Dr. H. B. Stenzel,
Bureau of Economic Geology,
University of Texas,
Austin, Texas.

Dear Dr. Stenzel:

Thanks for your letter of July 22, concerning my AAPG application. I think the Gulf R. & D. Co. is a very excellent outfit--with regard to Pittsburgh I'll let you know later.

At the time of the Denver AAPG meeting you inquired about dielectric separation apparatus and I believe I sent you the wiring diagram, etc. on an outfit that we had built. You seemed to feel that such apparatus would be quite valuable in separating microfossils. I wonder if you would give me the benefit of your experiences if you have attempted to separate microfossils by this method.

Sincerely yours,

A handwritten signature in cursive script, reading "Duncan McConnell", with a long horizontal flourish extending to the right.
