Austin, Texas

Dear Hugo:

I am very sorry I did not get to reply to your letter sooner, but we have been very busy winding up the fiscal year.

I do not believe that the A.A.P.G. Burkville Paper should contain any illustrations except the sections and map. I think we have discussed this several times. When I wrote the notes on the vertebrates, I did so with this idea in mind. I have the illustrations for the systematic paper and the text is over half completed. It hardly seems worth while to duplicate this material.

I will be in Austin toward the end of the month for a day or so. I have some work to do in the library in connection with a series of letters being published by the Historical society. I will see you then and we can discuss this matter further.

Yours truly,

C. J. Hesse  
Curator
