Dr. H. van der Schalie
University of Michigan
University Museums Building
Ann Arbor, Michigan

Dear Dr. Schalie:

Concerning the Goniobasis catenaria cancellata Say, by checking with the original collection it has been found that Lithia Springs is in Hillsboro County, near the small town of Lithia.

The reason Polk County was given originally, is that the collector started out from Polk County and did not realize that he had crossed the county line.

This should straighten out the locality data.

Sincerely yours,

H. B. Stenzel
