

Eagle Lake, Texas

June 19, 1934

Dear Herr Doktor:

I imagine you are surprised to hear from me but this letter is being written for two reasons, one is that I want to keep in touch with you and get your address and the other is that I would appreciate it greatly if you would let me know of any work that might turn up around there in your department. So far this summer I have not been able to get work but I am still trying. There are several geophysical crews here now and I may be able to get on with one of them before the summer is over but there is nothing definite as yet.

Dr. Francis was through here this morning and stopped to see those mastodon teeth I gave you. I wrote him about them last summer and this is the first opportunity he has had to come by to see them. I told him they were in the department at school so he will look at them when he goes back. Dr. Francis was on his way to Columbus to see Mr. Zumwalt there about some other vertebrate fossils that have been found there recently.

If you can use me in any way in this section don't hesitate to call on me for so far I have had time hanging on my hands. I have been wanting to make a trip over to that gravel bluff at Columbus but so far have not had the opportunity.

I hope your wife and new baby girl are doing nicely and I hope also that you are satisfactorily settled.

Sincerely yours

Mont Calvert Jr.

P.S.-Pardon the greeting, I felt in a playful mood.

MGC
