Dr. H. B. Stenzel  
Care of the Bromberg residence  
Crockett, Texas

My dear Stenzel:

I am glad to have your note about work that might be done by the Museum project. We will keep this in mind in planning the work.

With regard to November 30, so far as I know, we will be in Austin. I hope your work is going well.

If by any chance you could interest the county commissioners in supplying transportation, we could probably start a mineral resource survey to do the boring that you want. I have not inquired about available labor but there is a fair chance that labor could be found. Occasionally the county commissioners are interested to the extent of supplying transportation since they must take care of their people on relief and are willing to make this much of a contribution. We could not operate without having transportation supplied.

Very sincerely yours,

  
E. H. Sellards, Director
