

March 9, 1964

Mr. C. D. Homan
Box 57
Oglesby, Texas

Dear Mr. Homan:

Thank you for your letter of January 28, 1964, and the box of Cretaceous fossil oysters. Some of these may show features that I shall have photographed, so they will be quite useful.

Please find enclosed check for \$15.00 in full payment of this shipment.

The four Venericardia shells which you presented to me last time may become useful. However, the description of the locality at which you collected them has been misplaced. They came from near Kosse or Corricana, I believe. Could you have the kindness to write me about their locality?

If you have some single loose valves of Ostrea travisana Stephenson from 5 miles west of Bartlett, they might be useful.

With best wishes,

Sincerely yours,

H. B. Stenzel
