

October 5, 1935

Mr. Steve A. Glassell
Beverly Hills, California

Dear Mr. Glassell:

Please accept my thanks for your recent papers which are always very welcome.

Concerning the question of priority of Miss Rathbun's and my papers, I have not done much about it. I received separates of my paper from the publishers at the end of May and the article is published in the May number of the American Midland Naturalist. Miss Rathbun's paper was received here one month later. To settle the question definitely, it would be necessary to obtain more exact data on this matter. I shall do that later on.

Very sincerely yours,

H. B. Stenzel, Geologist
