Dear Stenzel:

If you can possibly spare the time I believe that I would spend another part of a day at least in trying to determine whether or not there is a structure in that area we examined Sunday A.M. I should hate to see someone later come in there & find something and leave it for some other company and you not derive any benefit after having the information that you had. Also as you return to Bryan suggest you spot on your map the dips & strike & location of these two reverse dips on Jewett-Marquez road.

Enjoyed my trip very much and congratulate you on the good work you are doing.

Sincerely,

Rewick.
