Professor Mitsuo Nakano  
Institute of Geology and Mineralogy  
Faculty of Science, Hiroshima University  
Hiroshima, Japan

Dear Professor Nakano:

Thank you very much for sending me copies of your various interesting papers. They make a valuable addition to my reference library.

I am now engaged in an intensive study of the Ostreidae, living and fossil, and am trying to obtain copies of the Japanese literature concerning this family. Would you know how I could obtain a copy of: Yokoyama, Matajiro, 1920, Fossils from the Miura Peninsula...: Imperial University of Tokyo, Journal of the College of Sciences, vol. 36, no. 6, pp. 1-198, pls. 1-20. In this paper Ostrea musashiana is described, which is one of the species I am interested in. Is Professor Yokoyama still living? If so, what is his address?

With many thanks

Sincerely yours,

H. B. Stenzel
