

BOYER

September 26, 1969

Mr. Paul Boyer
Geology Department
Franklin & Marshall College
Lancaster, Pennsylvania 17604

Dear Dr. Boyer:

Thank you for the two separates of your papers on Bivalvia. It is good to see you publish papers, it is one of the best things you can do for yourself and incidentally, for the country as a whole. Just so you don't turn to pure species hack work.

I hope I can have a long visit with you at the coming G.S.A. convention. You are a good man to talk to.

I am still struggling with the left overs of the oyster volume. Ray Moore keeps finding Genus to quibble about. Quibbling is the occupational disease of dedicated editors and must be forgiven in his case.

More and more people are sending me recent oysters for identification. Considering that we lack an extensive oyster library here, that can become quite a chore.

Wishing you the best of luck and success in your new place.

Sincerely yours,

H.B. Stenzel
Visiting Professor of Geology
