Dr. Ralph W. Inlay
U. S. Geological Survey
Washington 25, D. C.

Dear Dr. Inlay :

Please accept my thanks for reprints of the following papers which you were so kind to send to me recently:

"Jurassic Formations of Gulf Region"

"Upper Jurassic Ammonites from the Placer de Guadalupe District, Chihuahua, Mexico"

"Evidence for Upper Jurassic Landmass in Eastern Mexico"

Naturally I am particularly interested in those which deal with the Jurassic in Texas, and I find it very gratifying that somebody has taken the trouble to work out this subsurface information into a unit easily understood by those who are not familiar with the subject.

Cordially yours,

H. B. Stenzel, Geologist
