ATHENS  
GREECE

Dear Emmett:

As you see I have returned from England, pretty exhausting trip altogether. Our letters of May 24th and 25th seem to have crossed. First let me tell you how pleased we are to know about your new post - it is splendid news and I did not happen to have heard it. You must be very busy with preparations for the move.

I have just received the new packet of three copies of Myc.Tab.II for which I am most grateful. My one previous spare I gave to Mrs. Sakellariou at the National Museum who is the custodian of the tablets and finds it very useful to have her own copy. That leaves me the new three as spares and I think we now agree that my residue with you is 19. If your copies run short please tell me as I do not expect to need all of mine. Many thanks for the receipt.

With Frank Stubbings' help I am trying to sort out and file all the many Mycenae drawings for future use and reference. Among the things returned to you by the Lancaster Press are there any drawings used in Mycenae Tablets II? The OUP sent them the drawings for Figs. 23, 24, 25 in February<sup>1957</sup> and they should be about somewhere. Also we cannot find the drawings for Figs. 17, 75, and 76. Can you give us any help over this? The first group should go back to store with Frank Stubbings in Cambridge, but the seals I need here. If you find them and could leave them<sup>all</sup> in Evelyn Smithson's charge for me to collect when I come to America in November, I should be most grateful. If you have already moved this is going to be difficult. Of course they may still be with Miss Richards.

We have had very few acknowledgements. I wonder if any of the Athens acknowledgements have gone to you. I had only Jack Caskey and Doro Levi, and of course the Blegens.

We shall be at Nauplia working at the Museum from August 3rd to 31st, but this address should be alright. Then I shall be in Athens from our return to October 22nd when I sail to America (Nassau Tavern as usual) for just over two months returning here via England. What a nomad I am!

My best to you all and may the new job be a happy one. I have pleasant associations with Texas - my elder sister, Mrs. Sumner Slichter, was born there.

Yours ever,
