AIR MAIL

Dr. C. O. van Regteren Altena
Rijksmuseum van Natuurlijke Historie
Raamsteeg 2
Leiden, Netherlands

Dear Dr. van Regteren Altena:

The Volume 1 of Pasteur's work has been shipped back by our librarian a few days ago; it should be in your hands very soon. I am very grateful to you for lending it to me.

Now, it is necessary for me to study the Volume 2 of the same work. If you have a copy of the second volume, would you please have the kindness to lend it to me using the same route as before.

At present, there are many other projects I have to attend to and in addition I am teaching a class at Rice University here. The class consists chiefly of Mexican geophysicists who have great difficulties with the English language and with beginner's geology. It is the most difficult class I have taught in my whole career.

With warmest thanks for your help and best wishes,

Sincerely,

H. B. Stenzel
