

Lt Z E Turner USNR,
Orrum School June 26/49

Dear Stenzel USN SAS
Genoa Illinois

Isn't it wonderful — the things
I write really surprise me.
There is only one thing that I
would have added and that is
mentioning Fleming formation
some where in the opening
paragraphs. However that is of little
importance as it is in the abstract
and in the description of species.

I would be very happy to bear my
share of the cost of the reprints and would
indeed appreciate your sending them
out to the people on our previous list.
You may mail them now or wait until the
other paper in the AAPG comes out and
save postage.

The future of geology and geologists
at A+M does not appear very bright
from this distance. However that is
not bothering me at the moment. I
am just as glad to be away from the
mess.

Best regards

Earl
