Dr. M. Meijer
St. Hubertuslaan 37
Maastricht, Netherlands

Dear Dr. Meijer:

My friend here and I have gone over our needs of fossil specimens that you might be able to furnish and find we can use the following fossils:

- (1) Any rudistids, radiolites, sauvagesias, and related forms.
- (2) Ostrea unguolata Schlotheim
- (3) Exogyra ostracina Lamarck, also known as Exogyra auricularis Münster in Goldfuss
- (4) Other oysters from the Maastrichtian, such as Pycnodonte vesicularis and others
- (5) Fossil crabs and other crustaceans

Please let me know which of these you have available or can obtain for us. On Tuesday, I returned home and now I must go over all my notes and catch up with accumulated mail. It was a pleasure meeting you in France. As it is, I always wanted to meet you and am gratified that it was under such interesting circumstances.

With best wishes,

Sincerely yours,

H. B. Stenzel
