

1029 E 18

Tulsa, Oklahoma  
April 23, 1946.

Dear Dr. Stenzel;

I am leaving for Texas tonight by train. I am going to Beaumont to try and speed things up on the delivery of a new car for myself. I am anxious to consult with you while I am in Texas this time, and will appreciate being able to have a few hours of your time either in Austin or wherever you might be in the field. I am planning to call Mrs. Plummer Thursday evening, and I have asked her to contact you to find out if you will be available in Austin Friday or Saturday of this week. If you will not be in Austin at that time I would appreciate you leaving word either with Mrs. Plummer or to my address in Beaumont as to where and when I may contact you.

I feel that my commitment to Stanolind and Dr. Murray for geological work in Utah this summer will have to be fulfilled even though I will have to leave my family in Tulsa. I have given them my word that I would go West for them this summer, and do not feel that I should go back on my word even though I had rather be doing field work in Texas. I am very sorry that things are working out this way for this summer, and regret sincerely the loss of this opportunity to spend three months under your supervision.

Thanks for the information about the type locality of the Weches, and the foram artist in California. In regard to the latter, Mrs. Plummer has contacted a Mrs. Martin in Austin who is going to do the illustrations for me with Mrs. Plummer's supervision.

Sincerely yours---

Beaumont address
