

Marrs Lectures On Legislative Accomplishments

Address Deals With Recent
Acts on Secondary Schools;
Colleges Omitted

Speaks Wednesday

Superintendent Considered as
Best Texas Authority
On Education

"Some Accomplishments of the Forty-first Legislature for Elementary and Secondary Education in Texas" will be the subject of a lecture given Wednesday night by Superintendent S. M. N. Marrs at the Open Air Theater at 8 o'clock. The address will deal with recent legislation relative to elementary and secondary education, but will not touch upon colleges and higher institutions of learning.

Mr. Marrs, in the capacity of superintendent of public instruction in Texas, is considered the best authority in the state on affairs of an educational nature. It is believed that his lecture will have an especial appeal to teachers and prospective teachers in the public schools of the state and to those patrons of education interested in the promotion of elementary and secondary education.

Superintendent Marrs has made a special study of schools and methods of improvements in the educational fields of the state for several years, and it is considered that he will be able to show far-reaching results from the decisions of the late legislative sessions.

The lecture is sponsored by the committee on public lectures for the benefits of the students of the summer school. Professor I. I. Nelson, professor of the art of teaching, is chairman of the committee.

Governor's Guard Returns From Camp

The Governor's Guard, of which 14 are students of the University, returned Sunday from a two weeks' camp at Mineral Wells.

The guard broke up for the summer, some of the students returning here to finish summer school, and some returning to their homes in various parts of the state. The troop is a part of the 124th Cavalry.

Ney Studio Opens Additional Hours

The Elisabeth Ney Studio will be open this week from 7 to 8:30 o'clock in order to accommodate the summer students. The new hours are in addition to the regular open periods from 10 to 12 o'clock and 3 to 5 o'clock.

The studio is under the direction of the Texas Fine Arts Association with Mrs. J. W. Rutland as the official hostess.

WALLING GETS C. P. A.

Herschel Walling, former instructor in the School of Business Administration, passed the certified public accounting examination, given by the state board of public accountants in July, and received his C. P. A., according to recent information received in the office of Dean J. A. Fitzgerald of the School of Business Administration.

Mr. Walling holds bachelor of arts and master of arts degrees in accounting from the University. He was instructor in the School of Business Administration the past year, and next year he will conduct research accounting in the Bureau of Business Research.

This Week on The Campus

WEDNESDAY, JULY 24

S. M. N. Marrs to speak on "Some Accomplishments of the Forty-first Legislature for Elementary Education in Texas," at Open Air Theater.

THURSDAY, JULY 25

University Chorus to give program at Open Air Theater.

SATURDAY, JULY 27

Movie at Open Air Theater, "The Iron Man."

RETURNS

Carlos E. Castaneda, Latin-American librarian has just returned from Mexico, where he made arrangements for the copying of valuable material for the Garcia Library.

Library Plans To Photostat All Texas History

Three Years' Work Necessary
To Collect Needed
Material

A plan worked out by the University of Texas Library to photostat all existing materials in Mexico relating to the early history of Texas has been planned by Carlos E. Castaneda, Latin-American librarian, who has just returned from a month's tour of northern Mexico, where he made arrangements for the copying of valuable material for the Garcia Library.

It is estimated that about three years' work will be necessary to collect all the wanted material in Mexico, but this estimate may have to be extended. Mr. Castaneda's trip took in three states, Tamaulipas, Nuevo Leon, and Coahuila.

In Brownsville Mr. Castaneda collected data on the early history of the Lower Rio Grande Valley. From there he went to Monterey and made a preliminary survey of documentary material in the state and city archives. In Monterey Mr. Castaneda found considerable material dealing with the early history of Texas.

The materials found in Saltillo have been used by numerous historians, among them Dr. E. C. Barker of the University. Arrangements were made here also to copy all materials in the state and city archives relating to Texas history from the earliest times down to 1864.

In Monclova, Castaneda visited the descendants of the Ramon family, one of the first explorers of Texas, and came in contact with an unpublished history and several valuable maps and charts. All materials for which arrangements were made this summer will be photostated and received in the Garcia Library within the coming year.

Phi Delta Kappa To Meet Tuesday Night

Phi Delta Kappa will hold a dinner, business meeting, and program at the University Cafeteria at 6 o'clock this Tuesday evening, according to an announcement made by the committee in charge of arrangements for the affair.

"Members of the fraternity are advised to fill their trays with such eats as they can afford and to repair to the table in the Cafeteria set aside for the group," it was announced by the secretary. "Each member present will be asked to contribute an address, joke, or quotation," it was stated.

All members of the organization are urged to be present and enjoy the evening, the secretary stated.

\$90.80 ON ANNUAL MESSAGES

Special to The Summer Texan. DENTON.—One senior at C. I. A. is wooed by the expenditure of \$90.80 a year on special delivery letters and telegrams.

There is a special every morning before breakfast, a telegram on Sundays and holidays, and both special and telegrams scattered in indiscriminately to lend variety to the wooing.

Muller, Painter Complete Paper On Experiments

Article Published in Recent
Issue of 'American
Naturalist'

Genetics Studied

Report Deals With Functions
And Life History of
Germ Cells

Presenting some of the more striking results of their experiments with the X-ray in the field of genetics, Dr. H. J. Muller and Professor T. S. Painter of the department of zoology at the University have completed a paper, "The Cytological Drosophila." The paper was published in a recent issue of the American Naturalist.

Dr. Muller startled the scientific world a few years ago with his discovery that gene mutations can be secured in the chromosomes of the germ cell of the drosophila or fruit flies by means of X-ray treatments. For this discovery he was awarded the 1927 prize for successfully performing the greatest biological scientific experiment of the year. Since that time, zoologists in various parts of the world have been experimenting with the X-ray in one direction or another.

Dr. Muller and Dr. Painter have been working together on further X-ray experiments, and this paper discusses some of the outstanding results of these studies, especially the cytological, that is, the portion of them that deals with the germ cells, their structure, their functions, their multiplication and their life history. The paper also calls attention to some of the bearings of these results on scientific knowledge.

Four Ex-Students Placed on Board

Four ex-students of the University were among those named by Governor Dan Moody Tuesday as members of the new state board of education. The new board will replace both the commission of three state officials, and the state textbook commission.

Ex-students named on the board are: F. L. Henderson of Bryan, bachelor of law, 1904; C. H. Chernosky of Houston, bachelor of law, 1912; J. W. O'Banion of Ennis, student in the University in 1907; and Mrs. Noyes D. Smith of Austin, who is one of the two women named on the board. Mrs. Smith attended the University from 1899 to 1901.

The appointments were approved by the Senate Tuesday of last week.

SCORE HONOR SYSTEM

NEW BRUNSWICK, N. J.—(IP)—The honor system is not a success because it is not popular with students, according to Professor Thomas Munro of the New Jersey State College for Women.

"I do not agree with the honor system," he declares. "It places the responsibility for reporting violations upon individual students, and no student likes to tattle on another. It is, in fact a point of honor among students not to report anyone else. As far as I have observed most students would rather go back to the old system."

THREE GET HOMERS

Special to The Summer Texan. WICHITA FALLS, July 20.—While the Spudders of the Texas League won the Beaumont game by knocking out three home runs in the ninth inning here today, it is not a Texas League record.

In 1922 the Galveston Sandcrabs, while engaged in a contest at the athletic park here, sent five balls sailing over the outfield wall in one inning. The Crabs garnered a total of seven home runs in the battle.

During the game, five Galvestonians who hit home runs were: Harvey Hendrick, Tom Connolly, Scrappy Moore, Hal Diviney, and Frank Witry.

SPEAKS 16 LANGUAGES

BERLIN.—(IP)—Berlin claims the world's champion policeman linguist in Patrolman Richard Schottstadt, who can speak 16 languages. He is stationed before the Berlin armory, where he answers the questions of almost all foreign visitors in their own tongues.

Discontinuance of Regular Saturday German Announced

The weekly Saturday night German held in the Woman's Gymnasium will be discontinued for the remainder of the summer according to Leslie Neill manager of the summer dances.

Lack of attendance is the reason given by Neill for the discontinuance of the dances.

Friday night dances held on the roof of the Stephen F. Austin Hotel will be continued throughout the second summer term, it was announced.

Rehearsal For 'Trial by Jury' Starts Tuesday

Griffin Asks For More Singers
For Chorus in
Farce

The University Summer School Chorus, under the direction of David Griffin, will start rehearsal tonight at 7 o'clock in the girls' study hall, Main Building, for the Gilbert and Sullivan musical farce, "Trial by Jury," according to an announcement made yesterday by Mr. Griffin.

The director said that he wished to increase the size of the chorus for the presentation. All who are interested have been asked to be present for the opening rehearsal. Mr. Griffin stated that he has need of both more men and women in the chorus.

The "Trial by Jury" is the third opera to be given by Mr. Griffin the present season. The performance requires 45 minutes for presentation and will be accompanied by a professional orchestra at the Open Air Theater, August 22, at 8 o'clock.

New Marathon Held In Decatur, Illinois

Special to The Summer Texan. DECATUR, Illinois, July 20.—The very latest in endurance contests is now under way in a little side-street restaurant near here.

Five enthusiastic contestants—two boys and three girls—are going after the \$25 prize offered by the restaurant keeper to the one "who lasts longest." Though the marathon has been under way since Thursday afternoon, none of the entrants shows any signs of quitting, or even letting up temporarily. Food is fed to contestants in action.

And what do you think the contestants are doing? They're seeing who can rock the longest in an antiquated rocking-chair.

SLOVER IN CHICAGO

Dr. Clark Harris Slover, professor of English at the University, has gone to Chicago where he will collaborate with Dr. Tom Peete Cross, professor of general literature at the University of Chicago, with whom Dr. Slover was formerly associated, on the completion of a book, Heath Readings in General Literature, on which Dr. Slover has been working. From Chicago, Dr. Slover will go to Washington, D. C., but will return to Austin to teach in the next long session.

OSAKA LARGEST IN JAPAN

OSAKA, Japan.—(IP)—Since the Tokyo earthquake of 1923, this city, the industrial center of the nation, is Japan's largest city. The comparative figures now stand, Tokio 2,218,400; Osaka 2,333,800. Osaka, thus is the eleventh largest city in the world, trailing New York, London, Berlin, Paris, Chicago, Buenos Aires, Philadelphia, Moscow, and St. Louis.

RAY TEACHING HERE

Dr. William Ray, an alumnus of the University, and now of Texas Technological College at Lubbock, is teaching the elementary course in chemistry as well as a course in inorganic preparations at the University during the second term of summer school.

A. & M. BONDS REGISTERED

A. & M. College bonds were registered today by the attorney general's department and state comptroller. The purpose of the bonds is to raise money for the new stadium, expected to be completed in time for the annual Texas-A. & M. battle Thanksgiving Day.

Summer Chorus To Give Program Thursday Night

All-University Cast Used in
Rendition of Song
Collection

Third of Series

Griffin Director of Chorus
For Past Five
Years

The University Summer Chorus, under the direction of David Griffin, will present the third all-University chorus program of the summer Thursday night at 8 o'clock at the Open Air Theater.

The choruses gave a program of folk songs of Stephen Foster at the Open Air Theater June 20, and sang a number of selections for the Fourth of July celebration at the Texas Memorial Stadium. A part of the chorus was presented in the sacred cantata, "Stabat Mater" last Thursday night at the Open Air Theater, assisted by members of the cast from "Martha," which will be presented by the San Antonio Civic Opera Company in San Antonio July 27.

The summer chorus is open to all who wish to participate in ensemble singing. No charge is made for membership and instructions and music are free. Mr. Griffin has directed the University Summer Chorus for five years, and stated he is now directing the best chorus of his experience.

Schools Ask For Athletic Coaches

The biggest demand in the office of the teachers' appointment committee at the University at the present time is for athletic coaches, according to Miss Miriam Dozier, secretary of the committee. Within the past week, eight or ten requests for athletic coaches have been received from all parts of the State. Subjects to be combined with the coaching duties are in some cases mathematics, in some cases science, Spanish or commercial work. Salaries are average, ranging from \$1,000 to \$1,500.

Requests for teachers to take these vacancies are too numerous to fill, according to Miss Dozier, and the committee is looking for individuals qualified to take over the responsibilities attached to the double duties of coaching and teaching classes.

THREE MAKE STRAIGHT 'A'

Special to The Summer Texan. DENTON.—Three students at C. I. A. made a straight "A" record during the second semester of the past year. No grade less than B was made by 100 other students.

Miss Thetis Lemmon, Dallas; Miss Bernadine Bristol, McKinney; and Miss Ruby Cozby, Grand Saline, made the A averages. Miss Lemmon was a June graduate and is now attending Columbia University in preparation for teaching at C. I. A. this fall.

Miss Bristol also graduated in June and was president of the F. M. Bralley Scholarship Society. Miss Cozby is a junior and a member of the scholarship society.

SMITH'S LEAD AT C. I. A.

Special to The Summer Texan. DENTON.—"Keeping up with the Joneses" is a simple matter at C. I. A. Only eight of them were registered here during the past year, while 28 students named Smith matriculated. Only one of the 28 was a Smythe.

There were nine Brown's and one Browne. Prize tongue-twisters were Katzung, Wellensick, Kishi, Uzzle, Boseman, Wozencraft, and Ketaphish. Oddity predominated among those names beginning with K. Knupp, Kosarek, Kotaphish, Kavenda, Kowalski, Krakower, Kubela, and Kurfes followed one another.

OLD LETTERS DEPOSITED

Several letters have been deposited in the archives of the Library by Miss Jessie Cleveland of Lockhart, according to Miss Winnie Allen, assistant archivist.

Some of the letters date back to 1830 and are of particular interest because of their vivid accounts of the California gold rush. Miss Allen said.

Micek Directs Annual Czech Night Program Featuring Folk Songs

The third annual observation of Czech Night at the University will be held at the Open Air Theater at 8 o'clock under the direction of Dr. Eduard Micek, instructor in Germanic languages.

The program which is to be given tonight includes the following numbers: Czech folk dances by Mr. Stasa; Czech folk songs by Ludma Marie Kopecky; three reels of motion pictures; two reels showing scenes of the historic city of Prague, and one reel of the Czechoslovakia Republic.

The annual Czech Night held on the University campus during the summer session is reflective of the progress that has been accomplished in the Czech department here by Dr. Micek. Under his guidance the department has increased from an enrollment of 14 in 1926, when the Czech department of the University was established, to its registration of 38 in the long session. Within a year after the founding of the department, enrollment had increased from 14 to 22.

The Czech department is to be established next long session as an accredited department of the University, with Dr. Micek as chairman.

Last long session 22 scholarships for Czech students were awarded to Texas students, nearly all of whom had studied under Dr. Micek.

Agnes Kolaja, one of Dr. Micek's students, is holder of one of the five scholarships granted by the University of Prague to American students.

Two University students were awarded such fellowships this year from the United States. George Kair will attend the University of Prague next year to study law and Czech history, and Henry Slavik will attend the same school and study business administration.

Dr. Micek will speak at Rowena Tuesday on the subject, "American and Czechoslovakian Independence Days." He will also discuss the importance of higher education.

During the past year, Dr. Micek made 20 public lectures on similar subjects, speaking both in English and Czech to his people.

The Czech Club will hold a short meeting immediately after the program tonight in room 105, Main Building, and all members and friends of the club are asked to attend, according to Dr. Micek. Visitors will be served light refreshments by the club.

Deutscher Verein To Hear Seiberth

Philipp Seiberth, adjunct professor of Germanic languages in the University, will address the meeting of the Deutscher Verein Wednesday night at 7:30 o'clock in room 105 Main Building. The subject of Professor Seiberth's lecture will be "The Problems of the German-American."

Professor Seiberth is a graduate of the University of Indiana and has taught at the University of Washington and at Columbia University. He is acquainted with European affairs, having spent the past year in Germany and other countries of Europe.

SCHOOL 'FARMERS' ORGANIZE

Special to The Summer Texan. COLLEGE STATION.—Charter for the "Future Farmers of Texas," an organization of vocational agricultural students of Texas high schools, was recently granted by the secretary of state and the organization now has 108 chapters with total membership of nearly 2500. Dean C. H. Winkler of the school of vocational teaching, A. & M. College of Texas, who is one of the incorporators of the organization, has announced. It is expected to complete the state organization in April.

MILLER MAKES SURVEY

Sanford L. Miller, who took his bachelor of business administration degree at the University in 1928, has just completed a survey of some of the outlying districts of Austin for the Southwestern Bell Telephone Company. Mr. Miller is developing engineer for the company, with headquarters in San Antonio.

LEAVES MILLION TO CORNELL

One and a half million dollars have been given to Cornell University by Myron C. Taylor, '94, of New York City, for a new building to house the Cornell University Law School. The building will be known as Myron Taylor Hall. Taylor is a lawyer. Plans for the structure already are being made.

Campus Churches Hold Service at Open Air Theater

Reverend Norman Anderson
Talks on 'Significance
of the Gospel'

The first union service for the summer was held by the churches of the University community at the Open Air Theater Sunday night. The Reverend Norman Anderson, pastor at A. & M. College supplying for the Reverend L. H. Wharton of the University Presbyterian Church, filled the pulpit.

"The Two-fold Significance of the Gospel," was the subject of the sermon. John A. McCudry, secretary of the Ex-Students' Association led the singing for the service.

It is the policy of the University churches to join in their services each Sunday night of the summer sessions of the University, each pastor taking his turn at conducting the services. The plan will be continued throughout the second term, closing with the summer school, it has been announced.

Chorus Members To Attend Opera

Fifteen members of the University Summer Chorus plan to go to San Antonio Saturday to attend the open air performance of the opera "Martha," which is to be given by the San Antonio Civic Opera Company under the direction of David Griffin. Mr. Griffin is director of the San Antonio Civic Opera and of the University Chorus.

A special rate of \$1 for reserved section has been made for University students. Special tickets are available at the Speakophone Recording Studio, 2204 Guadalupe Street, Mr. Griffin announced.

'Man of Iron' Shown At Saturday Movie

"A Man of Iron" is the title of the motion picture which will be presented Saturday evening at the Open Air Theater, according to Mrs. Charles Joe Moore, director of the visual instruction bureau of the Division of Extension. The leading role is played by Lionel Barrymore.

FOSTER YOUNGEST JUDGE

SYRACUSE, N. Y.—(IP)—Sidney F. Foster, a graduate of Syracuse University, has received the distinction of being the youngest man ever to be elected to the supreme court of the State of New York.

Foster is 35 years of age, whereas those elected usually are famous lawyers of the state. The term of office is 14 years and the salary \$16,000 per year.

RECORD CLASS AT C. I. A.

Special to The Summer Texan. DENTON.—The largest summer graduating class in the history of C. I. A. will receive degrees at the close of the session on August 27.

Out of 96 applicants, 65 have requested bachelor of science degrees, 30 bachelor of arts, and one bachelor of music. The total number of degrees conferred during the year will be 288.

\$2,000 FOR MAGAZINES

Special to The Summer Texan. DENTON.—More than \$2,000 a month is spent by C. I. A. students for magazines during the regular school year.

These figures are based on an estimate from a questionnaire recently answered by the student body, according to which the average student spends \$1.79 monthly for periodicals.

Summer Texan

The Summer Texan, the summer season edition of The Daily Texan, is published on the campus of the University of Texas, Austin, by the Texas Student Publications, Inc., every Tuesday, Thursday, and Sunday morning.

Editorial offices, R. Hall, Telephones 2181-61. (After 10 p. m. 9157.)
Business offices, B. Hall, Telephones 2-3164 and 2-3165.

Printed by the University Press, A. C. Wright, Manager.

Entered as second class matter at the post-office at Austin, Texas.

Subscription price: Five dollars yearly.

and at the same time make it possible for every college graduate to take a definite place in the world's activities as soon as he gets his diploma? This could not be done under the present system, but is not a system which would do essentially that entirely possible? Some of us of the present generation believe so. Certainly, there are a few people trained for technical trades or professions and who can take their places immediately upon graduation, but our plea is for the great rank and file of college graduates.

Morgan on Law Reform

PROFESSOR E. M. MORGAN

of the Harvard School of Law last week delivered at the Open Air Theater two lectures on our system of jurisprudence as a failure. Professor Morgan did not state his question in just those terms, but to the mind of one pessimistically inclined such was the import of his words. The two lectures were prepared by a lawyer for a lay audience and the speaker sought to tell his hearers, in a general way, what is the matter with the present system of administering justice, and, what in theory at least amounts to more, he tried to tell them what they could do to better the situation.

Professor Morgan is well qualified to speak upon the problem with which he dealt. A successful lawyer who has practiced in both New York and Massachusetts, and now a member of the faculty of what is generally recognized as the strongest school of law in the country, the speaker combined the viewpoint of the ethical lawyer—and there are many such—and the student of jurisprudence. The reforms which he suggested are practicable—many of them have been adopted in some jurisdictions. He was speaking to a group of people who, as nearly as any one

Diplomas—What For?

PERIODICALS numbering

2,443, ranging from religious tracts sent free to highly scientific journals costing as much as \$20 per copy, are received yearly by the Library of the University of Texas. In these are few subjects upon which the latest information cannot be obtained in every realm of human thought.

It has been suggested that many men who have only a common school education and who have subsequently become inveterate readers of newspapers and periodicals can discuss with greater interest and deeper insight the problems with which the world is coping than can the average college graduate. It is a commonplace to see a traveling man with meager education sit on a train or a bus with a teacher, minister, professor, or even a lawyer, and by his superior knowledge of current affairs put his companion readily to silence on nearly any subject which they may choose to discuss.

This suggests that periodicals and newspapers, as the molders of public thought and public opinion, should play a larger part in the education of men and women who will take the lead in public affairs. Not only are the shelves of current literature neglected in our colleges and universities, so far at least as giving them a major part in our curricular activities, but also the high schools of the state, which have in their hands the power to fix current reading habits of the great majority of our future citizens, are doing practically nothing in this direction.

Is it not time that we called upon our schools and colleges to check this worshipping at the shrine of the dead past to the exclusion of a study of the trend of modern thought and activity? Not that anybody would advocate the abolition of a proper delving into the history and philosophy, and traditions of the past, which play so great a part in the molding of the present trend; but it looks as if we should at least come to recognize that the thought of the present is truly a product of the experiences of the past and should, therefore, play a larger part in our system of education.

The failure of our schools to do just the thing suggested here is largely responsible for the many mal-adjusted products of our schools and colleges. The many come from school with a diploma steeped in classical lore, hedged in by perfunctory knowledge of a foreign tongue and unable to speak or write effectively their own. They know little of law, medicine, politics, teaching, engineering, business, newspapering, preaching, book-keeping, draftsmanship, manufacturing, photography, machinery, farming, mining, commerce, trade, seafaring, or any of the hundreds of other subjects which might be mentioned. Leaders of the world's great enterprises would be glad indeed if they came to be able to rely upon our schools to give our young people better preparation to do definite types of work which are calling for skilled workmen. Colleges will take on a new respect and will open up many new fields of service in proportion as they are able to fill the call which is being made upon them.

Could we not retain the best of our traditional curriculum,

and at the same time make it possible for every college graduate to take a definite place in the world's activities as soon as he gets his diploma? This could not be done under the present system, but is not a system which would do essentially that entirely possible? Some of us of the present generation believe so. Certainly, there are a few people trained for technical trades or professions and who can take their places immediately upon graduation, but our plea is for the great rank and file of college graduates.

Not only are the shelves of current literature neglected in our colleges and universities, so far at least as giving them a major part in our curricular activities, but also the high schools of the state, which have in their hands the power to fix current reading habits of the great majority of our future citizens, are doing practically nothing in this direction.

Is it not time that we called upon our schools and colleges to check this worshipping at the shrine of the dead past to the exclusion of a study of the trend of modern thought and activity? Not that anybody would advocate the abolition of a proper delving into the history and philosophy, and traditions of the past, which play so great a part in the molding of the present trend; but it looks as if we should at least come to recognize that the thought of the present is truly a product of the experiences of the past and should, therefore, play a larger part in our system of education.

The failure of our schools to do just the thing suggested here is largely responsible for the many mal-adjusted products of our schools and colleges. The many come from school with a diploma steeped in classical lore, hedged in by perfunctory knowledge of a foreign tongue and unable to speak or write effectively their own. They know little of law, medicine, politics, teaching, engineering, business, newspapering, preaching, book-keeping, draftsmanship, manufacturing, photography, machinery, farming, mining, commerce, trade, seafaring, or any of the hundreds of other subjects which might be mentioned. Leaders of the world's great enterprises would be glad indeed if they came to be able to rely upon our schools to give our young people better preparation to do definite types of work which are calling for skilled workmen. Colleges will take on a new respect and will open up many new fields of service in proportion as they are able to fill the call which is being made upon them.

Could we not retain the best of our traditional curriculum,

and at the same time make it possible for every college graduate to take a definite place in the world's activities as soon as he gets his diploma? This could not be done under the present system, but is not a system which would do essentially that entirely possible? Some of us of the present generation believe so. Certainly, there are a few people trained for technical trades or professions and who can take their places immediately upon graduation, but our plea is for the great rank and file of college graduates.

Morgan on Law Reform

PROFESSOR E. M. MORGAN

of the Harvard School of Law last week delivered at the Open Air Theater two lectures on our system of jurisprudence as a failure. Professor Morgan did not state his question in just those terms, but to the mind of one pessimistically inclined such was the import of his words. The two lectures were prepared by a lawyer for a lay audience and the speaker sought to tell his hearers, in a general way, what is the matter with the present system of administering justice, and, what in theory at least amounts to more, he tried to tell them what they could do to better the situation.

Professor Morgan is well qualified to speak upon the problem with which he dealt. A successful lawyer who has practiced in both New York and Massachusetts, and now a member of the faculty of what is generally recognized as the strongest school of law in the country, the speaker combined the viewpoint of the ethical lawyer—and there are many such—and the student of jurisprudence. The reforms which he suggested are practicable—many of them have been adopted in some jurisdictions. He was speaking to a group of people who, as nearly as any one

Diplomas—What For?

2,443, ranging from religious tracts sent free to highly scientific journals costing as much as \$20 per copy, are received yearly by the Library of the University of Texas. In these are few subjects upon which the latest information cannot be obtained in every realm of human thought.

It has been suggested that many men who have only a common school education and who have subsequently become inveterate readers of newspapers and periodicals can discuss with greater interest and deeper insight the problems with which the world is coping than can the average college graduate. It is a commonplace to see a traveling man with meager education sit on a train or a bus with a teacher, minister, professor, or even a lawyer, and by his superior knowledge of current affairs put his companion readily to silence on nearly any subject which they may choose to discuss.

This suggests that periodicals and newspapers, as the molders of public thought and public opinion, should play a larger part in the education of men and women who will take the lead in public affairs. Not only are the shelves of current literature neglected in our colleges and universities, so far at least as giving them a major part in our curricular activities, but also the high schools of the state, which have in their hands the power to fix current reading habits of the great majority of our future citizens, are doing practically nothing in this direction.

THEATERS

With
BRIAN SPINKS

"FATHER AND SON." Rather unexciting treatment of a sentimental story, with Jack Holt talking hoarsely, Micky McBan piping up at all times, and Dorothy Revier looking wicked. For all that it's better than you would think. My pick of the several shows in town. Don't accuse me of depravity, but lay the blame on the diet. Hancock last times.

"WONDER OF WOMEN." Just another instance of a movie director failing to grasp the full possibilities of a situation and a story that deserve careful and expert attention. Clarence Brown may be a good enough director, but all of his deficiencies are accentuated in the slipshod manner with which he handled this production. Not even Lewis Stone and Peggy Wood can save it. All the material for a good movie is present, but that material is moulded into shape with inept craftsmanship. Peggy Wood compensates her lack of depth of feeling with a smoothness one does not find every time one turns around. Leila Hyams makes a rather fascinating subject for Lewis Stone's affections, but in the talking sequences, she reads her lines with all the panting of a dog who has run ten miles. She has no right to be like that either, for she is really a beautiful creature, having all the necessary embellishments. And it may be said, either to her flattery, or to the flattery of the cameraman, that she is getting more beautiful in every picture she appears in. The story is that of a German composer, with a Bohemian temperament, who wants to become domesticated and isn't sure just how to do it to suit himself. The final sequences, death scene and all, are painfully conventional and show no spark of originality. They do not even have the careful preparation which the story has. This one at the Queen through Wednesday.

"DANGEROUS CURVES." Richard Arlen drags this one out of the muck of mediocrity several times, but not nearly often enough to redeem the burnt-out incandescent, otherwise designated as Clara Bow. Prediction, entre nous: Another fizzle like this and the red-head will be deadlier than Dan McGrew after that historic shooting scrape which he precipitated. La Bow simply fails to get there. She's way down on the same plane with this frightful blonde who gave our nerves a racking in "Broadway Babies." Miss Alice White, I mean, you know. And apparently there is no hope for Clara. We're getting fed up on that particular line, maybe. At any rate, don't expect Clara to do more than usual. Richard Arlen deserves better treatment, for he is a real star in his own right, if there ever was one. His work in Tully's "Beggars of Life" was conclusive proof of that. It was in that picture that he caught the Tully spirit and made a difficult character a living, breathing human. David Newell, who talks and looks so well, keeps his profile turned to the camera all the time. I do not mean that he shouldn't, but there is no need for him to do it so obviously. Just to remind you, Clara starts out by being an equestrienne and ends up by being a tight-rope walker. The circus atmosphere, although it may be surprisingly realistic for a talkie, is too diffused to be effective. Dying stars have to die slowly, and Clara seems determined to make a good job of it. So there. Last times at the Majestic.

"AIR LEGION." Ben Lyon. Marceline Day. All of which is quite enough. At the Texas for one short day.

NEW SHOWS WEDNESDAY
"TWO WEEKS OFF." Comedy with Jack Mulhall and Dorothy Mackaill. Majestic for three days.

"THE RIVER PIRATE." Victor McLaglen. Lois Moran. Nick Stuart. Thriller. Hancock for three days.

"STOLEN LOVE." Featuring Owen Moore and Marceline Day. This is at the Texas for two days.

Mary Margaret Glasscock has returned to the campus from Houston, where she spent last week-end.

'TWO WEEKS OFF' HERE SOON

Dorothy Mackaill and Jack Mulhall have another comedy to their credit. It opens at the Majestic tomorrow. Dorothy reminds one of Joan Crawford somewhat, and Jack reminds one of a Mexican burro in dire distress.

SOCIETY

LEO PUPILS PRESENTED
IN RECITAL TUESDAY

Lota Rae Spell, pupil of Miriam Gordon Landrum, will be presented in a piano recital by the Leo School of Music at 8:15 o'clock Tuesday evening at the Leo studio. Miss Spell will be assisted by Norman Emerson, tenor, and Tom Gullett, baritone, both of whom are pupils of Ralph Leo.

The following program will be given:

Sonata in C Major, Allegro, Andante, Mozart; Now Sleeps the Crimson Petal, Quilter; The Wounded Birch, Gretchaninoff; The Roses Charm the Nightingale, Rimsky-Korsakoff; To a Wild Rose, MacDowell; From an Indian Lodge, MacDowell; Requiem, Homer; Japanese Love Song, Clayton Thomas; Venetian Love Song, Nevin; and Gondoliera, Nevin.

Second piano will be played by Miss Miriam Landrum.

Grace Thomas of the Gamma Phi Beta house spent last week-end in Mart.

Mrs. C. H. Dunlap has returned to Austin from San Antonio, where she visited Sunday and Monday.

Frank Hamby of the Governor's Guard has returned to the campus after the summer encampment at Mineral Wells.

Dorothy Kress, a June graduate of the University, has returned to her home in Austin after an extended visit in Big Springs.

Mrs. J. R. Robbins, director of Kirby Hall, accompanied by Leola Campbell, a former student in the University, is making an overland trip through New Mexico and Arizona as a part of their summer vacation. They expect to be gone for three weeks.

Lucille LaRoe of the Alpha Delta Pi house has returned to the University from San Marcos, where she spent Sunday and Monday.

Jimmie Parke of the Delta Chi house has returned to the campus from Dickinson, where he visited at his home last week-end.

Nelle Dick King of San Antonio, who attended the University last long session, visited friends on the campus Monday.

Elizabeth McGuire and Miss Thelma Dillingham, instructor in physical training for women, left Saturday for Baton Rouge, Louisiana, where they are visiting as guests in Miss McGuire's home.

John Woodruff, a student in the University during the past long session, is with an oil company in Maracaibo, Venezuela this summer, and will not return to the University the coming term.

Woodruff was editor of The Texas Barb the past long session, a member of the Spanish Dramatics Club, and an issue editor on The Daily Texan.

BELL ANNEXES COLORADO TITLE AT DENVER

Texan Flashes Rare Form On Chop Drive

Special to The Summer Texan.

DENVER, Colorado, July 21.—Berkeley Bell of the University of Texas defeated Robert Seller of San Francisco in the final of the Colorado State tournament this afternoon, 6-1, 6-4, 6-4. The match took place at the Denver Country Club.

The Texan was at his best. His chop, for which he is famous, was serving him well. His driving was superb. Throughout, Bell played a conservative game; at the same time flashing the best brand of tennis shown at any time during the tournament.

Bell reached the finals bracket only after a long, hard-fought battle with Julius Seligson, his arch-enemy. The Texan won the Saturday semi-final fray by the scores: 2-6, 6-4, 3-6, 5-7. At one time Seligson was leading, 5 to 4, in the last set, and was about to be acclaimed victor when the umpire called his ball out. Seller won his semi-final match Friday by downing Alan Herrington of Palo Alto, California, 6-4, 6-4, 8-6.

Date for World's Richest Race Set; At Agua Caliente

Special to The Summer Texan.

AGUA CALIENTE, Baja California, Mexico, July 22.—The world's richest race is now the Agua Caliente Handicap, with \$100,000 added by the Agua Caliente Jockey Club, and it will be run over the new course now being constructed at the Baja California resort Sunday, March 23, 1930. The distance will be one mile and a quarter and the subscriptions and starting fees will make the gross value of the race approximately \$140,000.

The announcement was made by James N. Crofton, general manager of the new racing organization.

The Agua Caliente Handicap is the successor to the Coffroth Handicap, which saw its tenth running last March, with Golden Prince winning the rich prize.

Upon the organization of the Agua Caliente Jockey Club it was announced that the "world's richest race" would be called the Bowman Handicap. However, Wirt G. Bowman, who is president of the Jockey Club, declined the honor and stated that he thought the most logical and natural thing to do was to name the race after the playground—Agua Caliente.

Although the conditions of the Agua Caliente Handicap have not as yet been announced, it is probable that Jack Campbell, racing secretary, will make them practically the same as the Coffroth of last year, which also carried an added money value of \$100,000 with the exception possibly that the starting fees will be raised from \$500 to \$1,000.

The history of the Coffroth Handicap, of which the Agua Caliente is to all intents and purposes the successor, is one of romance. Its initial running was in 1917 when Sassini showed the way home and pulled down a total of \$4,000 as the winner's share. The race was not run because of the war, between 1917 and 1921. In 1921 Be Frank won the event and pulled down \$14,775. From that time on, the value increased by leaps and bounds until last March Golden Prince nosed his way home to pull down the rich prize of \$108,900. The winners in other years were: 1922, Mulciber; 1923, Rebuke; 1924, Runstar; 1925, Atherstone; 1926, Carlaris; 1927, Sir Harry; 1928, Crystal Pennant.

SPORTS SHORTS

The R. O. T. C. small bore rifle team of A. & M. College won the championship of the Eighth Corps Area inter-collegiate rifle team championship some time back, with a score of 7,459 out of a possible 8,000 points.

A San Antonio product, Jack Lapham, continues to win honors in the North and East with his polo mounts. His latest successes have been in Connecticut.

The annual dog show of the San Antonio Kennel Club has been set for October 21, 22, and 23 of the current year.

Kid Chocolate, Cuban boxer, will next be seen in action August 14, at Ebbots Field, New York.

Ruth Bailey Wins Western Tourney

Special to The Summer Texan.

CHICAGO, July 22.—Ruth Bailey of Austin, Texas won her seventh consecutive tennis title today, when she took the western women's tennis singles championship from Miss Clara Louise Zinke, of Cincinnati. She won by a decisive score, losing only five out of 17 games.

Tilden Wins From German Champion

Special to The Summer Texan.

BERLIN, July 21.—America captured both remaining singles matches in the inter-zone Davis Cup finals today, and made a clean sweep of five victories and no defeats.

William Tilden, II, defeated Daniel Prehn, national champion of Germany, 6-1, 6-4, 6-1. His teammate, Francis T. Hunter, won from Hans Moldenhauer, 6-3, 1-6, 6-4, 4-6, 6-0. The Yanks lost only four out of 19 sets.

Football Practice Date Set at Tech

Special to The Summer Texan.

LUBBOCK.—The coaching staff at Texas Technological College has announced that football practice for the fall term will begin on the campus September 10. Since Tech is enforcing to the letter all Southwestern Conference rules no first year men will be eligible to attend the camp. Invitations will be issued to all men.

With a sizeable squad of old and some brilliant recruits from the last year's freshman class the best team that ever donned the scarlet and black is expected to be developed. The redoubtable Walker is scheduled to be here for the opening day. Some of the veteran linemen are expected to have their hands full holding their place against some of the stalwarts from last year's freshman aggregation.

James Burgess of Houston visited on the campus last week-end as the guest of his daughter, Margaret.

AQUATIC STAR

Underwood—United
Jane Fauntz, 17-year-old Chicago girl who won national championships in the low springboard diving and 100-yard breast strokes.

League Bureau Announces Rules For Coming Year

Several Changes Recommended at Last Delegate Meeting

Several changes will be included in the new edition of the Constitution and Rules of the University Inter-scholastic League, according to Roy Bedichek, chief of the league bureau.

Some of the changes were recommended to the state executive committee by the last state meeting of delegates. They include raising of the age limit for juniors from 14 to 15 years. The new schedule of ages for the three divisions in League contests will therefore be: Sub-juniors, under 10; juniors 10 to 15; seniors, more than 15 and less than 20. Another change recommended by the last state meeting requires bi-district eliminations in all four divisions in

tennis before contestants may be qualified for the State meet.

Definite provision to be included in the debating rules for disqualifying a team, either member of which exceeds the time limits set forth in the rules, and installation of a high school baseball contest on the same general lines now in force for determining regional championships in Class B football are other changes recommended to the state executive committee.

Two changes originating with the state committee to meet demands from school-members provide for installation of a new contest for county meets in art memory along the lines now in use in determining county contests in music memory and for installation of regional contests in still life in charcoal, still life in color and clay modeling for qualification to the state meet in these events.

Chloe Backstrom has returned to the campus after spending last week-end in Temple.

Ann McFarlen has enrolled in the University summer school for the second term, and is living at Mrs. C. H. Dunlap's.

Faculty Vacationists

By EVELYN CALHOUN

Dr. Clyde Chew Glasscock, professor of Romance languages, after teaching in the first term of summer school, has gone to his home in the Shenandoah Valley, Virginia, for the rest of the summer. Dr. Glasscock has been a professor in the University for six years. He received his degrees from Johns Hopkins University and from the University of Berlin. He is well known in University circles for his interest and researches concerning Miguel Cervantes' Don Quixote and during the spring presented a lecture summing up his study.

Having spent several years in Castille, Spain, Dr. Glasscock acquired a pure Castilian accent. Besides making a prolonged study of Spanish, the professor has also a ready knowledge of French, German, and Latin.
