Florence, Feb. 3rd, 1949.

Dear Miss Kober: I must apologize for my lateness in thanking you most heartily for the valuable drafts of B tablets. I felt awfully sorry that you had already left England when I went there last Autumn for a one month's stay. Sir John Myres has favored me with Evans' transcription of the texts Ag01=K600 and Ag02=K601; the former differs from yours in that that you transcribe the second word of the "Nebenrubrik" as A≠ while Evans gives A≠ in both cases. Please let me know why you did transcribe in that way, because this is utmost important for a paper which I have nearly finished. Forgive me for the trouble I am giving you hereby and please accept once again my very best thanks.

Yours as ever,

Emilio Peruzzi
