Business Review and Prospect

GENERAL BUSINESS

National business activity has been lagging since the fourth of July holiday period, and the tendency to slow down is becoming currently more marked. Barron's index, adjusted for long-time trend and for seasonal variation, dropped an entire point during the week ended June 13. This was the first decline of the index in eleven weeks.

Although a lull in industrial activity is anticipated during the weeks immediately ahead, it is expected that marked activity will develop during the fall, provided Great Britain continues buying on a large scale until our own defense program gets under way. Before large scale production of armaments can be attained, however, there must be a preparatory period of expansion of plant facilities, of tooling and training of workers. The initial first steps are now being taken. Since the first of July hundreds of business firms have received War and Navy Department contracts totaling over one billion dollars. Many of these orders will require a long time to fill.

Among the current evidences of an undercurrent of business and industrial strength despite the probable temporary lull in activity, the following have been cited:

Defense construction contracts awarded lifted volume of heavy engineering plans for the week ended July 13 to the highest total on record. Of the \$217,834,000 aggregate, \$177,736,000 represented federal defense works. The largest individual award, amounting to \$25,000,000, was made by the War Department for the smokeless powder plant which will be supervised by du Pont. Other work contracted for included shipways, ammunition and fuel storage facilities, barracks, machine shop extensions, power plant improvements at navy yards, and naval air base facilities. Privately financed construction for the week ended July 13, in contrast to government work, declined substantially from the preceding week and was moderately below the corresponding week last year.

Machine tool orders, mounting since April, were larger in June than in May. Orders have been exceeding shipments, and backlogs of unfilled business were thus further enlarged. In one important producing section backlogs are estimated to average about a year's capacity production. The recent increase reflects the bulge in new domestic business. Foreign orders were in good volume in May, but they dropped off in June and a further decline is indicated for July.

Other indications of an optimistic nature for the near term future of national business are the huge backlogs of orders in the electrical equipment industry; the high rate of activity in newsprint production; the usprecedented activity of domestic air lines; and the rate of sales of passenger cars and trucks. TEXAS BUSINESS

Trade and industry in Texas are being adversely affected by the international situation, which is preventing the free movement of oil and cotton to foreign countries, and by the national political situation which is causing many groups of business men to mark time until they see more clearly what the future economic policies of the country are to be. Fear of new taxes and expansion of existing ones, the mounting national debt, and the relatively low level of national income are concrete factors, which are causing business men, not directly affected by war orders, to defer action on long term commitments. Only those industries which are closely related to our national defense program are likely to launch out in vigorous fashion in the immediate future. Others are expected to follow later, and in due course Texas industry and trade will feel the stimulus of the increased demand for Texas products.

The following tabulation presents the current business situation in Texas as compared with the preceding month and the corresponding month last year. The index numbers are a percentage of the average month in 1930 adjusted for seasonal influences.

	June 1940	June 1939	May 194
Employment	90.2	89.4	90.7
Pay Rolls		92.4	95.7
Miscellaneous Freight C	arload-		
ings (Southwest Distri	ict) 65.1	57.4	62.5
Crude Runs to Stills	189.8	187.9	200.1*
Department Store Sales_	93.2	95.2	103.6
Electric Power Consumpt		123.5	142.3*
Composite	97.9	94.6	100.8*

AGRICULTURAL CASH INEOME

The index of farm cash income in Texas during June was down moderately from May, after adjustment for seasonal variation, but was well above that of June last year. Farm cash income for the year to date still is slightly below that of the corresponding period a year ago, but indications are that before the end of the year this deficiency will be fully made up. The reason for this moderately optimistic assertion is that livestock marketings may be expected soon to make better year to year comparisons. Moreover, the generally good range and crop conditions prevailing throughout most of the State may be expected favorably to affect the quality of the livestock marketed in coming months.

It will be noted from the following tabulation that the customary wide variation in the indexes of farm cash income as between crop reporting districts prevailed again during June.

Waco	5	67.3	59.2	28.5	28.7	1.9	1.7
All Others	18	58.8	61.5	35.7	37.0	2.3	2.1
Stores Grouped According to Type of Store:							
Department Stores (Annual Volume Over \$500,000)	21	64.2	64.6	40.2	47.6	1.2	1.4
Department Stores (Annual Volume Under \$500,000)		67.3	59.1	32.9	34.3	2.3	2.3
Dry Goods-Apparel Stores		75.9	73.6	40.5	40.8	1.8	1.9
Women's Specialty Shops	15	61.6	62.7	33.4	31.5	1.2	1.3
Men's Clothing Stores	17	68.2	66.9	37.4	39.8	2.0	1.9
Stores Grouped According to Volume of Net Sales During 1939:							
Over \$2,500,000	10	68,3	67.9	41.9	40.7	1.0	1.4
\$2,500,000 down to \$1,000,000	11	59.3	59.5	41.4	37.7	1.6	1.4
\$1,000,000 down to \$500,000	10	61.7	59.2	39.2	41.4	1.8	1.6
\$500,000 down to \$100,000	30	60.1	59.1	37.1	39.2	2.4	2.3
Less than \$100,000.	10	58.9	57.4	36.4	37.0	3.8	4.0

Note: The ratios shown for each year, in the order in which they appear from left to right, are obtained by the following computations: (1) Credit sales divided by net sales. (2) Collections during the month divided by the total accounts unpaid on the first of the month. (3) Salaries of the credit department divided by credit sales.

The data are reported to the Bureau of Business Research by Texas retail stores.
