

April 11, 1963

Professor J. V. L. Rennie  
Geography Department  
Rhodes University  
Grahamstown  
Republic of South Africa

Thank you letter  
was sent by  
him 20/6/63

Dear Professor Rennie:

Thank you very much for your kind letter of 11/2/63 and the two specimens of Exogyra imbricata Krauss. The latter arrived in good condition and are very fine specimens, which will be useful in the study of the family Ostreidae.

By separate mail I am sending specimens of:

- (1) Exogyra arietina Ferdinand Roemer, from the Grayson Marl (Cenomanian) of 34th street bridge, Austin, Texas, U. S. A.
- (2) Venericardia (Claibornicardia) alticostata (Conrad), 1b33, from the Gosport Sand (Ayversian) of Claiborne Bluff, Alabama, U. S. A.; topotypes of the species. This is the type species of Claibornicardia.

Sincerely yours,

H. B. Stenzel
