel, Louise Robinson, Fritz Hoffman, and Fred West.

When announcement was made that some money was left over from the Cactus picture, the members decided to give a dance instead of receiving a refund. Fernando Uribe was given charge with the aid of Leonard Canavespi. Among other business Lucy An Neblett took office as secretary. Fernando announced that at any meeting the members were expected to give an autobiography in Spanish, and announcement was made that all new members would be initiated at the meeting of February 29.

OLD RIVALS COMPETE

BERKELEY, Calif., Feb. 15—(IP)—Bobby Sellers and John Doeg, two of the nations leading tennis players, have long been junior antagonists. Now that both have entered college, their rivalry will continue, for Doeg is a freshman at Stanford and Sellers a yearling at the University of California. The tennis teams from the freshman classes at these institutions will soon meet, with these two as opponents.

99 Studes on B.B.A. And Alec Honor Roll

Katie Henley Ranks First in Business Group

Announcement of the honor roll of the College of Engineering for the past semester was made yesterday by Dean T. U. Taylor of that school. A total of 66 names appear on the list, these being ranked as the best ten per cent of the students registered for work in engineering.

Stuart E. Buckley of Eagle Pass succeeded in scoring 73 points and thus won the honor of highest ranking student in the school. Second highest rating was given to John W. Courter of Memphis, Tenn., who scored 67 points. Five other students were included as among the best one per cent.

Eight students were classified as among the best two per cent, twelve among the best three and four per cent, and six among the best five per cent. The complete roll, as announced by Dean Taylor and the score made by each follows:

Among Best One Per Cent

Buckley, S. E., 73; Courter, J. W., 67; Hinton, J. F., 64; Martin, A. B., 64; Davidson, J. P., 63; Harris, Sidon, 63; LaCoste, L. B., 63.

Among Best Two Per Cent

Dillman, E. E., 61; Woods, E. D., 61; Paul, R. E., 60; Wylie, O. L., 58; Hines, R. L., 58; Hubbard, A. F., 57; Winfrey, J. W., 57; Wingo, J. W., 57.

Among the Best Three and Four Per Cent

Greer, M. V., 56; Stratton, A. W., 56; Wilson, J. A., 56; Anderson, P. P., 55; Olsen, Carl, 55; Pearl, E. H., 55; Smith, N. D., 55; Atwood, J. L., 54; Draeger, A. A., 54; Foust, A. S., 54; Johnston, C. E., 54; Norris, C. B., 54.

Among Best Five Per Cent

Fay, Chas. H., 53; Land, H. L., 53; Page, L. C., 53; Ezzell, A. M., 52; Mebane, Mike, 52; Ruth, E. M., 52.

Among Best Six Per Cent

Dunaway, H. J., 51; Kilander, J. R., 51; Lytton, R. O., 51; Pilgrim, C. J., 51; Stewart, J. M., 51; Jessen, H. E., 51.

Among Best Seven, Eight, and Nine Per Cent

Hammond, R. J., 50; Schmidt, G. E., 50; Van Sickle, L. J., 50; Walter, R. K., 50; Ellis, E. W., 49; Hamblen, G. T., 49; Lowther, J. G., 49; Mikeska, P. L., 49; Rushing, F. C., 49; Bagwell, L. R., 48; Bradley, E., 48; Fleming, T. L., 48; Gerbes, Otto, 48; Hudson, J. B., 48; Kelsay, W. D., 48; Rotsch, M. M., 48; Sledge, O. D., 48; Stokes, C. W., 48; Williams, J. T., 48.

Among Best Ten Per Cent

Caldwell, B. H., 47; Lavender, J. G., 47; Bruns, J. L., 47; Chamberlain, M. R., 46; McAfee, H. D., 46; Walker, Lily R., 46; Brooks, V. L., 46; Kneip, G. W., 45; Moseley, M. M., 45.

McLeary Art Under Fire of Campus Critic

"Kindred McLeary is reaping the reward that he intended," declared Raymond Everett, associate professor of architecture, in commenting yesterday on the sensation created by McLeary's picture, "Cotton," entered in the Edgar B. Davis competition at Witte Memorial in San Antonio.

Everett, himself an artist of recognized ability who is better known for his landscapes, said that he believed McLeary's painting was largely a publicity scheme to bring the young architect's work into the limelight. McLeary is adjunct professor of architecture in the University.

Critics Disagree

Campus art critics are divided on the issues arising from the criticism directed at McLeary's painting. S. C. P. Vosper, associate professor of architecture, said, "No true artist could find anything wrong with the picture. It is neither vulgar nor rude. Art grows workers. As I see it, the picture is a masterpiece."

(Continued on page 3)

Flapper Heroines Extinguish Flames In Room at S.R.D.

FEATURE! S. R. D. got so hot last night that the curtain in one of the girls' rooms caught on fire. Of course, it was "certainly" instinct that made the fire start, for it all happened at the crucial moment when the lights went out. All of the girls set to work to prove the power of a woman's lungs as well as her presence of mind. After valiant work the flames were extinguished by the heroine of the night.

Stuart Buckley Leads Alects With 73 Points

Dean J. A. Fitzgerald of the School of Business Administration has announced the fall semester honor roll. Most business administration students carry fifteen semester hours of work; that is, they carry five subjects each meeting three times a week, or three subjects four times a week and one three times a week. If a student carried twelve or more hours with a B average, his name appears on this list.

If he made B in twelve hours and A in four hours, he is classed as "Four semester hours of A above B average." If he has B in five hours and A in twelve hours, he is classed as "Twelve semester hours of A above B average." Within each group the names are ranked according to the number of hours carried, or alphabetically when there is no difference in the number of hours carried.

Fifteen semester hours of A above B average: Katie Bryan Henley, Marshall.

Twelve semester hours of A above B average: George Lutes Bonar, Aubrey; Elizabeth Gilson, San Antonio.

Ten semester hours of A above B average: Hershel Weldon Anderson, Paris.

Eight semester hours of A above B average: Evelyn Charlotte Heath, Austin.

Seven semester hours of A above B average: John Richard McMurray, Ennis; Zena Hildinger, Austin.

Six semester hours of A above B average: R. Glen Davies, Nursery; Albert Lewis Leissner, Jr., Yorktown; C. B. Myers, Jr., Bonham; Margretta Patterson, Dallas.

Four semester hours of A above B average: William Armand Jeffers, San Antonio; Lucile Johnson, Laredo; Ethel Barnes, Rowell, N. M.; Henry Charles Slavik, Rango.

Three semester hours of A above B average: Ernest Roy Cottilla, Cotulla; John David Orton, Bellevue; Robert S. Brandenburg, Cedar Hill; Lillian Edwards, Stephenville.

One semester hour of A above B average: Cecil Herbert Fewell, Dublin; Seth Lowther, Austin; Archie H. Granger, Austin; Howard F. LaBountie, Dallas.

B average: Emma Ruth McQuire, Austin; Gilbert C. Pritchard, Plattville, Colo.; Homer L. Lather, Palacios; W. Lee Moore, Jr., Wichita Falls; Herman Lee Eichelberger, Waxahachie; Bill K. Jones, Frost; William Glenn Russell, Altus, Okla.; Glen Joseph Walt, Houston; Bess Gardner, Austin; Donald A. Price, Berino, New Mexico.

Engineers, Half Moons; Caf, Newman Club Play Tonight

Engineers vs. Half Moons. Cafeteria vs. Newman club. These are the teams that will be seen in action tonight at the Men's gym at 7 o'clock in the semi-finals of the University championship series. These four teams are all that are left out of the 54 who started the race last fall.

These games will bring together the best teams of the intramural contenders, and promise to be fast enough to please anyone. The

Scientific Scholarship

It was recently announced that Dr. J. Walter Fewkes, who for thirty-three years has been connected with the Smithsonian Institution, part of that time as Chief of the Bureau of American Ethnology, will retire from his present position in order to devote himself to private research.

A statement issued by the Smithsonian Institution states that "Dr. Fewkes is one of the few white men to have been initiated as a priest into the secret rites of the Hopi Indians. He was the first man to make use of the photograph in recording Indian music. He introduced the principle of preservation into archaeological research in this country, so that excavation of the ancient Indian monuments of the land was transformed from a looting operation to one of preservation."

"His work made Mesa Verde National Park a center of pilgrimage for thousands annually and a national show place. He gathered one of the largest and finest collections of Indian Pottery ever brought out of the Southwest. He founded and edited the Journal of American Ethnology and Archaeology. On the immense quantity of data collected by him rests much of the future work in American archaeology and ethnology."

"The number and extent of the researches and excavations which Dr. Fewkes has initiated as a pioneer give him perhaps a unique place in American archaeology. They include work among the native peoples of Porto Rico and the West Indies, an archaeological survey of the gulf coast of Mexico, excavations in Trinidad and the Lesser Antilles, and more recently investigations of Florida and the South Carolina mounds."

After more than a quarter of a century of distinguished service in the particular field of scientific investigation which claimed him, it is fitting that he should retire from the active direction of the bureau to devote himself to the solution of problems which interest him as an investigator. Sometimes it is difficult to determine just what is to be called success. Dr. Fewkes was a pupil of Louis Agassiz and worked and studied in the United States, at Leipzig, at Naples, and in France. With such training excellent work might well have been expected of him; and an unflinching devotion to scientific scholarship during the whole of a generation is a success story worthy of emulation.

From Other Pens

After Four Years

After thorough study of the situation, the Yale Bureau of Appointments as well as the department of personnel study at that University have wisely concluded that business representatives wishing to employ graduates must first show suitable opportunities for advancement before the interviews will be allowed.

"The number of companies sending representatives to New Haven is increasing, and while this method of campus recruiting appears generally to be an improvement over previous procedure, new and special problems also arise therefrom," writes Albert B. Crawford, director of the bureau. "In particular, wholesale campus visiting can become extremely disruptive to the academic routine."

"It is estimated that less than 300 students, by the last term of the senior year, are still undecided regarding their immediate future," Mr. Crawford says in summarizing the situation, "and the bureau's industrial registration totals, of 223 this year and 209 last year, consequently represent most of the potential applicants of the last two classes."

It is in these two statements that the good and bad points of the question are contained. It is a blessing in disguise that the campus should be overrun with a great many representatives seeking recruits, because, as it is pointed out in the next paragraph, a great majority of the graduating students are still undecided as to careers for which they are best fitted. Contacts with such representatives afford students an exceptional opportunity to give serious consideration to the future and what would be expected of them if they were to fill certain positions.

In maintaining that concerns sending such representatives have something definite to offer the graduating students in regard to advancements in the future, the bureau tends toward only a partial solution; there is just a slight tendency in that policy to say that a college man should be on the lookout for "a \$10,000 job or none at all." It should be regulated so that it is not so much the salary and possibility of quick advancement as it is that efforts should be made to see that each graduating student selects the line of work to which he can best adapt himself. This done, the other gains are bound to follow.—Michigan Daily.

New Selectivity

In the past seven years the position of the Medical school of the University, like other professional schools, was made extremely difficult because of the rapidly growing demands for a professional education and the limited facilities of the school. Each year the number of applicants refused has increased until in the current year the school accepted only one-fourth of the applicants for admission for a degree.

But in this elimination of many applicants it has been felt that the selectivity was not satisfactory, for in regarding scholarship alone, the school was missing many other points of detection which could be well employed in the selections of prospective doctors.

The Board of Regents at its recent meeting accepted the plan which has been devised by Dean Cabot of the Medical school. The applicants for admission will not only be required to have high scholarship records, but each applicant must also appear before a special committee which will judge his fitness in matters which have much to do with success in the profession. The things which will be considered by this committee will be personality, general history, honesty, intelligence, and practical suitability for entrance into the profession.

The intelligent selectivity which will result from this combination of scholarship and personality is a step toward the ideal in American education. It will not only raise the standard of the profession but it will also serve to raise the standards of the Medical school of the University. Working with a select group, chosen in part for the industry and ability that they have before displayed, and also for the marks which they have received, the department will be able to progress rapidly and achieve a higher goal than is possible with mediocre material.

The Regents and Dean Cabot deserve great commendation for observation of the defect, discovery of a remedy, and the prompt application of a new system.—Michigan Daily.

Official Notices

SORORITY chaperons meet with Miss Terrill at the Phi Mu house at 11 Friday.

MRS. O. P. BOOTH, President.

THE preliminary of the Wroe Oratorical Contest will be held Friday at 7:30 p. m. in the auditorium of the Law Building. The orations are to be not more than twelve minutes in length.

ELWOOD GRISCOM, JR., Chairman of Dept. of Public Speaking

HOUSEMOTHERS for women students, summer session: All housemothers who wish to place their names on the approved list for women for the summer session are expected to sign the application card before February 20. Applications made over telephone will not be considered.

RUBY R. TERRILL, Dean of Women.

FOREIGN language examinations will be held on Saturday, February 18, at 2 o'clock in M. B. 250. Application must be made at the registrar's office not later than Wednesday, February 15, at noon. This will be the last chance for seniors who expect to graduate in June, since the requirement must be satisfied before March 15.

J. L. BOYSEN,

ENGLISH 00A meets in two sections for the spring semester. Section 1 meets MWF 8-9 in Garrison Hall 105; the instructor is Mr. Landa. Section 2 meets TT 8-9-10 in Main Building 306; the instructor is Dr. Stenberg.

R. H. GRIFFITH,

THE following changes in schedule are announced: Business Administration 272s, MW 10, is moved from G. H. 201 to G. H. 303.

English 324s, MWF 10, is moved from G. H. 303 to G. H. 201.

E. J. MATHEWS, Registrar.

Engineers

(Continued From Page 1)

best high school stars from the neighborhood of the Rio Grande. Leo Cardenas and Manuel Garza from Laredo are the best men the Newmanites will send against the quintet put in the race by the Cafeteria. Jack Williams is the other man of the Newman five that will bear watching by the five who sling hash for a side-line ever at the Caf.

The Caf five boasts of one of the best scorers of the year in Thompson, a big forward. Thompson has been the outstanding man for the Caf in all of its games this year. It was his sensational goal shooting that gave the Caf its one-sided win over the Little Campus Dorm in the independent league finals Monday night. Thompson scored 17 points against the dormitory boys, one point more than their entire quintet was able to score.

Other men on the Caf five that will add to the troubles of the Newmanites are Horton, another forward; E. Heiman, Lovinggood, and H. Heiman. These five will be ably aided by Baker and Williams.

Engineers Boast Fast Five
The Engineer and Half Moon fight will bring together two of the fastest teams in the competition. The Engineers fought their way to wins over the strong B.B.A. five, which has won the de-

partmental championship so often that everyone thought they had a monopoly on it, but this year the Engineers went in with a vengeance and proved that somebody besides the Pen Pushers could win basketball games.

The Half Moons have fought their way through to a win in their division of the fraternity league and then walloped all the comers for the championship of the fraternity league. The Phi Delta Thetas gave the Half Moons one of their biggest scares when they forced them to the limit, to win, and then it was the work of one Timmins who got hot in the last half to loop four field goals and give the boys from the Half Moon house their win. Aycock, Sanderson, and Leisner all played good games for the Half Moons, and will cause the Engineers no little trouble tonight.

The Engineers will likely start the following men: Christman and Ponsford will start at guards. Fred Nagle, elongated basket looper, will take the center position at the beginning of the game. Manes and Aikman will start at the forward positions. This game will decide who will meet the winner of the Caf-Newman club game in the finals of the University championship series Monday night, February 20, at the Men's gym.

Battle Tells—

(Continued From Page 1)

scenes of bull-fights, hunting scenes and scenes of fish of all sorts, as might be expected of a maritime people.

Dr. Battle indicated that a great quantity of jewelry was

found in these excavations. Gold rings were found with carved stone sets.

Sculpture Shown

Sculpture shown by Dr. Battle on slides indicated that ivory was often used as the medium for sculpture.

Metal work included stick pins decorated with griffins and other animals, gold masks which were laid over the faces of the dead, bronze daggers of fine workmanship featuring an inlaid piece of bronze on which was inlaid in

turn designs of silver, gold, and electron.

Many copper and bronze vessels were found, together with gold and silver cups and goblets, silver pichers.

Writing was also found but it has never been deciphered. It was thought by some authorities to have been rudimentary Greek but that seems to be questionable, according to Dr. Battle.

In speaking of the coming of world Dr. Battle said, "The first

the Greeks to this section of the invasion was made by the Achaeans. Later, the Dorians invaded. The Dorians were more barbaric than the Achaeans and their invasion was followed by a dark age. The Greek civilization which is treated so fully in history came after this dark age."

COLLEGE BUILDING BURNS

VILLANOVA, Pa., Feb. 15—

(IP)—College Hall, an ancient and valuable structure at Villanova college, was destroyed last week with a loss of around a million dollars. Fire which broke out in the science laboratories consumed oil paintings valued at \$75,000 and recently purchased scientific equipment valued at \$100,000. Thirteen persons were injured while fighting the flames. Five students were overcome by smoke, while attempting to remove valuable equipment from the building. For a time the entire college campus was threatened by the fire.

Former Athlete Married Friday

Bill Clark of Austin and Maurice Gossett, also of Austin, were married last Friday evening at the home of the bride's parents. The Rev. A. L. Aulick performed the ceremony at 8 o'clock in the presence of a few relatives and friends.

The bridegroom and bride entered unattended. Antoinette Nallo played the bridal music. The couple left immediately after the ceremony for a brief visit in Dallas, and will return to make their home in Austin.

Clark is a former student in the University, and was prominent in athletics while here. Later he attended the Texas School of Mines in El Paso. Mrs. Clark is a student in the University, and will continue her studies.

Whipple-Courtney Wedding Sunday

The wedding of Alice Courtney of Austin and Howard Whipple of San Antonio was solemnized Sunday afternoon, February 12, at the home of the bride's parents. The Rev. Lawrence Wharton performed the ceremony with only the families of the couple present.

Mrs. Whipple is a graduate of the University and has been teaching in Austin for a short time. Whipple is a graduate of the law school of the University, and is now connected with the law firm of Saunders and Whipple in San Antonio. The couple will make their home in San Antonio after a short wedding trip.

Chi Omegas Give Valentine Tea

Chi Omega entertained with a Valentine tea Wednesday afternoon, February 15, from 4 to 6 o'clock at the chapter house for alumnae, patronesses, and faculty members.

In the receiving line were the officers of the sorority, Mrs. Webb, and the alumnae members of the sorority in the house party.

Pouring tea in the dining room were Mrs. Creighton, Mrs. Jesse Walker, Mrs. Earl Sims, and Mrs. Ida Barr.

Decorations throughout the house were in the Valentine motif, with roses and carnations forming the centerpiece in the dining room.

Bernice Langham Married Saturday

Bernice Langham of Alice and James R. Pennington of Granger were married Saturday, January 29, at high noon at the home of the bride's parents in Alice. The Rev. S. H. Hull of Alice read the impressive marriage vows which were witnessed only by relatives and a few close friends.

The bride is the daughter of Mr. and Mrs. A. S. Langham of Alice and is an accomplished musician. The groom attended A. & M. and the University. The couple left after the ceremony for San Antonio, Austin, and Granger.

They will make their home in Alice where Pennington is in business.

Sunday Club Gives Valentine Party

An old-fashioned Valentine party for all Episcopal students, sponsored by the Students' Sunday club, will be given at Grace Hall Friday, February 17, according to Yvette C. Rosenthal, president of the Sunday club.

Invitations have been sent out to the students, Miss Rosenthal stated, but if any Episcopal student fails to receive his for any reason, he is to come to the party anyway.

The social committee, which is planning stunts and games for entertainment, is in charge of Miss Elizabeth Law, assisted by Miss Hilda Molesworth, instructor in physical education.

Very interesting means of getting acquainted, by finding and pining on the owner a half Valentine on which is written the student's name, and by matching partners afterward, have been planned. The purpose of the party is to get the Episcopal students together to become acquainted and to have an enjoyable evening, the president stated. Unique refreshments will be served.

Phi Kappa Psi announces the pledging of Frank V. Mondrick of Cameron.

Virginia McLeod from the Phi Psi house is spending a few days in Dallas.

Miss Hilda Molesworth and Miss Jeanie Pinckney attended the Girl Scout convention held in San Antonio last week.

Mrs. Annie S. Irvine of the English department, who has been ill the past few days, is now back on duty.

Miss Ruth P. Pressley, instructor in English, is in the hospital with pneumonia.

Sigma Eta Chi announces the pledging of Stuart E. Buckley of Eagle Pass, and Frederick H. Korth of San Antonio.

Helen of Troy
"The Private Life of Helen of Troy," the girl who flew to Paris, and for whom a thousand ships were launched, appears at the Majestic theater for the remainder of the week. John Erskine wrote a delightful satire about her and gets credit for the picture, but the likeness to the book stops with the title. You will like the picture, however, as it is quite an

Anyway, showing at the Queen today you can see an actual case in point, the real story behind some real letters which Miss Fairfax gave some real answers to in a real newspaper (not The Daily Texan). Sally O'Neal and Molly O'Day, sisters, put on an exhibition of lovemaking which would be hard to beat, and there's something about Larry Kent, as the bone of contention, which makes you like the guy in spite

385 Register to Swell Enrollment To 5,512 Total

Twelve students registered in the University on Tuesday, February 14, and six more on Wednesday. This brought the total up to 5,512.

This makes 385 students who have registered since the beginning of the new semester.

HARVARD GETS \$6,000,000
CAMBRIDGE, Mass., —(IP)—Over six million dollars have been added to the coffers of Harvard University during the past year, recent reports to the overseers indicate.

entertaining satire itself. Menelaos and Helen are in reality the "Mr. and Mrs." one sees each Sunday in the funny papers, but with all the glamour and brief costumes of Trojan times. With the success of this picture no doubt we will in the future see quite a number of other "private lives" made public.

—J. H. A.

McLeary—

(Continued from Page 1)

is what you yourself see in the picture.

"McLeary's 'Cotton' is a picture of a negro reposing in the middle of a cotton field with little or no clothing on, surrounded by nature is an interpretation of the negro's indolence and nakedness in real life," Vosper added.

S. E. Gideon, associate professor of architecture, did not give out a statement, but it will be remembered that he was a member of the art jury which hung McLeary's painting in the Witte Memorial.

"Severe criticism which brings forth much publicity," Everett said, "makes the artist more widely known and is probably the sole purpose of the entry of McLeary's work in the competition because circumstances surrounding the

awarding of prizes would make it impossible for the picture to be granted a prize."

Commenting further, Everett stated that those of the modernistic class would derive no vulgar interpretation of the picture. But to the ordinary person, the first viewing of the picture might leave

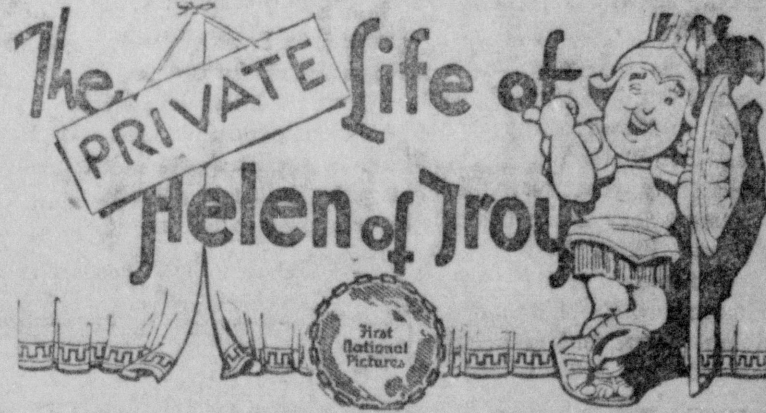

an impression of vulgarity. "The picture is striking," Everett said, "and is of good colors and well painted. It is a typical work of those of the modernistic class, and the merit of that type of picture can only be determined in time. However, it is not the type that I care to paint."

Injury and Illness Jinx Gets Five Texas Cagers

The hand of an unkind fate still pursues the 1928 Texas basketball team. Not content with fixing a schedule which would send the Steers against the strongest teams in the conference, in the first three games of the season, this week that hand has grabbed Joe King, fast little forward, and Red Wray, big Steer guard, from the ranks of the Longhorn five and sent them to the hospital with la grippe and influenza, respectively. There is a possibility that Joe King will be able to get out of the hospital today, but Red Wray will be confined to his room for several more days, according to Dr. Bethel.

Estes Injured

Captain Johnnie Estes, fighting guard, has suffered a recurrence of a leg injury that is keeping him from daily practices. Holly Brock, fastest forward in the conference, and Texas' best bet for the all-conference five, has a pulled muscle in the leg that has slowed him down and is keeping him out of the daily workouts. With Sugar Camp suffering from a badly bruised foot, all of the Texas first string forwards are incapacitated for active service. With these five men on the sick and injury list, there is little hope for Texas against the Ponies Saturday night, unless a miracle happens. There is no doubt that Brock, Estes, and Camp will make the trip, but whether or not they can stand the fast pace that will be required of them that night is another question.

Rally From Start

After getting off to a bad start, the Steers had rallied to make themselves a serious con-

tender for second place, and the game Saturday night would have given them a chance to go into a tie with the Ponies for second place. When the team seems to have hit its stride, injuries and illness rob it of five of the best men on the squad and leave men who are hard fighters but who lack the experience necessary to put over a win against the Ponies.

S. M. U. has just returned from Arkansas, where the Porkers gave them two of the soundest drubbings that the Ponies have received in many years; and Saturday night will find them determined to have vengeance at the expense of the Steers.

Number Expected

It is expected that a large number of students will make the trip to Dallas to see the game, as it promises to be one of the hard-fought games of the year for both teams. Texas is making a game fight to finish in second place.

Coach Walker has asked that all those intending to drive up for the game get in touch with him before Saturday.

Surgeons Work on C.I.A. Campus Trees

DENTON, Texas, Feb. 15.—Trees on the campus of the College of Industrial Arts are being treated by men from the Davey Tree Surgery of Kent, Ohio, as a result of an appropriation secured for this purpose by President L. H. Hubbard.

The trees are in a critical condition due to the fact that they are being forced to change from the forest to the lawn type. Since the dead leaves are constantly raked away from the trees, they have found it hard to secure food, and with the consequent lessening of vitality limbs have broken and fallen off.

Donald Joseph Reads Houseman's Poems

Donald Joseph, adjunct professor of romance languages, will give the public reading for this week this afternoon at 5 o'clock in the Biology Lab. He will read selections from books by A. E. Houseman, "The Shropshire Lad and the Last Poems," without comment.

Bear Batteries Show up Strong

Daily Workouts Prepare Men for Grind

WACO, Texas, Feb. 15.—Batterymen for the Baylor Varsity 1928 baseball team are working out each afternoon preparing for the coming conference grind. In this department of the game, Baylor will be strong this year.

Rudolph Shelton, sterling left hander, is back for his last fling at conference baseball. Shelton has always been a consistent hurler and according to the way he looks now, he'll be classed among the best collegiate hurlers in this section as the season ends. Another young man that is coming along in fine hurling form is 'Fuzzy' Douglas, former Decatur college star. If he hits a good stride during the conference, the Bears will ride close to the top in the conference averages.

Behind the bat, Coach Morley Jennings has a pair of veterans in Jimmie Green and Gale Griffen. They caught turn-about last season. Both are dependable, although a bit weak with the Hickory.

It is the infield problem that will give Jennings most trouble. Two lettermen will be back, but he must be well fortified at the other two places. Aubrey Smith and 'Boody' Johnson are the lettermen back.

Three regulars from last year will return to the outfield.

Sampley Reads from Works of Chesterlon

A. M. Sampley, instructor in English, read from the works of G. K. Chesterton before members of Reagan Literary Society at its regular meeting Wednesday afternoon in the Girls' Study Hall at 5 o'clock. Mr. Sampley in his introductory remarks summarized the writings of Chesterton and gave a few words on the two themes of the English writer of Roman Catholicism and socialism.

Dorothy Kemp made a report regarding the club pins which may be obtained at the University Co-op. Essa Mae Fudge presided at the meeting. Margaret Eldridge, chairman of the program committee, introduced Mr. Sampley to the members.

Bryant Attending Electrical Meeting

Professor J. M. Bryant is attending the national mid-winter convention of the American Institute of Electrical Engineers in New York City. Mr. Bryant, a professor of electrical engineering in the University, is the only director of the National Institute from the southwest section.

According to members of the University of Texas chapter of the organization, a section meeting of the Institute will be held, probably in St. Louis later on in the year.

Professor Bryant will return to the campus the latter part of this week.

SCRIBBLERS CLUB MEETS

Scribblers club met Tuesday night at 7:30 in the Y. M. C. A. rooms. James H. Parke presided at the meeting. Virginia L. Fullington read a short story entitled "Dividing Up."

Short stories were read by Ed Steere and by A. M. Sampley, of the University English department. Mr. Sampley also read a short poem. Fred Romberg, of Austin, read an informal essay.

TEXAS BOOK STORE

Porkers Ready For Texas Trip

Schmidt's Men Must Win Three of Four Games to Cinch Title

FAYETTEVILLE, Ark., Feb. 15.—(Special)—The circuit riding Arkansas Razorbacks, who are well on their way toward their third Southwest conference basketball title, are preparing for their last barrier of the season, when they hit the road this weekend for a Texas jaunt. The Porkers will have to play four games within five days' time on this trip. They will open with Rice in a two-game series February 17-18 and following this in rapid succession, will go to College Station to wind up their schedule in a double engagement with the Cadets of Texas A. & M. February 20-21.

Arkansas need win but only two of these games to get at least a split on the title, even if the Mustangs of Southern Methodist University make a clean sweep of their remaining four games. Three victories would cinch the title, giving Frances A. Schmidt his third consecutive win—a trick that no other master in the conference has been able to pull yet.

The Porkers have averaged 41 points to the game in their eight conference tussles while they have held their opponents to an average of 23 points to the game. Three of the four leading point collectors of the conference are members of the Arkansas squad. Pickel, lanky center, is showing the way to the pack with 192 points. Allison, of Southern Methodist University, is second with 92, while Schoonover and Haizlip, of Arkansas are close behind him with 85 and 79 points respectively.

Captain Rose, all-conference guard selection, Ralph Haizlip, sturdy forward, and Paul Kays, diminutive forward, will wear the Cardinal and White togs for the last time of their collegiate career in this jaunt into Texas.

Pirate Track Squad Rounding into Shape

GEORGETOWN, Texas, Feb. 15.—Some twenty or thirty aspirants for the 1928 track team are reporting for practice at Southwestern University. Most of these men are new material, since only five letter men are back to form the nucleus around which to build this year's team. Of this new material there are several freshmen who are expected to make their letters.

Intensive training has been in order for about two weeks, and Southwestern expects to turn out another winning team this year in face of losing many of last year's stars.

Pairings Named Yesterday for Handball Contests

At Kinson Will Visit Campus February 24

R. K. Atkinson, Educational Secretary of International Boy's Club Federation with central office in New York City, will visit the University on Friday, February 24. Dr. David K. Brace has announced. Mr. Atkinson will talk to all students and others

interested in boy's club work at 5 o'clock in Room 1, Garrison Hall.

"Mr. Atkinson's talk on 'Why

Boys Behave Like Human Beings' will be of especial interest to students in physical education and in sociology," Dr. Brace said.

CHARTER HOUSE

Spring Styles

for

University Men

SUITS

For Spring—colors are lighter, brighter, gayer. Patterns are livelier as befits the season. But the style holds steadfastly to that standard of university perfection which Charter House represents. It is not a new cut of clothes. It is, however, the only style that properly dressed university men will accept.

HAROLD TEEN—WHO IS THIS MAN?

ANY way you figure it, P.A. is better tobacco. Take fragrance, for instance. Your well-known olfactory organ will tell you. And taste—who can describe that? And mildness—you couldn't ask for anything milder.

Yes, Sir, P.A. is cool and comfortable and mellow and mild. Long-burning, with a good clean ash. You never tire of P.A. It's always the same old friendly smoke. Get yourself a tidy red tin and check everything I'm telling you!

PRINCE ALBERT
