Dear Sir,

I thank you for the separates you kindly sent me, and in return I am sending you copies of those separates which I have left.

Should you at any time come across any duplicate specimens of Scalpellum chamberlaini Pilsbry, and Scalpellum eocenense Meyer, which occur in the Claiborne Eocene, I should be most happy to have them either as a present or in exchange.

Yours sincerely,

*T. H. Norton.*

P. S. D. H. D. Thomas has just told me that he has had a letter from Mrs. Plummer saying that she has already spoken to you about the Cirripedes; I should be glad to hear from you concerning them, when you get time.
