

INJURY TO LEISSNER MARS OPENING GAME WHICH BRUINS TAKE

Longhorn Captain Slated to Play Center Field
Field Today—Lyons Holds Dischmen
in Check Easily

Billy Disch's fighting Longhorns dropped the first game of the closing series with Baylor yesterday afternoon, 6-2. The game was marred by the injury of Captain "Rube" Leissner by a thrown ball from Allen in the seventh.

Covington was on first and went down to second. Allen signalled for a peg to catch the runner, but the ball struck Leissner in the back of the head as he turned to watch the play, knocking him unconscious. He soon revived and was reported resting easy last night. He will play center field in today's game.

Teddy Lyons, Baylor's own Teddy, was a real meat eating Bear yesterday and seemed to have little trouble in fooling the Longhorn batters. In only one inning was he in trouble. In the fourth "Red" Carson picked one to his liking and shot it over the rightfield wall for a home run. After Eckhardt had struck out, Odom got a single into center and Sledge scored him with a double into the same territory. Even in this inning, Lyons was good, getting all three of the outs via the strike out route.

The Bears started early on Leissner, scoring two runs in the first on a walk, a single and a triple. Leissner was wild, getting the count to three balls and two strikes on almost every batter. However, he kept them from scoring until the fourth when a walk, a sacrifice and a single counted one more run.

One of the bright spots of the game, from the Longhorn standpoint, was the work of Clements after he relieved Leissner in the seventh. He struck out both Williamson and Strickland in this inning and allowed only one hit the next.

Big Oscar Eckhardt will oppose Jake Freeze in the game today. The Co-op will broadcast reports of the game as they did the one yesterday.

How It Came by Radio

First Inning
Texas: Kibbie grounded to short and was thrown out at first. King went out, third to first. Smalley singled to left field. Carson up. Smalley caught off first. No runs, one hit, no errors.

Baylor: Roach popped up to Odom. Covington drew a pass. Lyons singled to center field, Covington being held at second. Strickland came through with a triple, scoring Covington and Lyons. Williamson hit to first base and Carson doubled Strickland at the plate. Two runs, two hits, two errors.

Second Inning
Texas: Carson hit a single into right. Eckhardt got a Texas Leaguer into left. Odom struck out. Sledge sacrificed, Carson and Eckhardt moving up one base each. Leissner struck out. No runs, two hits, no errors.

Baylor: Collier popped to Odom. Conally grounded to Leissner, who got him at first. Gore grounded out to first. No runs, no hits, no errors.

Third Inning
Texas: Allen lifted one to left field. Kibbie flew out to right. King struck out. No runs, no hits, no errors.

Baylor: Pittman went out, Odom to Carson. Roach singled into left. Leissner seemed to be wild; he usually got three balls on each batter. Covington popped to Smalley. Lyons flew out to center. No runs, one hit, one error.

Fourth Inning
Texas: Smalley struck out. Carson hit a home run over the right-field wall. Eckhardt struck out. Odom singled into center. Sledge placed a double into center and Odom scored. Leissner struck out. Two runs, three hits, no errors.

Baylor: Strickland got a base on balls. Williamson sacrificed Strickland to second. Collier singled into left-center and Strickland scored. Collier was caught at second when he over-slid the bag. Conally grounded out, second to first. One run, one hit, no errors.

Fifth Inning
Texas: Allen popped to Collier. Kibbie tripled into center field. King grounded out to first. Smalley struck out. No runs, one hit, no errors.

Baylor: Gore walked. Pittman struck out. Roach singled into cen-

AUSTIN MAN GIVES FINANCIAL AID TO PROPOSED MAGAZINE

William P. Gaines Declares
That Individuality Will Be
Aim of Publication

Austin will be the home of a new literary magazine, according to William P. Gaines of Austin who has secured financial backing of the publication. "Sane, individuality is to be the aim of the magazine," declared Gaines in a personal interview. "It will not be modeled after any present magazine, but will serve as a model for future publications," he continued.

Besides Gaines there have been Stanley E. Babb of Galveston, Paul DeWitt Page of Bastrop, William J. Alexander of Caldwell, Howard Stanley Aronson of Dallas, and J. L. Gay of Santa Anna who have been working to organize a magazine of the southwest that will publish sane, literary material. These men have been working for the past eight or ten months in the organization, and they propose to bring out the first issue not later than October first.

All editing of the magazine will be done in Austin, but the place of publication is not settled yet. Bids for publication are being considered at the present time. Three thousand copies will be run off the first time, and arrangements have been made with a national distributing agency to distribute copies throughout the United States.

Harrington Declares That Progress of Civilization Is Due To Work of Engineers

"Civilization in any country is in direct proportion to the advancement of its engineers," declared John Lyle Harrington, consulting engineer of Kansas City, before an audience of engineers at the Methodist Church last night. "Engineering must precede civilization," continued the nationally known speaker, "but today too many engineers have only technical knowledge. They must broaden out, take on a general education; then it will be their duty to take charge of and straighten out the flaws in our political systems."

Mr. Harrington who, besides being consulting engineer for Kansas City, is the president of the American Society of Mechanical Engineers. He was introduced to those present by Dean T. U. Taylor of the Department of Engineering. The subject of the talk was "The Part of the Engineer in the Advance of Civilization."

Speaks Scientifically

Talking in a firm, conversational tone, Mr. Harrington took up the history of engineering and showed how the intellectual and scientific mind of the engineer has made great changes possible in the world. It was the engineer who invented methods of controlling and trans-

POLLARD QUILTS JOB AS BUSINESS MANAGER OF VARSITY PUBLICATIONS

Texas Senator Plans to Begin
Practice of Law in
September

TOMAS G. POLLARD

CALL FOR APPLICATIONS

Persons desiring to apply for the position of supervising business manager of The Texas Students' Publications for the session of 1923-24 may file their applications with Prof. J. W. Calhoun, secretary of the board of directors of the publications, or leave the application at The Texan office.

All applications for this position should be made as soon as possible. The board prefers to receive the applications today.

Resignation of Tomas G. Pollard as supervising business manager of the Texas Students Publications, Inc., for the session of 1923-24 was accepted by the board of directors Monday afternoon. Mr. Pollard was recently elected by the board to serve at an increased salary as its supervising business manager during next year, but his resignation was tendered in order that he might carry out his plans to enter the practice of law. He will continue in his present position until the end of the fiscal year for the publications, August 31, 1923.

Mr. Pollard, who received his Bachelor of Arts degree from the University in 1920 and Bachelor of Law degree in 1922, has been supervising business manager of the publications during the past two years. During this time the publications corporation, which publishes The

(Continued on page 4)

With many awards given, and many thrills running up and down the spines of co-eds and gym staff, the annual "T" night was held at the Woman's Gym Monday night. Special awards were given to girls getting special merit in different sports.

In archery, the gold target was given to Laura Thompson, the gold arrow to Eugenia Smith, and the silver arrow to Hiawatha "Wassy" Crosslin. The silver loving cup given by Ruby K. Daniel of Dallas went to Polly Norton, who has piled up the largest number of points. The gold turtle given by Turtle Club went to Eugenia Dilworth, while silver ones went to Lloyd Martin, Eugenia Smith, Etta Gilbert, Ann Elizabeth Hall.

Harriette Brush received the gold racquet for winning the tennis tournament, and a silver racquet was awarded to Virginia Mantor runner-up.

Patty Sue the Second, tiny daughter of Mr. and Mrs. George Henry was adopted as official mascot of W. A. A., and given her first little "T." Mary McKay received a ring given her by the hikers, of whom she is manager.

The meeting began with a short playlet "Pierrot and Pierrette and the Maker of Dreams," in which Miss Josephine Schmid, Gertrude Rath, and Miriam Brown had parts. This was followed by the conversation of two portraits, one of the old-fashioned lady-like girl, and the other of the 1923 Texas athletic co-ed, introducing Lloyd Martin, who made the awards, assisted by Miss Anna Hiss.

Thisba Worley received both blanket and sweater, the sweater bearing two stripes, showing that she has made an extra award. She won her "T," blanket and sweater in two years of athletic work, and made over 1000 points in one year, which is the record for fast work. "Wassie" Crosslin received her letter in one term's work, having only entered school at the beginning of the spring term.

The girls making the blankets were: Mina Bennett, Harriette Brush, Billy Louise Clark, Beatrice Lytle, Mary McKay, Laura Thomson, Lucile Traylor and Thisba Worley.

Those receiving sweaters were: Doris Cook, Mildred Goff, Annie

OFFICERS ELECTED BY SPANISH ASSOCIATION

By Ray E. Lee

Election of officers was recently held by the Texas chapter of the American Association of Spanish teachers, as follows: Miss Lillian Wester, president; Mr. C. M. Montgomery, vice president; Miss Sue Bunsen, secretary and treasurer; and Mr. J. R. Spell, corresponding secretary.

Four-Hour Examination In Major Subject Set For Degree Candidates

Points Based on Grades Made During Scholastic
Career Will Determine Honors Awarded at
Commencement to Graduates

Beginning with the next long session a system of "negative hours" will be installed in all departments of the University, according to announcements made after the general faculty meeting yesterday afternoon. This action is in line with action taken by many of the large schools of the country. A similar system has been in effect in the Law School during the present school year.

The essential changes under the new ruling will be that no more excuses for absences will be accepted; no temporary withdrawals will be granted; students are to be on an "hour" system and must have credit for a certain number of hours to remain in school. Exception is made in the case of students absent from school on account of approved student activities in that, through a petition approved by the Dean, these students may pool their allowance of cuts for the whole year. An allowance of one and a half negative hours is made for each course each term.

The amendment to the catalogue dealing specifically with the new system follows:

An absence occurring the two working days before or the two working days after a holiday counts as two absences except in those cases where transfers of absence allowances are made from one term to another.

A tardiness may be reported as an absence whenever the instructor deems such action proper.

Absences due to late registration are recorded on the current record card of the students at registration and on the instructors' class reports, such absences counting as though the student had registered at the beginning of the term and had been reported absent weekly in the usual way.

No ExcuseforAbsences

No excuse for absences are accepted and on leaves of absences or temporary withdrawals are granted, exceptions being made of the term or mid-term examinations, for which see "Examinations."

Errors in the record of the absences of a student may be corrected in writing by the instructor concerned, provided corrections are made promptly.

Loss of Credit Hours

The total course credits of a student measured in "hours," 90 hours per full course. (See requirements for Degree), are reduced one hour (negative credit) for each absence. A class missed is a class lost so far as credit hours are concerned, except (a) that before incurring a negative credit an allowance is made of

A. B. WOLFE RESIGNS TO GO TO OHIO STATE University Professor Will Take Chair of Economics at Northern School

Dr. A. B. Wolfe, who has been professor of economics and sociology of the University since the fall of 1914, has accepted a similar position on the faculty of the University of Ohio. Dr. Wolfe stated that he has not yet submitted his resignation, but this formality will be carried out in due time.

Dr. Wolfe received his bachelor of arts degree from Harvard in 1902; his master of arts degree from the graduate school of that institution in 1904 and his doctor's degree in 1905. He is the author of numerous pamphlets, articles and one book.

PERKINS HEADS B. HALL

By R. E. McNatt

Clarence W. Perkins of Alice was elected president of the B. Hall Association for next year at the last meeting for the year last night. Other officers elected were as follows: George R. Hefley of Cameron, vice-president; Wilfred Philip Capps of Fort Worth, secretary treasurer; and Lloyd Kirk of Portland, sergeant-at-arms.

REED MUSIC SOCIETY

By Harry E. Moore

Reed Music Society will hold an open meeting Wednesday afternoon in the Girls' Study Hall to which the public is invited.

Dr. G. W. Cunningham Is Chosen Research Lecturer

Announcement has just been made of the selection of Dr. G. W. Cunningham, professor of philosophy at the University, as research lecturer in the University during the 1923-24 session. He will be released from instructing work, and will spend his time in the preparation of a series of lectures, to be delivered during the spring term of the next session.

The research lectureship was established a year ago by the University, and Dr. M. B. Porter, professor of mathematics, was chosen by the graduate council as the first research lecturer.

In announcing the appointment for next year, Dr. H. W. Harper, chairman of the graduate council, said: "In an effort to secure data to guide the graduate council in its selection of a suitable person to whom the award of research lecturer for

the 1923-24 session should be made, the council was gratified to find that at present in the social science group of the University the growth of research both in spirit and performance is manifest, and that its quality is of a highly respectable character. Its most urgent need is a relief from the great demand of teaching undergraduate students, so that qualified men may devote more of their time to this valuable field of work, in reality of permanent importance, if the University is ever to become a real university. A great deal of time was needed by the committee of the council to examine carefully the large number of publications of the social science staff, and because of numerous and valuable contributions in this field, the graduate council found the task of selection a very difficult one, and only reached a conclusion recently."

Editorials

WHY THE PROFESSIONAL FRATERNITY?

With this issue of The Daily Texan, the product of prospective members of a professional organization, comes the oft-recurring thought as to why such honorary and professional organizations exist and what, if any is the excuse for their existence.

The charge is frequently made that the University is over-organized—that any individual who wishes to join something can usually find something to join with a high sounding Greek letter name attached. The truth or falsity of this charge may depend upon the perspective of the individual making the charge and upon the phase of University life with which he comes most intimately in contact. Should one have the time and inclination to catalogue the honorary and professional organizations which exist upon the campus, the length of the list might be somewhat startling. But he should remember that there are some four thousand members of the student community and that among these four thousand individuals there are all temperaments, all types of mind, and all sorts of talent for which there must be outlet.

There is no defense for the "professional joiner"—the man whose ambition is to have more letters after his name in the yearbook than his neighbor—and in this discussion no brief is held for him. Neither is there excuse for the propagation of an organization the purpose of which is to get a charter and then say "We are the best and we admit it. Wouldn't you like to get in?" But it is not of the professional joiner or worthless, superficial organization that we are speaking.

The type of honorary or professional organization, be it designated by Greek letters or English, is the one which is driving toward some definite end, which is bettering its members themselves, and which is doing something tangible for the upbuilding of the profession represented and for the University at large. If it cannot justly claim for itself one or more of these characteristics, then reason for its continuation may well be doubted.

The periodic getting together of men and women vitally interested in the same field of endeavor and the working of these individuals toward the sharpening of their professional powers is highly laudable and is worthy of the students' best efforts. Organizations without the proper incentive soon die of their own weight. Concrete proof of this statement is available on every hand and examples which have occurred within the year might be mentioned.

Let the work of the professional organizer and the professional joiner be strongly condemned but let there be no condemnation of the sincere professional fraternity which has the proper basis upon which to operate and

which yields a benefit to its members or to the student community as a whole. On the contrary, praise and encouragement should be theirs.

—B.M.

HAPPINESS

When you are ignorant, you think how happy you would be if you had an education. When you get an education, you look longingly back at the happy days when you didn't know anything. No one can give you a sure formula for that phantom called happiness. Man has rapidly—in only a few million years—acquired great skill in his search for it. He will hate for it. He will fall in love, and then as rapidly fall out again. In his eagerness for happiness, he will run in debt; then, for the same reason, he will run away from the debt. If he is still, he thinks he will be happy walking. If he is walking, he thinks he will be happy still.

We are often deceived by happiness. We are allured to do things for a short happiness that may bring a life of misery. The young co-ed will go into the cold night air, wearing a sleeveless and low-necked dress in order that she may gain happiness by looking pretty—any woman is happy if she thinks she looks pretty, whether she does or not—but by so doing, she may lose her health. Pain and misery are the rewards. Man may smoke or drink because it gives him temporary pleasure, but the end is usually unhappiness for himself and for all around him.

Wealth and education are not essential to happiness. The best way to insure happiness is to adapt yourself to your environment. Be one of those with whom you associate. Have a warm, cheerful heart for all. Be unselfish and feel that you are of use to your friends and to the world. You cannot be happy all the time, for it is like a mountain highway: it rises, then falls. It is intermittent: it ceases, then comes again. But this lowering and ebbing away of happiness is essential. The lower it falls, the higher it may rise, and no one can remain happy all the time. You cannot obtain happiness by searching for it. It comes from the inner man. Be friendly to everyone; do your work well; do not risk bringing upon yourself much misery for a short happiness; feel that you are of use to the world, and you will be happy if anything will make you so.

—R.E.M.

Opinions of Others

CUTTING THE RED TAPE (University of Nevada)

And now we hear that Princeton is adopting in part at least, the European plan and, beginning next year, will cut away the red tape that encumbers the American student.

This is a step in the right direction. The longer one considers our system the more impossible it seems. Why should people be driven from class to class, from lecture to lecture, with the threat of negative credits and the "awful" possibility of not being allowed to make the "honor roll"?

Is it not the purpose of a college man or woman to acquire an education? There is a very small minority attending college merely because it is the proper thing to be able to say that they are college people. But this small minority are the parasites, the pin-wearers and the "gold-brickers." They are a detriment to any university and should be eliminated as soon as they begin to show the well-known symptoms.

The greater part of the university people, on the other hand, are here for a serious purpose. They go about their business quietly and industriously, attempting to acquire as much knowledge as possible. To them it is a business proposition. They are investing their money in an education that they hope will pay dividends after their graduation and they are aware that to make certain these dividends they must work, not loaf.

And yet the fact that these people far outnumber the drones is not taken into consideration by the authorities. An endless number of petty laws, fit only for a high school, clutter and slow up the progress of coaxing and babying and driving the ungrateful minor-

ity through a college course that they had no right, in the first place, to embark upon.

As a result the real students find his every move hedged in with rules and regulations that annoy and hinder progress. Yes, it is a healthy sign to see at least one American university willing to adopt the continental system.

ALL GIRLS who have been to Estes Park Y. W. C. A. summer conference at some time are asked to meet Miss Budd in the Y. W. C. A. office at four-thirty Monday.

STUDENTS expecting to enter the School of Medicine at Galveston this fall who have not already filled out an application blank at the registrar's office should do so this week.

E. J. MATHEWS,
Registrar.

THE SWIMMING classes meet regularly at Deep Eddy this week. Since the classes meet just once a week, 20 points will be deducted from the grade for every absence. Any girls who have taken any cuts, are advised to get a make-up card in the council room in the balcony of the Woman's Gymnasium and

make-up the class period either with a swim or a five mile hike.

MISS ANNA HISS.

ALL STUDENTS planning to attend the first term of summer school must have their record of work booklet in registering. Those who have turned them in should call and get them not later than Wednesday, June 6. Students not expecting to attend the first term of summer school will please leave their booklets at the office this week or next.

E. J. MATHEWS,

Registrar.

SPEAKERS GO TO HIGH SCHOOLS FOR CLOSING

University Teachers Will Talk at Commencement Exercises

In accordance with the usual custom, members of the University faculty are being called upon to make high school commencement addresses in various towns of the State. Arrangements for these speakers are under the general direction of the Bureau of Extension.

Dr. J. E. Pearce, associate professor of Anthropology, delivered an address at Mercedes on May 17 and one at Falfurrias on May 18. On May 18, addresses were also made by Dr. F. L. Jewett of the Texas Bible Chair at Alvin, by Dr. J. B. Wharey of the department of English at Eastland and by E. C. Webb, Director of the Wesley Bible Chair, at Coleman. J. Frank Dobie of the Department of English will speak in Hondo on May 22 and in Sonora, May 25. Dr. M. B. Porter, professor of pure mathematics, will speak at the Runge commencement exercises on May 29. Dr. Frederick Eby, professor of the history of education, will go to Cisco to deliver the

commencement address on May 29, and in El Paso on May 31. Homer T. Fort, student pastor of the University Methodist Church, will speak in Milford on June 1.

T. H. Shelby, director of the Bureau of Extension, has the following list of engagements: Cristoval, May 21; Santa Anna, May 22; Liberty Hill, May 25; Henderson, May 28 and Gainesville May 31.

BELL AND RIBBINK GO ON INDUSTRIAL TRIP

Dean Spurgeon Bell and Professor A. H. Ribbink of the School of Business Administration will leave Monday for a week's tour of the state's industries to try to find positions for next year's co-ordinating students. According to the dean there are about two dozen out of this year's junior class who have applied for these co-ordinating jobs instead of going directly into their senior year.

Next fall will be the first time this system of co-ordinating will be given at the University, although it has proved successful at various eastern colleges, notably Cincinnati and Harvard. Only students with at least a C average in their work will be given co-ordinating work.

SPECIAL HANDBOOK IS COMPILED BY Y.W.C.A.

In order to acquaint freshmen of the University with the various campus activities, organizations, traditions and customs, the Young Women's Christian Association is now compiling a small handbook which will be mailed to prospective students before the opening of the fall term of the 1923-24 session. The book will include a map of the campus and other information intended to facilitate the efforts of the new students in fitting themselves into the scheme of the University life and work.

SOCIETY

RICHARD E. M'NATT, Society Editor

Glee Club Banquet

The Glee Club entertained with its annual banquet and dance at the Country Club Saturday night.

The dining room was beautifully decorated in orange and white and with baskets of spring flowers. The place cards at the five tables were clever caricatures of each guest drawn by Julian Brazelton, official artist of the organization. Clever four-page programs combining the menu and dance program were at each place. The toastmaster was J. P. Watson who throughout the evening called on the various members for funny incidents they experienced on Glee Club tours. The members of the club were presented with the new T and lyre pin which has been adopted by the organization. Lester Brenizer director of the club, presented each member with a sterling silver belt buckle in appreciation of the splendid cooperation given by them on both tours of the season. The members of the club also presented Mr. Brenizer with a satin lounging robe as a token of their appreciation of his efforts toward making their organization a success.

Members of the club present were: A. R. McTee, R. A. Hittson, Ben S. Woodhead, B. E. Bailey, J. C. White, Theodore Corcanges, William Camp, Chester Wright, Antom Berkman, Mack Rust, Tom Campe. Brazelton, L. Dribell, J. Donnan, Walter Gohmert, Glen Wilson, J. Graves, Clel Silvey, George Butte, Joe Cannon, Louis Dunbar, R. P. Orlebek, John Gill, C. C. Morrison, Thurman Kinder, J. P. Watson, Lester Brenizer; patronesses, Mmes. Clarence Test, Katherine R. Peeples, Ida Barr and J. T. Stockton.

Newman Club Dance

Members of the Newman Club entertained its eleven seniors with a dance at Newman Hall Saturday, May 19 from 9 to 12. The music was furnished by the Prowlers.

The hall was decorated with ferns and with beautiful gladiolas which were sent, with the compliments of A. L. Hardin Co. to the Newman Club. The dances on the programs were named in honor of each senior. James Tips, the only senior boy, led the grand march.

The Andrew Carothers chapter of D. A. R. entertained the senior members of their organization Saturday afternoon with a picnic at Pease Park. The hostesses were Mrs. Thomas Curry, Dr. M. E. Roe and Miss Louisa Roe. Honor guests were Misses Dorothy Burr, Katherine Fischer, Vivienne Howell, Carriella Bell, Mary Larkin and Mary Bob Taylor, each of whom were presented with a corsage bouquet of sweet peas.

Mrs. L. G. Warner of Dallas who has been visiting her daughter, Hortense, at the Gamma Phi Beta house, returned home yesterday.

Larry and Nelle Morris have returned to their home in Houston after spending Sunday with their sister, Mildred, at the Alpha Phi house.

Miss Lillian Wester left Monday night to attend the meeting of the Texas Woman's Press Association at Waco. She will speak Wednesday on her experiences as diplomatic reporter in Mexico City.

Pi Kappa Alpha announces the pledging of Julian Barton of Corsicana.

Susan Moore has been called to her home in Waco on account of the death of her father.

Lester Brenizer will leave soon for Spain, from where he will go for a tour of Europe studying romance languages and voice culture.

Mu Phi Epsilon gave a complimentary musical program Sunday afternoon at the Altenheim home.

Esther Wilson has returned from Waco where she spent the week-end.

Gertrude Mae McFadden of Baylor is spending the week-end with friends from Port Arthur.

Mrs. Ned Morris of Houston, who has been the guest of her daughter, Mildred, at the Alpha Phi house has returned to her home.

The members of the Sunday Club spent Friday and Saturday at Mr. Pearce's club house on Lake Austin.

Lorraine Kerr and Blanche Rat-Cliff visited in San Marcos over the week-end.

Dorothy Arnold is spending the week-end at her home in San Marcos.

Daisy Martin is spending the week-end at her home in West.

Sibyl McKee of Sanderson is visiting her sister Meryl.

Mrs. Mary Etta Dodd has returned from a visit in San Antonio.

Sidney Lanier held its annual picnic Thursday afternoon at Pease Park. Several new members were initiated.

Bill Murphree has gone to Waco.

Lorraine Robertson is spending the week-end at her home in Lockhart.

THEATRES

CALENDAR

Hancock: Jonny Hines in "Sure Fire Flint."

Majestic: Betty Compson in "The Rustle of Silk," and Einstein's theory of relativity.

Crescent: Jane Novak in Marie Carelli's "Thelma."

Queen: Milton Sills in "What a Wife Learned." Also new Christie comedy "The Kickout."

Texas: Anita Stewart in "The Woman He Married." Also Fables and Topics.

Majestic

Theatregoers will see an unusual picture this week on the Majestic screen when Edmund Miles Fadman presents the Einstein theory of relativity in a Premier Production opening tomorrow and continuing through Wednesday. On the same bills is the Paramount feature, "The Rustle of Silk," with Betty Compson and Conway Tearle in the cast.

Stars can peep around corners and make scientists believe they are really somewhere else, according to Professor Albert Einstein, noted European scientist. They may be hidden behind the sun and, when they send out their rays, the sun's influence turns them from their course and helps them reach the earth in a way they never could otherwise.

Just why and how the star rays turn corners, why bullets fly in wide arcs and fall back upon the spot from which they were fired, why time is affected by the speed of planets, why rays of light are not affected by gravity—these are some of the many phases of the Einstein theory of relativity which are demonstrated in the film which will be shown at the Majestic beginning Monday.

Hancock

"Sure Fire Flint" is the title of the latest Mastodon Films, Inc., production which will be shown at the Hancock Opera House. And "Sure Fire" Johnny Hines plays the title role in the picture. He is

Corner 8th

the man who goes after what he wants and gets it and the entire picture is devoted to his "sure fire" tactics. Supporting Hines are Doris Kenyon, Edmund Breese, Robert Edeson, Effie Shannon, J. Barney Sherry and Charles Gerrard.

Johnny Hines is at his best in this production for the action carries the clever screen comedian into no end of amusing situations that bring gales of laughter from the audience. "Sure Fire Flint" starts out with a punch when Flint is born on the Glorious Fourth and successfully keeps up the high tension throughout the performance. The audience is kept on edge throughout the full six reels, for coincident with the clean comedy vein the plot is rich in melodramatic moments, which, by the way, gives Doris Kenyon, Edmund Breese, Robert Edgeson and Charles Gerrard opportunities to portray some of the finest acting we have seen in this city in some time.

Texas

Pretty Anita Stewart is playing the leading part in "The Woman He Married" which is showing at the Texas today. The story has subtle comedy, plenty of human interest touches, a good vein of romance and strong dramatic situations; and the end is somewhat different from the usual smile-embrace-kiss finale.

Beginning tomorrow, Jack Holt will play in "While Satan Sleeps" a picture which the critics declare to be one of the strongest plays in which this popular actor has ever appeared.

Queen

Milton Sills and Marguerite de la Motte are playing together in "What a Wife Learned," showing at the Queen today for the last time. And this is a good picture. It is not a preachment—not a sex picture—just real entertainment. It is a swift panorama of east and west, a picture of a rough westerner and a polished easterner, of a primitive husband and modern wife.

A new Christie comedy, "The Kickout," is an added feature.

RECITAL THURSDAY

Mrs. Rebecca Young Schofield will present Bernice Bell in recital Thursday evening at 8:15. Miss Bell will read a four act play, "The Two Virtues," by Alfred Sutro. Miss Bell is a junior in the University and has been a student in expression for several years.

A Booth Tarkington farce at Gregg House—tonight.

Intramural Swimming Meet Closes Season's Departmental Bill

Intramural swimming will be the card at Deep Eddy Wednesday afternoon.

Swimming is the last of the inter-departmental sports to be held and cannot change the standing of departments as announced last week. However, the meet promises to be fast, as Ragland of the journalists and Prather of the Academics will both take part. These two lads are as good in their respective lines as may easily be found.

CLASSIFIEDS

FOR RENT—Furnished apartment, two large rooms, sink and gas connections in kitchen, adjoining bath. Also south bedroom. 2503 Nueces.

NEWMAN CLUB ELECTS NEW OFFICERS SUNDAY

Members of the Newman Club devoted the last meeting of the year of 1922-23, which was held Sunday, May 20, to the election of officers for the coming year. The following were chosen: Roger Peters of Austin, president; Carol McKeever of Austin, vice-president; Frances Ethel Wipff of Eagle Pass, secretary; Richard E. Tannich of Weimar, treasurer; Mildred Beaty of Waco, historian and Jane Drummond of Pecos, reporter.

At this meeting, James Tips of San Antonio was awarded a ring bearing the Texas seal for giving the best program before the Newman Club members during the spring term.

Ask those who were there before—"the trysting place" is a scream.

CUT PROPOSED IN 135 ACRE CAMPUS ADDITION

Measure Would Limit Purchases to Property Immediately East of Campus

A bill, designed to curtail the purchase of some of the land included in the proposed 175-acre addition to the campus, was introduced into the House of Representatives yesterday. The new proposal provides that only property lying between Twenty-first and Twenty-fourth Streets, east of the campus as far as Red River Street, may be bought. Passage of this measure would cut the purchase by about 60 acres, and necessitate the sale of some property already bought.

It is expected at the capitol that the entire University appropriation measure will be introduced today for reconsideration.

HARRINGTON

(Continued from page 1)

porting power, he said; and electricity, which may be made from water power, was of no use until the engineer's mind went to work and made it possible to direct this power to where it is needed.

Especially did Mr. Harrington urge young engineers to get a general education and not develop their technical knowledge alone. Saying that this broadening out should begin in school. It is a universal desire of young men just entering engineering schools to want to neglect certain academic subjects, Harrington said, but he especially advised against such a method.

"To show you what the scientific mind of the engineer can do," explained Mr. Harrington, "I visited a plant the other day where all the little parts of watches were piled together. The machine was then started, and when the pieces came out on the other side, they had been picked up and made into a delicate watch, all without the touch of a human hand."

Intellectual advancement in a country is made possible by the engineer, according to Mr. Harrington, because he invents power-saving machines which do the work of man and give him a chance to study and advance. Delicate inventions and scientific researches on the part of engineers, he pointed out, have also made it possible for physicians to increase the average life fifteen years over what it was a few years ago.

Last night's lecture was the first of a series that Mr. Harrington will give to the students and faculty of the University and to the public at large. He will speak tonight at 8 o'clock in the Methodist Church on "The Relation of the Engineer to the Future of America's Development."

Wednesday night at 8 o'clock he will give an illustrated lecture in the Y. M. C. A. auditorium on "movable bridges." Thursday afternoon at 4 o'clock he will give another illustrated lecture in the Y. M. C. A. His subject Thursday afternoon will be "Designs of Industrial Plants." Thursday night at 8 o'clock he will give his final message on "After Graduation, What?"

POLLARD QUILTS JOB

(Continued from page 1)

Texas, The Cactus and The Longhorn, has been launched and placed on a sound basis. Prior to appointment to his present position, he served as business manager of The Longhorn for two years.

Mr. Pollard has served two terms in the House of Representatives and is at present a member of the State Senate.

In accepting Mr. Pollard's resignation as business manager for next year, the board expressed regret at his action, and also appreciation of his commendable and valuable service during the past two years.

Y.M.C.A. PLEDGES ARE NOW BEING COLLECTED

More than \$2,000 was pledged during the current session of the University by students for the Young Women's Christian Association. These pledges are now being collected, and it is expected that the whole amount will be in before June 1. Finances of the University Y. W. C. A. are managed on the budget plan, and call for \$7,000 annually to meet the needs of the organization.

See "the trying place"—Gregg House tonight.

INTRAMURAL WINNERS TO BE PHOTOGRAPHED

Pictures Will Be Taken Friday Afternoon at Men's Gymnasium

Berry Whitaker asks that all intramural and inter-fraternity teams that have not had official pictures made report to the Men's Gym, Twenty-first and Speedway, for that purpose Friday afternoon at 4 p. m.

These pictures are for the official records and will be preserved along with pictures of all championship teams. Whitaker announces that he wishes the following teams to report: Law and Delta Sigma Phi baseball teams; Engineer and Sigma Chi track teams; Law tennis team; Delta Tau Delta and Sigma Chi swimming teams.

Pictures of the inter-fraternity tennis champions and the intramural swimming teams will be made as soon as these championships are determined.

BELLMONT COMPETITION SET FOR WEDNESDAY

Wednesday afternoon the annual track and field meet will be held to determine the winner of the Belmont Cup. The meet will be held on Clark Field.

The Belmont Cup, donated by L. Theo. Belmont, is awarded each spring to the athlete making the highest score in a list of seven events. In computing the score the Conference record is taken as a basis. The record is valued at one thousand points and each contestant receives a score in each event in the same proportion to one thousand as his time or distance is to the record.

Raleigh H. Sapp of Rosebud was the winner of the cup year before last, the first year of the offer. Last year "Bully" Gilstrap, of Granger won.

The events in the meet will be: 75 yard dash; 75 yard low hurdles; shot put; pole vault; high jump; broad jump; and 880 yard run.

LETTERS AWARDED

(Continued from page 1)

Rae Keiffer, Emma Morehead, Tommie Powers, Elva Rogers, Fay Shelton, Ruth Smith and Agnes Townsend, while a two-striped sweater went to Thisba Worley.

The girls receiving "T's" were: Winifred Anderson, Frances Cox, Hiawatha "Wassie" Crosslin, La Verne Cummings, Frances Graham, Asta Grona, Oreah Hall, Margaret Hall, Katy Rae Hall, Velma Hassan, Sarah Holman, Frances Kerbow, Eula May Lay, Mary Larkin, Thelma Lockwood, Virginia Mantor, Eugenia Marshall, Ann O. Marshall, Myrtle Mathieson, Frances Murphy, Ruth Nelson, Dorothy Ogden, Mary Paterson, Frances Pitts, Marion Penn, Daisy Mildred Richardson, Kathleen Rucker, Etelka Schmidt, Lorine Scott, Elizabeth Speaker, Elizabeth Thrasher, Anna Van Ness, Grace Wythe, Morelza Morrow, Nell Scott and Bernice Gardner.

The following teams and squads were announced:

Archery: Eugenia Smith, "Wassie" Crosslin, Thisba Worley, Laura Thomson, team; Bernice Gardner, La Verne Cummings, Dorothy McCampbell, squad.

Swimming team: Mary McKay, Thisba Worley, Lloyd Martin, Eugenia Smith, Marion Penn; squad, Jean Holland, Etelka Schmidt and Ann Elizabeth Hall.

Canoeing team: Thisba Worley, Billy Louise Clark, Lots Foster, Lucile Traylor, Mary McKay; squad, Mary Paterson, Ruth Smith, Morelza Morrow, Florence Davis.

Tennis team: Harriette Brush, Virginia Mantor, Ura Swann, Beatrice Lytle, Mina Bennett; squad, "Wassie" Crosslin, Stella Anderson, Winifred Anderson, Ethel Handner.

High honors in dancing: Rosalie Biggio, Frances Graham, Mary Larkin and La Ree Pfeiffer; honors: Anne Marshall, Dorothy Larch, Elizabeth Thrasher, Dorothy Barnes, Anna Louise Seeling, Dorothy Ogden, Dorothy Kirkpatrick, Billy Louise Clark, Anna Van Ness and Elizabeth Ward.

For special merit and help to the Association, Miss Anna Hiss was given a sweater with three stripes, and Miss Josephine Schmid a blanket.

PRODUCTION FIGURES

Dr. J. A. Udden, director of the Bureau of Economic Geology and Technology, stated yesterday, that the production of Fuller's earth in Texas for 1922 was 12,285 short tons, valued at \$123,536.

INJURY TO

(Continued from page 1)

ter and Gore moved to second. Covington flew out to right. Gore went to third on the throw in. Lyons singled, scoring Gore and putting Roach on second base. Strickland singled and Roach scored. Williamson up. Lyons took third on a passed ball. Williamson struck out. Two runs, three hits, one error.

Sixth Inning

Texas: Carson shot one over the right field fence that was just foul. Carson struck out. Eckhardt flew out to left. Odom singled to left field. Sledge flew out to left. No runs, one hit, no errors.

Baylor: Collier popped to Carson. Connally struck out. Pittman popped to Kibbie. No runs, no hits, no errors.

Seventh Inning

Texas: Leissner went out, short to first. Allen singled into left. Kibbie flew out to center. King popped to first. No runs, one hit, no errors.

Baylor: Roach hit the first ball pitched over right field wall for a home run. Covington worked Leissner for a walk. Lyons struck out. With the count 2 to nothing on Strickland, Allen attempted to catch Covington stealing and hit Leissner in the head. Leissner dropped unconscious and was out for over five minutes. He seemed to be badly hurt as he was carried from the field. Clements took up the pitching. Strickland struck out. Williamson struck out. One run, one hit, no errors.

Eighth Inning

Texas: With Smalley up a foul caught umpire Robbins on the head. Smalley struck out. Carson went out, second to first. Eckhardt struck out. No runs, no hits, no errors.

Baylor: Collier singled to center. Connally sacrificed him to second. Gore struck out. Pittman went out second to first.

Ninth Inning

Texas: Odom got on first after striking out; the catcher dropped the ball and Odom beat the throw. Roach robbed Sledge of a double down first base line. Clift, batting for Clements, struck out. Allen struck out and the game was over.

The box score:

Texas	AB.	R.	H.	P.O.	A.	E.
Kibbie, ss	4	0	1	1	0	0
King, rf	4	0	0	1	0	0
Smalley, 3b	4	0	1	1	1	0

*batted for Clements in ninth.

Score by innings:

Strickland, ss ..	3	1	2	0	1	0
Williamson, lf ..	3	0	0	3	0	0

Summary: Two base hits—Sledge, Collier. Three base hit—Kibbie.

Home runs—Carson, Roach. Pitcher's record—9 hits, 6 runs off Leissner in 6 1-3 innings; 1 hit, no runs off Clements in 1 2-3 innings. Losing pitcher Leissner. Runs driven in—Strickland 3, Lyons, Roach, Collier, Carson, Sledge. Earned runs, Baylor, 1 Texas 2. Struck out, by Lyons 10, by Leissner 3, by Clements 3. Base on balls off Leissner 4. Sacrifice hits—Covington, Connally. Passed ball—Allen. Stolen base—Covington. Time of game—2 hours 10 minutes. Umpires Robbins and Countryman.

LEGION AUXILIARY TO MAKE POPPIES TODAY

Miriam Gerling, secretary of the Woman's Auxiliary of the University Post of the American Legion, has called a meeting of the Auxiliary for this afternoon at the home of Mrs. C. G. Haines at 3207 Grandview Avenue.

This meeting was called for the purpose of making poppies for the annual poppy sale to be held on Memorial Day, May 30, says Miss Gerling. She asks that all members bring two or three visitors, as there will be plenty of work for all.

Sport Gossip

Well, we lost the football, cross country, basketball and baseball championships; but look at what that little ole tennis squad went an' done.

Advanced Students in Botany Make All Day Field Trip to Pool

Advanced students in the Botany department took an all day field trip yesterday to Hamilton's Pool and West Cave, to gather material for laboratory work. The students were accompanied by Dr. Frederick McAllister and Mr. and Mrs. B. C. Sharp of the Botany faculty.

The members of the party included Mrs. S. M. Glazener, Eleanor Rogers, Alice Downing, Lillian M. James, Linda Allen, Martha Dyke, Eula McGuire, Anne Marshall, Florence Henninger, Mary Hynes, O. B. Williams, W. G. Camp, Anton H. Berkman, Reginald H. Painter, Adelbert Dippel, D. G. Christner.

Miss Peak to Talk to Home Economics Club on Clothing

Miss Lillian Peak of the State department of vocational education will speak at the meeting of the Home Economics Club tonight at 7:15 at the practice house, regarding the clothing contest recently held in Fort Worth. Miss Mary Gaudy of the Austin High School will tell of the plans for a similar contest in Austin next year.

Miss Mary E. Gearing, head of the department will speak to the seniors of the club regarding plans for next year.

SIGMA DELTA PSI TO HOLD TRIALS ALL WEEK

Sigma Delta Psi tryouts will be held each afternoon this week from two to five on Clark Field. Athletes wishing to try for this honor are requested to notify Clyde Littlefield of the time they will try out.

Following is a list of the requirements for junior membership: 100 yard dash—12 seconds; 220 yard low hurdles—23 seconds (all hurdles must remain standing); high jump—4 feet 6 inches; broad jump—15 feet; putting 16 lb. shot 25 feet; pole vault—5 feet 9 inches; throwing baseball 200 feet clear of ground; punting football 90 feet clear of ground; 50 yard swim (no time limit); two mile run 14 minutes; 10 mile walk—three hours; erect posture, especially of head.

LIFE SAVING TEST

In order to give tests for Red Cross Life Saving, Captain Law from the St. Louis Division of the American Red Cross will be in Austin May 24, and will give the tests to the members of Turtle Club and other girls interested in passing them, at Deep Eddy at 3:30, instead of at the Y. M. C. A.

Any boys wishing to take the tests and receive the emblem should make an appointment with Captain Law.

Return engagement "the trying place"—tonight.

Special for today, \$2.00 silk chiffon hose \$1.65 at Ye Lytle Shoppe, 2408 Guadalupe.

FACULTY PASSES

(Continued from page 1)

an absence and one-half for each one-third of a course registered for during the term, the required physical training counting as one-third of a course each term, except (b) where absence in one term are due to prolonged sicknesses or participation in an approved student activity, the total allowance for one term may upon written petition approved by the dean be transferred from one term to another term in the same session except (c) that in checking up for a degree, not more than one absence per twenty hours credit may be offset by reducing the number of honor points one point per absence.

Although Physical Training is a residence and not a degree requirement, an absence in physical training like absences in credit classes reduces by one hour the total course credits of the student.

Loss of Credit Points

An absence that causes a student to miss a quiz, written recitation or laboratory experiment or that causes a student to fail to hand in or be late in handing in written work very naturally results in the student getting a lower grade and therefore fewer credit points than would otherwise be the case. Instructors are not required to grant the privileges of making up work lost through absences except in the case of mid-term or final examinations.

Dropping From Rolls

A student who is absent during any term for more than one-tenth of the total number of exercises at which he is due during the term is dropped from the rolls of the University and may be readmitted only at the discretion of the dean.

A student of low class standing may be dropped from the rolls of the University because of absences, each absence reducing the "score" of a student by one. (See "Score that a student must make to Remain in the University").

A student absent any one term for as many as one-fifth of the exercises of a class for that term is dropped from the rolls of the class (unless he is absent from one-fifth of the exercises of each of his classes) regardless of the causes of the absences.

Mid-Term Examinations

In many classes midterm examinations are given a student who is compelled to be absent from a midterm examination is allowed upon a petition approved by the dean and the instructor concerned, to take the examination later at a date fixed by the instructor.

The student must make at least an average of thirty points per one-third course on the courses required and counted for the degree which are taken at the University the point value of the grades, A, B, C and D being 42, 36, 30 and 24 respectively. Both credit hours and points are affected unfavorably by absences.

Students whose average is at least forty points per one-third course with an A on the general examination shall be graduated "with high-

est honors;" students whose average is at least thirty-eight points per one-third course with an A on the general examination shall be graduated "with high honors;" students whose average is at least thirty-six points per one-third course with at least a B on the general examination shall be graduated "with honors."

Before May 15 of the spring term of his senior year, at a time and place fixed by the faculty of the department in which the student has elected to major, the student must pass a general four-hour written examination in his major subject. In setting this examination the faculty of the department will take into account the particular courses elected by the student, but will expect a more mature and comprehensive knowledge than is required in the regular term examination.

This requirement goes into effect for all College of Arts and Science degrees given in June, 1924 or later, but negative credit is given only for absences after the beginning of the fall term, 1923.

Grades Received

Students taking less than four courses (12 hours) must pass in all the work taken.

Students taking four or more than four courses must get grades of A, B, C, D, or E on at least four courses (12 hours).

First year students taking four or more courses must make a total score of 72 in four courses where course grades of A, B, C, D, E, F, or G count respectively in scoring A as 42, B as 36, C as 30, D as 24, E as 12, F as 0, G as 0.

Second year students taking four or more courses must make a total score of 84 in four courses. Other students taking four or more courses must make a total score of 96 in four courses.

Each absence of a student during a term reduces this score by one, except that one absence and a half is allowed for each one third of a course registered for during the term, the required physical training counting as a third of a course each term.

In scoring, the grade in physical training is not counted; but the absence in physical training reduces the score by one, just as absences for some other class.

Students who fail during the long session to attain the required score are ordinarily dropped from the rolls for the remainder of the session and are readmitted only on scholastic probation.

To be entitled to return for the next long session a student in attendance during the spring term must make during that term the score of 72 in four courses if a first-year student, of 84 in four courses if a second-year student, of 96 in other cases; or if in attendance during the spring term and the subsequent summer session the score of 96 if a first year student, of 108 if a second-year student, of 120 in other cases, such score to be based upon four courses in the spring term and the work done in the summer session.

A student who fails to attain the required score is sometimes readmitted at once if there seems to the dean reason for so doing, but the student so readmitted is readmitted on probation for six weeks and must make at least the minimum score at the end of the probation period. A second failure during any long session to make the minimum score drops the student from the rolls for the remainder of that session.

This provision goes into effect September, 1923 for all students.

The report was signed by the entire committee, composed of H. Y. Benedict, J. W. Calhoun, Spurgeon Bell, J. C. Townes, B. F. Pittinger, A. P. Brogan and D. A. Penick.
