

October 29, 1968

Mr. Adrian J. Rundle
%Department of Geology
University Park
Nottingham NG 7 2RD
ENGLAND

Dear Mr. Rundle:

Thank you for your letter of 8-10-1968. Your information on the Mevcian Geologist has been used, and I believe our local University will obtain a complete set of this serial. The way things are set up here, it takes a lot of work by faculty members to obtain a good library.

Please accept my thanks for

"The lophophore of the Eocene brachiopod....",
"Molluscs from Holocene peat deposits ...", and
"The occurrence of Upper Liassic otoliths...."

There is a revival of interest in fish otoliths going on now.

With thanks,

Sincerely yours,

H. B. Stenzel
Visiting Professor
Geology
