

AGRICULTURAL AND MECHANICAL COLLEGE OF TEXAS  
COLLEGE STATION, TEXAS

DEPARTMENT OF GEOLOGY

November 17, 1938

Mr. H. B. Stenzil  
Bureau of Economic Geology  
Austin, Texas

Dear Stenzil:

The question has arisen here concerning who is going to teach the summer school in 1939. I am planning on spending part of the summer on the Pacific Coast.

I am wondering what the situation is regarding our card catalogue and the Bureau. If funds are available, some time might be profitably spent in Philadelphia, John Hopkins, and the U. S. National Museum straightening out synonymies and getting photos of types, and also trying to get some of the genera determined.

If I am able to work for the Bureau I shall relinquish any claim on summer teaching. The "Chief" is holding up his report to the Dean awaiting my answer.

Best regards,

*F. E. Turner*
