Dr. H. B. Stenzel
Bureau of Economic Geology
Austin, Texas

Dear Dr. Stenzel:

The "Subsurface Study Group Section" of the Houston Geological Society is planning a two-day field trip along the Central Texas outcrops of the Carrizo and Wilcox formations, to be held some time within the next month or two. I am anxious to work out an itinerary (by car) for the trip, and thought that possibly you might have in mind some particularly good exposures which could be easily reached. I would greatly appreciate your thoughts regarding such a trip and also wish to extend to you a cordial invitation to accompany us after plans have been more definitely formed.

Thank you for any information which you may give
us

Very sincerely,

Paul B. Fahle
