Dear Rong Ma,

If Springer cannot give you a permission and has asked you to contact INRA, I will answer your request on behalf of my Institute, as the Managing Editor of *Apidologie*.

As your article was not published with Open Access, you cannot use the pdf format of Springer.

However, we give you the permission of including your article in your dissertation as a post-print (i.e. the last accepted version) and ask you to add a mention and a link to the publisher's version ['This article has been published in the journal *Apidologie* ... and is available at (the link)].

I hope my answer has addressed your concern.

Best regards,

Anne Dufay

Managing Editor
