Dear Henryk:

Would you be so good as to
pass this on to someone for reply?

A German colleague is
working with me on a group of
Naculidae from the Upper Cretaceous.
You sent me, as I recall it, some
specimens of Nacula puerassa
Conrad.

Now we should like to
correspond with some one
interested in late Cretaceous
pelecypods.

Last year the doctors
saved me twice and I am
a little stronger now, but am not
allowed to go to my office. I do most
emphatically hope that your health
has improved.

Sincerely, Hubert G. Schenck
