

April 30, 1940 -

Mr. Tom McGlothlin
Box 1105
Jackson, Mississippi

Dear Mr. McGlothlin:

Mr. Blanpied told me that the Mississippi Geological Society has a field trip guide book covering some of the Claibourne group. I would like very much to have that guidebook and I am willing to pay the price for it. Could you be so kind as to send me a copy?

In Jackson, Mississippi, on Towne Creek, there is an exposure of fossiliferous Moody's marl. I am very anxious to obtain material from that locality. I would be very happy if you could obtain some of that material for me. Maybe I should name a new fossil after you in return?

Sincerely yours,

H. B. Stenzel, Geologist
