REPORT OF BOARD OF REGENTS.

UNIVERSITY OF TEXAS,
AUSTIN, TEXAS, December 23, 1892.

His Excellency James S. Hogg, Governor of Texas:

Section 21 of the Act to establish the University of Texas, approved March 30, 1881, requires that at each session of the Legislature a report be rendered by the Regents, showing the receipts and disbursements of the two preceding years, the present condition, and the immediate needs of the Institution. In compliance with this requirement the following Fifth Biennial Report is respectfully submitted:

I. RECEIPTS AND DISBURSEMENTS.

According to the statement of the Comptroller, as published in Fourth Biennial Report (December, 1890):

The balance of available University fund on hand June 5, 1890, was ...	\$34,855 31
According to statement of Comptroller given herewith (exhibit A)	
the receipts from June 5, 1890, to May 30, 1891, were as follows:	
From interest on land sales	4,114 07
From interest on State bonds	33,768 60
From lease of lands	15,871 80
From School of Chemistry	229 10
From matriculation fees	3,610 00
Refunded by Proctor	1 50
Transferred from State revenue	349 85

Total available University fund for 1890-91 \$92,800 23

According to same statement (exhibit A), the disbursements from June 28, 1890, to May 21, 1891, were as follows:

Total expenses of Main University	\$57,327 22
Expenditures for Medical Branch	23,231 40
Paid Agricultural and Mechanical College	499 07

Total disbursements for year 1890-91 \$81,057 69

The receipts and disbursements for 1890-91, as given above, include those of the Main University at Austin and the Medical Branch at Galveston. The receipts and disbursements for 1891-92, as given below, include only those of the Main University at Austin. Those of the Medical Branch at Galveston for 1891-92 are given in connection with the report on the Medical Department (page 23).

According to statement of Comptroller (exhibit B):

The balance on hand due Main University June 1, 1891, was	\$6,625 83
Receipts from June 1, 1891, to May 24, 1892, were as follows:	
From interest on land sales	3,216 94
From lease of lands	16,063 95
From interest on State bonds	34,318 60
From matriculation fees	50 00
Transferred from State revenue (appropriation)	10,000 00

Total available fund for 1891-92 \$70,275 32

The disbursements of the Main University, according to the same statement (exhibit B), from June 24, 1891, to May 24, 1892, were as follows:

Total expenses of Main University.....	\$63,926 26
Paid Agricultural and Mechanical College.....	420 81
Interest paid Milam County on State bonds purchased.....	1 92
Transferred to State revenue.....	32 75

Total disbursements for year 1891-92.....	\$64,381 74
---	-------------

According to statement of Comptroller (exhibit C):

The balance on hand due the Main University May 24, 1892, was....	\$5,893 58
Receipts from May 24, 1892, to November 30, 1892, were as follows:	
From interest on land sales	2,651 76
From lease of lands.....	11,672 40
From interest on State bonds.....	11,951 10
From matriculation fees (1891-92).....	6,290 00

Total.....	\$38,458 84
------------	-------------

According to same statement (exhibit C), the disbursements of the Main University, from May 24, 1892, to November 30, 1892, were as follows:

Expenses of Main University from May 24, 1892, to November 30, 1892.	\$27,312 11
Transferred to revenue	79 19
Balance on hand November 30, 1892, due Main University..	11,080 98

Total.....	\$38,472 28
------------	-------------

Itemized statement of the disbursements for the Main University and the Medical Branch, for the year 1890-91 (\$81,057.69), and itemized statement of the disbursements for the Main University for the year 1891-92 (\$64,381.74) are given in the report of the Proctor of the Main University, Jas. B. Clark (exhibit D).

It may be well to call attention to the fact that the above exhibit of receipts and disbursements for the two years 1890-92 shows that the Regents have kept the expenses of the University within the income. As has been said in former reports: "At no time since the organization of the University has there been a deficit to report to the Legislature, and in the future no deficit shall occur unless there is an unforeseen shrinkage in some expected source of revenue."

II. PRESENT CONDITION OF MAIN UNIVERSITY.

A. PERMANENT ENDOWMENT.

The permanent endowment of the Main University consists of (1) lands, (2) land notes, (3) State bonds.

(1) *Lands*.—The classification, location, and condition of the lands given to the University at various times were fully set forth in the Third Biennial Report of the Regents (pp. 6-10). In brief, the landed endowment of the University consists (a) of the original fifty leagues granted by the Republic of Texas; (b) of the million acres granted by the Constitution of 1876; (c) of the million acres appropriated by the Legislature (act approved April 10, 1883).

(a) *The original fifty leagues*.—Most of this land has been sold and the proceeds converted into bonds and land notes. The disputed titles in McLennan county, referred to in Third Biennial Report, have been

cleared by compromise, the University gaining one-half (about 7,000 acres) of the land in controversy. The conflict in Grayson county, involving 8022½ acres, is still unsettled so far as the Regents are informed. To quote from the Third Biennial Report the case is as follows: "In order to make out the full complement of fifty leagues, 8022½ acres were located and surveyed in Grayson county and reported to the Land Office as University lands. When these lands were sold, however, the proceeds were credited to the general revenue and not to the University fund." It is hoped that this case and others of similar character that might be mentioned will be equitably considered by the Legislature.

Occasional sales are made of such of the original fifty leagues as are not in conflict. Since the last Biennial Report of the Regents, December, 1890, 3033 5-12 acres have been sold as per statement of treasurer (exhibit E). This statement not only shows the number of acres sold, but also the location of the lands, the name of the purchaser, and the price paid per acre.

(b). *The million acres granted by the Constitution of 1876, and (c) the million acres appropriated by the Legislature of 1883.*—But little of this land has been sold, as it lies in the western part of the State, mainly in Tom Green (as originally bounded), Andrews, Martin and El Paso counties, and, therefore, is not in demand for actual settlement. Such as has been sold is stated in the several reports of Treasurer in the Third and Fourth Biennial Reports of Regents.

In the Fourth Biennial Report of Regents (1890) the number of acres of these lands leased up to that time was given as 352,160 acres at 3 cents per acre. In statement received from Treasurer June 16, 1891, it is reported that 567,000 acres were under lease (exhibit F). In statement received from Treasurer dated May 19, 1892, it is reported that 662,800 acres were under lease (exhibit G). The number of acres reported leased September 13, 1892, is 675,680 (exhibit H). The number of acres reported December 10, 1892, (last statement received from Treasurer) is 685,280 (exhibit I). The date of each lease, the name of lessee, the county in which the tract is situated, the number of acres, the length of the lease and the yearly payment, are given in each of these statements. The entire condition of the University lands leased from December, 1890, to December, 1892, is therefore given in these successive reports from the Treasurer. Out of the two million acres there are at present, as has been stated, 685,280 acres under lease at 3 cents per acre. From this the University derives an estimated annual revenue of \$20,558.40. This revenue is characterized as "estimated," because at any time, for non-payment of annual rental, it may be reduced by cancellation of the lease. These cancellations during the last two years have amounted to 165,920 acres. If in the next two years the cancellations should be in excess of the number of acres leased, the annual income from this source would be less than \$20,558.40. The annual revenue, therefore, from the lease of lands is uncertain, and can not be implicitly relied on.

(2) *Land Notes.*—These notes represent the unpaid balances due on land sales. They amount in the aggregate to \$61,714.72 (exhibit K), against \$64,606.31, reported 1890. The difference, \$2,891.59, has been invested in State bonds. Of these notes \$13,996.53 bear 10 per cent interest, yielding an estimated income of \$1,399.65. The remainder, \$47,718.19, bear 5 per cent interest, yielding an income of \$2,385.90.

The total amount received from the payments on these notes since November 30, 1890, is \$9692.08—principal \$3014.12, interest \$6677.96 (exhibit J).

(3) *Bonds*.—The total amount of bonds held in trust by the State for the University in 1890, as given in Fourth Biennial Report of Regents, page 5, was \$569,340, and the annual interest on same was given as \$34,268.60. In statement of Treasurer, dated December 1, 1892, herewith submitted (exhibit K), the total amount of bonds at present is \$571,340, and the annual interest on same is \$34,368.60. The difference between the total rendered in 1890 and the present total (1892), \$2000, and the interest rendered in 1890 and the present interest (1892), \$100, is due to the fact that the Comptroller has purchased for the University \$2000 of 5 per cent bonds since November 12, 1890.

The Regents beg leave to call your Excellency's attention in this connection to a matter of considerable importance to the University. In the Fourth Biennial Report, page 5, it was said:

"Attention is called to the fact that some of the bonds mentioned in the statement of Comptroller have already matured, to-wit, \$2000 at 6 per cent due January, 1890; and attention is again called to the fact that \$12,000 at 6 per cent will fall due March, 1892, and \$138,000 at 7 per cent April, 1892. It is respectfully requested that, if necessary, such legislation be recommended to the Legislature as will secure the University against loss, either from a temporary suspension of interest or from a forced reinvestment at a lower rate per cent. The present bonds might be continued indefinitely, or a new single bond might be issued at the same rate and held in trust by the State for the University."

What was anticipated in the report of 1890 has taken place. The interest due on \$2000 at 6 per cent, which matured January, 1890, and on \$12,000 at 6 per cent, which matured March, 1892, and on \$138,000 at 7 per cent, which matured in April, 1892, has not been paid. The attention of the Comptroller having been called to the difference in the amount of interest from bonds reported in 1892 and in 1891, the following communication was received:

AUSTIN, TEXAS, Dec. 27, 1892.

Dr. T. D. Wooten, Austin, Texas:

DEAR SIR—Replying to yours of the 24th instant I beg to say, the difference between the amount of interest on July 1, 1892, and July 1, 1891, is due to the fact that a number of State bonds held by the permanent University fund have fallen due, and no provision having been made for the redemption or reissuance of same by the Legislature, no interest has been collected since the date of maturity.

The attention of the Legislature has been called to this matter.

Respectfully,

JOHN D. MCCALL, Comptroller.

Reference is hereby made to the Report of the Comptroller to the Legislature for the full details in regard to this matter, and the request is made that appropriations covering the full amount of interest due be made by the Twenty-third Legislature, and further that manuscript bonds covering the full amount of the matured bonds be issued at the same rate per cent interest, to wit, \$2000 at 6 per cent, \$12,000 at 6 per cent, and \$138,000 at 7 per cent. Any diminution of the rate per cent would lessen the income from a fund which the State holds in trust for

the University, and on which it mainly relies for support and maintenance.

The present available fund of the University can now be approximately estimated:

(1) Income from bonds.....	\$34,368 60
(2) Income from land notes.....	3,785 55
(3) Income from leases.....	20,558 40

Total income from endowment	\$58,712 55
-----------------------------------	-------------

This estimate is based on the supposition that the bonds will continue to bear the original interest, and that the full interest on land notes and the leases on lands will be paid when due. A failure in any of these suppositions will proportionately reduce the above estimate.

To the total from endowment may be added the annual fees from students. Up to date for the present session (1892-93) these amount to \$5890. The entire estimated income of the University, exclusive of appropriations from the Legislature, is therefore as follows:

Income from endowment.....	\$58,712 55
Income from fees	5,890 00

Total estimated income.....	\$64,602 55
-----------------------------	-------------

The total estimated income in last report (1890) was \$52,765.59. The increase in the total income is \$11,836.96. This increase is due mainly to the lease of lands and the fees of students.

B. THE FACULTY.

The Main University at Austin is composed at present of the Academic and Law Departments. These two departments occupy the same building and are under one organization, a chairman of the Faculty being annually elected by the Academic and Law professors. The Law Faculty consists of two full professors. The Academic Faculty consists at present of six full professors, five associate professors, three adjunct professors, one assistant professor, one instructor, four tutors, and three fellows, in all twenty-three. Full professors are appointed without express limitation of time; associate professors for five years; adjunct and assistant professors for three years; instructors, tutors and fellows are appointed for one year. Full professors have charge of distinct schools; associate and adjunct professors may have charge of distinct schools; and assistant professors, instructors, tutors and fellows are assigned to schools presided over by officers of higher rank. The chairs filled and the subjects taught by each of these are fully set forth in exhibit L. This exhibit also shows the Faculty and other officers of the Medical Department referred to under the head of that department. Besides the above officers of instruction the Main University at Austin has one lady assistant, and one proctor, who is also librarian and secretary of the Faculty. Counting the Law Department and the Academic Department as one organization, the Main University has twenty-seven officers of instruction and government. In the last Biennial Report the total number of officers of instruction and government was given as nineteen. There has been, therefore, an increase of eight within two years. This increase has been entirely in the Academic Department, and consists of the following instructors:

One full professor of Pedagogy,
 One assistant professor of Biology,
 One instructor of Elocution,
 One tutor in Mathematics,
 One tutor in Chemistry,
 One fellow in Physics,
 One fellow in Latin,
 One fellow in History.

The salaries paid these twenty-seven officers of instruction and government amount in the aggregate to \$56,600. This amount is distributed as follows:

One Chairman of the Faculty.....	\$600 00
Eight full professors, average salary, \$3375	27,000 00
Five associate professors, average salary, \$2600.....	13,000 00
Three adjunct professors, average salary, \$2000.....	6,000 00
One assistant professor.....	2,000 00
One instructor.....	1,000 00
Four tutors, average salary, \$600	2,400 00
Three fellows, average salary, \$300	900 00
One lady assistant.....	1,200 00
One Proctor and Librarian	2,500 00
Total	\$56,600 00

In this connection it may be well to report the current expenses other than salaries estimated for the present year (1892-93), in order to make a full exhibit of the running annual expenses of the Main University on its present basis. These current expenses are as follows:

Mechanical Assistant in Physics.....	\$360 00
Repair of building	400 00
Coal \$400, engineer \$350.....	750 00
Gas	500 00
Improvement of grounds	400 00
Printing (general)	300 00
Catalogue.....	500 00
Stationery and postage for Proctor	500 00
Stationery and postage for Chairman	50 00
General contingent expenses	500 00
Contingent expenses for School of Physics	200 00
Contingent expenses for School of Geology	200 00
Contingent expenses for School of Applied Mathematics	100 00
Contingent expenses for School of Chemistry	250 00
Commencement	300 00
Board of Regents	800 00
Water	300 00
Invited speakers	150 00
Auxiliary School Committee	300 00
Telephone	60 00
Advertising.....	125 00
Fitting up Biological Rooms	1,000 00
Contingent expenses of Biology	500 00
Servants to be employed by Proctor	1,320 00
Total	\$9,865 00
Total for salaries.....	56,600 00
Total estimated expenses for year 1892-93.....	\$66,465 00

C. STUDENTS.

As shown in the Catalogue of the year 1891-92 the number of students matriculated last session in the Academic Department and the Department of Law (367) is greater than it has ever been. This is shown by the following tabular statement of the attendance during the last seven years:

1885-86—total in attendance.....	199
1886-87—total in attendance.....	245
1887-88—total in attendance.....	250
1888-89—total in attendance.....	278
1889-90—total in attendance.....	307
1890-91—total in attendance.....	283
1891-92—total in attendance.....	367

Grouped into Departments, Courses, Classes, etc., these students were divided as follows:

In the Academic Department.....	275	
In Department of Law.....	92—	
Total.....		367
In Course of Arts.....	36	
In Course of Letters.....	71	
In Courses of Science.....	54	
In Certificate Course.....	15—	
Total regular students.....	176	
Irregular and special students.....	99—	
Total.....		275
Graduate Class.....	8	
Senior Class.....	23	
Junior Class.....	16	
Sophomore Class.....	42	
Freshman Class.....	87—	
Total regular students.....		176
Senior Law Class.....	37	
Junior Law Class.....	55—	
Total in Law Department.....		92
Males.....	258	
Females.....	109—	
Total.....		367

Out of the total number of applicants for admission into the University at the opening of the session twenty-seven were rejected on account of insufficient preparation. Of these five were allowed a re-examination January 1, 1892, and four succeeded in passing on the second trial. In order to prevent as far as possible the disappointment of a rejection at Austin, and the expense of perhaps a fruitless journey, the Faculty have recognized the various Auxiliary Schools throughout the State as points of local examinations for entrance into the University. Questions under seal are sent to the Principals of these Schools, and, upon an appointed day, these questions are opened in the presence of the applicants, the examination is held and the papers are sent under seal to the Faculty. As soon as possible the papers of the applicants are read and estimated, and the results are sent to the Principals of the Schools. In this way it is possible for those wishing to enter the University to ascertain whether they can do so or not, without leaving their homes.

Statistics have been kept of the students connected with the various religious denominations, and are herewith given. In each case the connection is that of the student personally or that of his family. These

statistics include not only those who did enter the University, but also those who applied but failed to enter:

Number connected with the Baptist denomination.....	84
Number connected with the Methodist denomination.....	76
Number connected with the Episcopal denomination.....	41
Number connected with the Presbyterian denomination.....	67
Number connected with the Christian denomination.....	42
Number connected with the Hebrew denomination.....	6
Number connected with the Catholic denomination.....	8
Number connected with the Lutheran denomination.....	4
Number connected with the Universalist denomination.....	1
Number connected with the Unitarian denomination.....	1
Number connected with the Congregationalist denomination.....	1
Number connected with no denomination.....	52

It may not be out of place to call attention here to the necessary expenses incurred in attending the University. Tuition in the Academic Department is free to all residents of the State of Texas. Non-residents pay a tuition fee of \$10. All students in the Academic Department pay an annual contingent fee of \$10. An annual fee of \$50 for tuition is charged for admission to the Law Department. Board with furnished room can be obtained in the city of Austin in private families at prices varying from \$13 to \$20 per month.

The Brackenridge Hall, the gift of Mr. Geo. W. Brackenridge, of San Antonio, one of the Regents of the University, was completed December 1, 1890, and has been occupied since that time. It is a hall for students, containing lodging rooms and a restaurant. By boarding at this Hall a student may materially reduce his expenses. The rent of a room occupied by two persons is \$6 a month. The occupants furnish their own bedclothes and towels. The board varies in cost, as the meals are served to order from a bill of fare, but ranges from \$8 to \$12 per month, which includes lights and fuel.

Many students rent rooms near the University grounds and take their meals at the restaurant, as a matter of convenience and economy.

The number of meals per day sold at this date, December 23, 1892, is 260. For bill of fare see exhibit M.

The necessary expenses for a student in the Academic Department, therefore, are as follows:

Annual fee.....	\$10 00
Board in Brackenridge Hall for 9 months at \$12 per month.....	108 00
Total.....	\$118 00

For a student in the Law Department:

Tuition fee.....	\$50 00
Board in Brackenridge Hall.....	108 00
Total.....	\$158 00

The price of text books varies in accordance with the requirements of the several schools, but it can be safely estimated at from \$10 to \$15 per year. There are other small expenses which will increase slightly these amounts; but it is safe to say that with economy it need not cost an academic student more than \$150 for his tuition, board and books; and a law student more than \$190 for the same.

These facts are reported here because it is believed by many that the

University is the rich man's school; that it costs so much to attend its classes that the poor man can not afford to send his son or daughter to Austin to be educated within its walls. The prevalence of this opinion not only damages the University by keeping away from it many young men and women of promise, but it works an irreparable injury to the young people of the State by depriving them of an opportunity to acquire an education in the most thoroughly equipped institution in Texas. No one need stay away from the University on account of the expense. With free tuition in the Academic Department and board at actual cost, the sons and daughters of our citizens, whether rich or poor, can find here an opportunity to acquire a thorough liberal education. As a matter of fact it is possible for young men to attend the University, and at the same time find employment in Austin sufficiently remunerative to pay expenses while doing so. Some eight or ten young men are doing this now and as a body they stand among our best students.

All classes of our citizens are represented in the University. From a census taken at the opening of the current session, 1892-93, the occupations of the parents and guardians of those admitted were as follows:

Farmer, 49; merchant, 44; lawyer, 29; physician, 15; stockman, 15; real estate agent, 10; teacher, 10; preacher, 6; government clerk, 5; banker, 5; contractor and builder, 3; clerk of court, 3; draftsman, 3; druggist, 2; carpenter, 2; manufacturer, 2; cashier of bank, 2; insurance agent, 2; liquor dealer, 2; bookkeeper, 2; postmaster, 2; civil engineer, 1; drummer, 1; gardener, 1; mechanic, 1; sheriff, 1; hotelkeeper, 1; county clerk, 1; tax collector, 1; railroad agent, 1; Proctor of University, 1; telegraphist, 1; newspaper correspondent, 1; newspaper manager, 1; Superintendent Confederate Home, 1; horticulturist, 1; stenographer, 1; dentist, 1; Congressman, 1; State Revenue Agent, 1; rectifier and compounder, 1; speculator, 1; abstractor, 1; missionary, 1. Besides these, 32 reported parent or guardian as a lady, and 30 reported "self," being of age.

GIFTS TO THE UNIVERSITY.

Mr. S. M. Swenson, formerly of Austin, Texas, but now of New York City, has given the University a magnificent collection of coins and medals.

Of the 3476 coins, 2217 are bronze, 1172 silver and 87 gold. Many of these coins were in use before the Christian era, and, with a few exceptions, none are of a more recent date than the sixth century.

Of the 1846 medals, 607 are silver, and the remainder of bronze, white metal, plated and gilt. There are 94 Russian medals, illustrating the rise and progress of that country from the time of Ruric to that of Czar Alexander. American, French, English and Swedish medals make up the remainder, and illustrate historical events of great importance in these countries respectively.

Many of these coins and medals are quite rare, and their value in the study of history will be inestimable. Arrangement has been made to make this collection available for instruction in the University, and for this purpose it has been placed in charge of the Professor of History.

It is believed that this gift from Mr. Swenson and the gift from Mr. Brackenridge, of a hall, in which students can live at actual cost, will di-

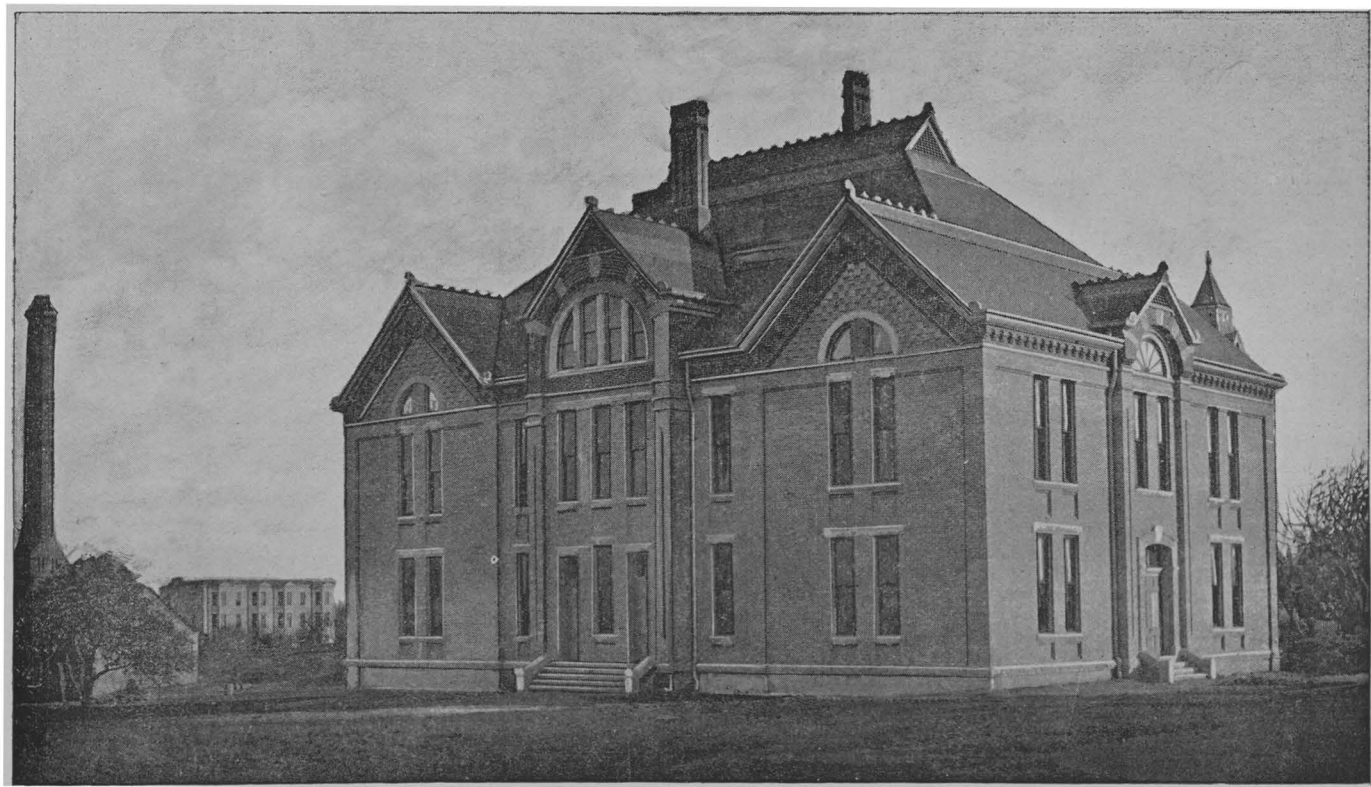

rect the attention of other liberal-minded men of wealth to the University. The experience of centuries has shown that money can be invested in no way so beneficially and so permanently as in expanding and completing a well established institution of learning. The wide-spread benefits of such special endowments are incalculable. They are enjoyed by generations and reach in their effects those most in need of the particular help offered. Again, the permanency of such an investment in the University of Texas is assured. The institution is firmly established upon an endowment in land and bonds, and will forever remain consecrated and devoted to the purposes of its creation. Any gifts, therefore, from individuals will but supplement and be secured by the larger gifts from the State, and, owing to these larger gifts, donations from individuals can be and will be applied directly and immediately to the purposes which the donors wish to accomplish. Just at this time the University needs gifts to accomplish several objects. There is need of special funds to endow two or more fellowships, the interest from which will support or help to support students of limited means while studying at the University. We need also a hall for young women, similar to the hall for young men built by Mr. Brackenridge, where the young women of the State may be lodged and boarded at actual cost. We need, too, an astronomical observatory, where the important subject of astronomy can be taught practically as well as theoretically. Finally, we need a herbarium and a botanical garden for the School of Botany, which school hitherto the University, for lack of funds, has been unable to establish. It is believed that there is no way of doing good so effectual and so permanent as by the accomplishment of one of these objects, and certainly there is no way of perpetuating one's name so laudable and so legitimate.

E. SPECIAL APPROPRIATIONS TO THE UNIVERSITY BY THE TWENTY-SECOND LEGISLATURE.

(1) *The Chemical Laboratory.*—The Twenty-second Legislature appropriated \$25,000 for the erection of a Chemical Laboratory on the University Campus. As soon as possible plans for this building were selected and it was erected during the summer and fall of 1891. (See cut on opposite page.) The University is indebted to this liberal appropriation for one of the most complete and serviceable laboratories in the South; and friends of the institution are invited to inspect its admirable equipment and to acquaint themselves with the facilities it affords for modern investigation and experiments.

(2) *Heating Apparatus.*—The Twenty-second Legislature appropriated \$10,000 for heating the Main Building. Of this amount \$4594 was used to build a boiler house and stack chimney. The balance was applied as far as it would go to piping the Main Building and fitting up the corridors and lecture rooms with radiators. At present the West Wing, Center, and basement of North Wing are comfortably heated, but the remainder of the North Wing is still to be furnished with pipes and radiators, and the Chemical Laboratory is to be heated throughout.

(3) *The Library.*—The Twenty-second Legislature appropriated \$10,000 for the University Library. This amount was apportioned out by the Faculty for Library purposes, for the purchase of books on general literature, and for the different schools. These apportionments, the

BOILER HOUSE. BRACKENRIDGE HALL.

CHEMICAL LABORATORY.

amounts expended, the amounts contracted for, and the balances unexpended, are set forth in exhibit N. It may be said that the several balances shown will all be expended or contracted for before the expiration of the fiscal year, March 1, 1893.

(4) *Appropriation to Supplement the Available Fund.*—In order to enable the Regents to add to the Faculty and to provide for other necessary expenses in the support and maintenance of the University, the Twenty-second Legislature appropriated \$10,000 for two years from the general revenue. This amount has been expended in securing two additional professors, one of Pedagogy and one of Biology.

(4) *The Assembly Hall.*—To complete the Assembly Hall with gallery, etc., the Twenty-second Legislature appropriated \$5000. This was expended in the erection of a symmetrical and commodious gallery, which not only adds to the seating capacity, but improves the acoustic qualities of the Hall in a marked degree. The University has now one of the largest and most beautiful halls in the State, with a seating capacity of 2000. It only needs to be easily heated in order to be completely finished, and available at all seasons of the year.

F. AGRICULTURAL AND MECHANICAL COLLEGE.

The University of Texas at present consists of the Main University at Austin, composed of the Academic and Law Departments, the Agricultural and Mechanical College at College Station, and the Medical Department at Galveston.

The Agricultural and Mechanical College is mentioned here because by constitutional and statutory provisions it is a branch of the University, and therefore entitled to a part of the University's income. It has, however, a separate income from a bonded endowment, a recognized constitutional right of support from the general revenues, and a large annual appropriation from the general government. Its income is received and disbursed by an independent Board of Directors, who will doubtless report to your Excellency all the needs and requirements of this branch of the University. It may not be out of place to say that, in the opinion of the Regents, the Agricultural and Mechanical College, owing to the peculiar value of the instruction given there, should be generously aided by the Legislature, and in estimating the amount of aid to be rendered by the State it is respectfully suggested that no account should be taken of the appropriation from the Federal government. This should be considered so much clear gain, and the State should gladly supplement it by a liberal appropriation. This appropriation, however, should be made from the general revenues, and not (except in a mere nominal amount, as at present) from the available fund of the University.

III. THE PRESENT NEEDS OF THE MAIN UNIVERSITY.

A. APPROPRIATIONS FROM THE LEGISLATURE.

(1) *Appropriation to Supplement the Available Fund.*—The total estimated expenses for the year 1892-93 amount to \$66,465. (See page 10). The total estimated income for the same year is \$64,602.55. (See page 9.) The present income is therefore less than the present expenses.

But this income is from the University available fund and does not include the appropriation of \$5000 by the Twenty-second Legislature to supplement this fund. This supplementary appropriation will enable the University to bring the expenses of the year within the income. As a matter of fact the additional expenses were incurred on the strength of this supplementary appropriation, it being understood at the time it was made that it was to enable the Regents to expand the working force and add to the facilities of the University. It is presumed that the precedent set by the Twenty-second Legislature, of appropriating money from the general revenue to supplement the available fund of the University in paying current expenses, will be followed by the Twenty-third and successive Legislatures. It can not be expected that one Legislature would refuse to assist the University in meeting obligations which a preceding Legislature, by an appropriation, encouraged it to incur. It is therefore assumed that the Twenty-third Legislature will make the same appropriation (\$10,000) for the next two years. But inasmuch as the income from interest on land notes and from leases is very precarious and uncertain, and inasmuch as the time has now come for an increase in the number of professors employed, if the University is to hold its own as a first class institution, the Regents respectfully ask that an appropriation of \$20,000 be made (\$10,000 for 1893-94 and \$10,000 for 1894-95) from the general revenue to supplement the available fund.

The professors now needed are an additional professor of Law, a professor of Romance Languages, and a professor of Botany. If an additional professor is secured the course in the Law Department can be enlarged and extended to three years instead of two as at present. It would thus be placed abreast with the most advanced Law Schools in the country, a position which the Law School of the State of Texas should occupy. The fact that the University needs the other two professors is evident from a comparison of its present Faculty with that of any other first class institution.

At present the Romance Languages (French, Spanish, and Italian) are taught by the Professor of Teutonic Languages with the assistance of two tutors. If a distinct chair of Romance Languages could be established, the work of teaching the modern languages, at present much too heavy for efficient supervision by one professor, could be more thoroughly and satisfactorily done.

There is also great need for a Professor of Botany. This important branch is now taught in connection with Zoology by the Professor of Biology. Botany, however, should be taught by a specialist in charge of a distinct school, because it is one of the most practical of the modern sciences. Its subjects lie close to the everyday life of our people. Wherever crops are raised or grass grows, wherever farms are cultivated or gardens planted, there the problems solved by the Science of Botany can be put to immediate and practical use. In the State of Texas especially there is a wide and comparatively unexplored field for the botanist. The Flora of this part of the continent has never been scientifically studied. It is eminently proper for the University of the State to take the lead in this matter, not only for the direct benefit that would accrue to our own citizens, but for the information that would be disseminated concerning the inexhaustible resources of the State in soil, climate, and vegetation, and the consequent advantages offered the horticulturist, the florist, and

the farmer. In course of time the University may expect, if a chair of Botany can now be established, to have herbariums and botanical gardens, in which specimens of all the plants peculiar to Texas may be seen, and in which the laws of their nourishment, growth, and fullest maturity may be studied and recorded.

It is believed that with the supplementary appropriation asked for, \$20,000, the Regents will be able, if there is no decrease in the anticipated available fund, to establish all three of these professorships, and thus give at once the advantages of instruction in these important subjects to the young men and young women of the State.

(2) *Appropriation for Library.*—The Twenty-second Legislature appropriated \$10,000 from the general revenue for the University Library. The same amount is asked for the Library from the Twenty-third Legislature. It goes without saying that the Library is the most important single factor in the growth and usefulness of the University. It is the source of intellectual sustenance to the professors and students, and its accumulated volumes will supplement for generations the instruction in the lecture room and the study in the closet. Besides, in course of time, the use of the library will not be confined to members of the University. Other citizens of the State will find it to their interest and profit to consult its shelves for works that can now be found only in the libraries of the North and East. Lawyers, doctors, preachers, teachers, and merchants, from all over the State, under suitable regulations, can be allowed access to it for consultation and reference. Already the University has in its Library 10,770 volumes, and a foundation has been laid for a noble collection of books, and if subsequent Legislatures are as generous as was the Twenty-second, it will not be many years before the Library of the University of Texas will rank with the Library of the University of Michigan or of California.

(3) *Appropriation for Marine Biological Station.*—It is understood that the quarantine station at Galveston will be removed to another site, and that owing to the fact that the present building is constructed on piles, which it would not be profitable to move, the building will be allowed to remain for other purposes advantageous to the State. It is requested that the site and the present improvements be transferred to the University for a Marine Biological Station, and that an appropriation of \$5000 be made for equipping it with boats, tables, appliances, etc. For a full statement of the benefits that would accrue to the University and to the State by the establishment of such a station, and for an itemized enumeration of the articles to be purchased in order to equip such a station, reference is made to a report from Charles L. Edwards, Professor of Biology (exhibit O.)

(3) *Appropriation for Schools of Chemistry and Applied Mathematics.*—An appropriation is much needed by the School of Chemistry to purchase an assay furnace, distilling and drying apparatus, etc., and also an appropriation is needed for the School of Applied Mathematics with which to purchase additional transits, levels, tables, a testing machine, etc. By reference to tabular statement, exhibit P, it will be seen that the University of Texas is far behind other institutions in this kind of equipment for the School of Applied Mathematics. It is estimated that \$5000 will be sufficient for both schools.

(4) *Appropriation for Additional Heating Apparatus.*—When the ap-

propriation for heating the University building was asked from the Twenty-second Legislature, it was supposed that hot water could be used, and that a furnace might be placed in the basement. The amount asked for and received (\$10,000) was estimated on the cost of such an arrangement. Upon further investigation, however, it was ascertained that, owing to the size of the building, it would be hazardous to try to heat it with hot water. It was then decided to use steam, and a boiler house with stack chimney became necessary. The boiler house was built at a cost of \$4594. The balance of the appropriation was then used in piping and furnishing with radiators, as has already been said, the West Wing, Center, and basement of North Wing. In the main building the rooms under the Assembly Hall and the Assembly Hall itself remain to be heated. It is also desirable to heat from the boiler house the Chemical Laboratory, which at present is heated with stoves. To extend the area to be heated so as to include the entire North Wing and the Chemical Laboratory will require another boiler. It is estimated that all this can be done with an appropriation of \$7375. The items are as follows:

To heat the entire North Wing	\$3,425 00
To heat the Laboratory	2,200 00
For additional boiler	1,250 00
For head deflectors	500 00
Total	<u>\$7,375 00</u>

An appropriation of \$7375 is therefore requested for this purpose.

B. LEGISLATION REQUESTED.

(1) *First Grade Certificates for Certain Graduates of the University.*—In accordance with section 7 of "An act to provide for the issuance of certificates to teachers in the public schools of Texas," approved April 29, 1891, "teachers holding a diploma from a Texas State Normal School or from the Peabody Normal School of Nashville, Tennessee, may teach in the public schools of this State during good behavior, and such diplomas shall rank as first grade certificates, and such teachers shall not be subject to examination by any board of examiners." It is respectfully requested that this section be amended to read: "Teachers holding a diploma from a Texas State Normal School, or from the Peabody Normal School of Nashville, Tennessee, or from the University of Texas (provided the diploma from the University of Texas certifies that the holder has graduated in the School of Pedagogy) may teach," etc. In accordance with section 10 of the same act, "a summer normal certificate, a State certificate, a certificate from a Texas State Normal School, a diploma from a Texas State Normal School, or the Peabody Normal at Nashville, Tennessee, shall be valid anywhere in Texas." It is respectfully requested that this provision be amended to read: "A summer normal certificate, a State certificate, a certificate from a Texas State Normal School, a diploma from a Texas State Normal School, a diploma from the Peabody Normal at Nashville, Tennessee, or a diploma from the University of Texas (provided the diploma from the University of Texas certifies that the holder has graduated in the School of Pedagogy) shall be valid anywhere in the State of Texas." In the same section (10) of the same act it is provided that "any teacher who may hold a diploma conferring on

him the degree of Bachelor of Arts, Bachelor of Science, or any higher academic degree from any college or university of the first class, and who shall have taught for a period of not less than five years in Texas, may upon the payment of a fee of five dollars, which shall be placed to the credit of the State available school fund, receive from the State Superintendent of Public Instruction a certificate of the first grade which shall be valid anywhere in this State during good behavior." It is respectfully requested that this provision be amended to read: "Any teacher who may hold a diploma conferring on him the degree of Bachelor of Arts, Bachelor of Science, Bachelor of Letters, or any equal or higher degree from any college or university of the first class," etc.

The reason for these requested amendments is obvious. As the law now stands it discriminates unjustly against the University of the State. Privileges are allowed the Sam Houston Normal, and even the Peabody Normal of Nashville, Tennessee, which are not enjoyed by the University. Full graduates of the University in Arts, Science, and Letters are now compelled, if they wish to teach, to undergo an examination from which the graduates of the Sam Houston Normal, and of the Peabody Normal at Nashville, Tennessee, are exempt. This is not only a reflection upon the University and an injustice to its graduates, but it is an injury to the State. Persons who wish to teach should be encouraged to take a full and thorough course in the University, that the State may have among the teachers of the public schools as many educated men and women as possible. As it is, persons looking forward to making teaching a profession are discouraged by the present law from attending the State University, because, after getting a diploma, they are compelled to teach five years in Texas before they are exempt from examinations. Even this poor privilege is denied the graduates in the Course of Letters of the University—one of the most thorough courses we have—since it is confined by the law to "Bachelors of Arts or of Science or to higher degrees." On the other hand, persons looking forward to teaching as a profession are encouraged to go out of the State to the Peabody Normal School of Nashville, Tennessee, since the graduates of that school are allowed first grade certificates, and "shall not be subject to examination by any board of examiners."

This discrimination against the State University is probably due to the fact that at the time of the enactment of the present law in regard to certificates there was no provision in its curriculum for instruction in Pedagogy. If this was the reason it no longer exists. The Regents have established the School of Pedagogy and placed at its head Dr. Joseph Baldwin, for many years the President of the Sam Houston State Normal. Graduates of the University who have taken the subjects taught in the School of Pedagogy are therefore not only thoroughly educated men and women, but have also been instructed in the science and art of teaching. They can, therefore, be safely allowed the same privilege granted to the graduates of the Sam Houston Normal, and of the Peabody Normal at Nashville, Tennessee.

(2) *Reinvestment of Bonds past due.*—Attention has already been called to the fact that interest has not been paid on certain State bonds held by the University, owing to the fact that they have matured. (See page —) It is requested that an appropriation be made covering this back interest,

and further that bonds be issued at the same rate per cent to take the place of those held by the University that are past due.

C. LAND.

A bill was introduced at the last regular session of the Legislature to divide the remainder of the unappropriated public domain equally between the common schools and the University and its Branches. Owing to the character of the amendments attached to the bill in committee it failed to pass the House by a few votes. It is earnestly requested that this division be made by the Twenty-third Legislature. It will be an opportunity, probably the last one the State will ever have, to do something on a large scale for its leading institution of learning; to do something on a scale commensurate with the present size and population of Texas, and something in anticipation of her growth in wealth and population in the next fifty years. Moreover, if the University and common schools are endowed with these additional lands now, it will not only remove the lands from the arena of politics, but will largely relieve the people of the State from the growing burden of supporting the common schools and the University from the general revenue.

CONCLUSION.

In asking for the above appropriations for the University, the Regents have no other motive than a desire to discharge a duty that has been imposed upon them by the State. They have no interest in the matter other than the interest of all the citizens of Texas, except so far as their official position makes it incumbent upon them to set forth clearly the present condition of the University, its immediate needs, and recommendations as to how these needs may be met. This is done in the above report. The supplementary appropriations asked for in money (\$47,375) are less than those made by the Twenty-second Legislature (\$50,000). It is presumed that, following the precedent set by that Legislature, the Twenty-third Legislature will readily make the appropriations requested. As a matter of fact they are needed to keep the University on its present basis and to provide for a healthy growth in some of its departments.

It is in the request that the University be given one-half of the unappropriated public domain that the Twenty-third Legislature is asked to do more than its predecessor did. The great importance of granting this request justifies a more specific reason than has been given. This reason lies in the fact that the Constitution of the State requires that "the Legislature shall, as soon as practicable, establish, organize, and provide for the maintenance, support, and direction of a *University of the first class*." In compliance with this constitutional requirement the Legislature has "established and organized a University," but it is respectfully submitted that the Legislature has not yet "provided for the maintenance, support, and direction of a *University of the first class*."

The only way to determine whether a University is "of the first class" is to compare it with those institutions that by common consent occupy this high rank. It will be admitted that the following are entitled to be so considered: University of Nebraska, University of California, University of Pennsylvania, University of Michigan, Yale University,

Columbia College and Harvard University. The following table shows, from the latest information accessible, the annual income, the number of instructors and the number of students of each of these Universities, compared with the annual income, the number of instructors and the number of students of the University of Texas:

Name.	Income.	No. of Instructors.	No. of Students.
University of Nebraska	\$117,500	50	650
University of California.....	229,987	150	918
University of Pennsylvania	224,780	203	1,701
University of Michigan	347,225	130	2,692
Yale University.....	499,720	153	1,784
Cornell University.....	521,133	129	1,537
Columbia College.....	725,885	220	1,756
Harvard University.....	966,026	253	2,660
University of Texas*.....	64,602	34	388

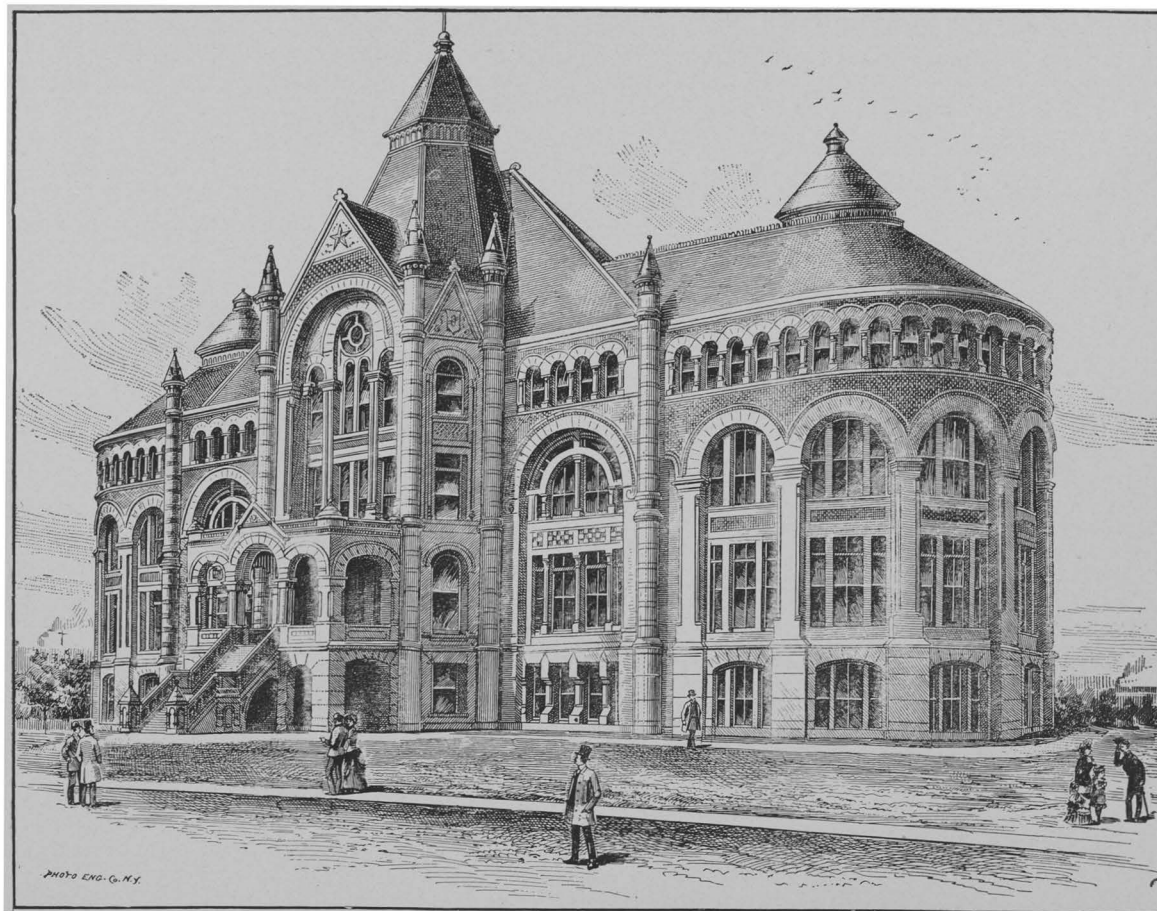

This table shows how much remains in the way of annual income, the number of professors, and the number of students before the University of Texas can be ranked as a University "of the first class."

But the table does not show how superior in equipment these universities are to the University of Texas. They all have imposing buildings, extensive laboratories, large libraries, and many museums. In other words, their "plant" is largely completed, and their income can be applied directly to current expenses and maintenance of a large corps of instructors. Moreover, a number of them are in yearly receipt of gifts from individuals that add to their efficiency and to the attractions they can offer students. During the year 1891 Harvard University received in the way of gifts, \$100,314.04; Columbia College, \$123,248.83; Yale, \$373,860.37; Cornell, \$400,000.

Now it is not expected that the University of Texas can be placed at once abreast of these older and wealthier universities. It is recognized that time is an element in the growth and development of a great institution of learning. But it is respectfully urged that now the State has the opportunity to provide for the future growth and development of its University, so that it may, perhaps within the present generation, stand on a level, in respect to income and equipment, with the other great universities of America, with which it is now, by its claim to be "first class," brought into comparison and competition. The opportunity referred to is the division of the remaining unappropriated public domain between the common schools and the University and its Branches. If one-half of these lands is given to the University, it will probably be ultimately freed from the necessity of applying to the Legislature for supplementary appropriations, and forever secured against the dangers of political changes and the hazards that attend in the case of weaker institutions the struggle for existence. It will then attract donations from

*The income of the University of Texas is the estimated income from the permanent endowment and from fees; the number of professors include those in the Main University at Austin (26) and the salaried instructors in the Medical Branch of Galveston (8); the number of students include those at Austin (365) and those at Galveston (23). This estimate does not include the income, the number of professors, nor the number of students of the Agricultural and Mechanical College.

men of means that will ultimately equal, if not exceed, the bounty of the State. It will then attract the young men and the young women of Texas, who now in large numbers go East or North for their education; and they will have the inestimable advantage of being trained in a magnificently equipped home institution, where, in addition to a thorough liberal or professional education, they will gain an invaluable acquaintance with each other, a love for the history and traditions of the State, a pride in her great achievements and historic men—all of which will tend in the future to knit indissolubly together the people of this great commonwealth.

UNIVERSITY OF TEXAS.—MEDICAL COLLEGE GALVESTON, TEXAS.

MEDICAL DEPARTMENT.

The first annual session of the School of Medicine of the University of Texas was opened at Galveston, in the building referred to in Fourth Biennial Report, October 5, 1891. The Faculty is fully set forth in exhibit L, and the subjects taught by each professor are stated.

The students matriculated during the year 1891-92 were as follows:

Third year.....	4
Second year.....	5
First year.....	14
Total	<u>23</u>

The receipts and disbursements for the construction, etc., of building during the year 1890-91 are set forth in statement of Comptroller, exhibit A, and the Proctor's itemized statement, exhibit D, covering that year. The receipts and disbursements for equipment, support, and maintenance during the year 1891-92 are set forth in statement of Comptroller, exhibit Q.

APPROPRIATIONS REQUESTED.

The Regents request the following appropriations for the two years 1893-94, and 1894-95.

	Year 1893-94.	Year 1894-95.
For salaries of professors.....	\$21,800 00	\$21,800 00
For Demonstrator of Anatomy	1,000 00	1,000 00
For Demonstrator of Physiology.....	1,500 00	1,500 00
For Janitor.....	1,200 00	1,200 00
For Laboratories.....	2,000 00	2,000 00
For Library	500 00	500 00
For incidental expenses, insurance, fuel, gas, water, stationery, printing, catalogue, etc.	5,000 00	5,000 00
	<u>\$34,200 00</u>	<u>\$34,200 00</u>
Less estimated fees.....	2,500 00	2,500 00
Total asked for.....	<u>\$31,700 00</u>	<u>\$31,700 00</u>

LEGISLATION REQUESTED.

A few considerations will render apparent the pressing necessity of some appropriate legislation intended to protect and to promote the success and efficiency of the Medical Department of the University. Proper action in this direction will also contribute materially to the welfare and interests of the State at large. The course of instruction prescribed in the curriculum of the School of Medicine at Galveston is of the very highest grade. It is framed to meet the enlightened demands of the age in the matter of medical education, and in this respect it takes the lead

of all the medical schools in the Southern States. The course comprises three college years or sessions of seven months each, arranged upon a plan of rigorous but liberal instruction in all the branches now considered indispensable to a thorough first class education in the science and art of medicine. It is modeled upon the highest standard known to the profession, and we are justly proud of the fact that our example has been productive of practical benefits throughout the country in the recent formation of an "Association of Southern Medical Colleges," composed of representatives of seventeen medical schools, looking to the establishment of a uniform grade and standard of instruction throughout the South.

But our school is confronted with a condition whose necessities must be met at once in order to enable the State to realize the benefits and blessings of the improved facilities furnished our young men. In spite of the superior advantages, high grade, thorough opportunities for culture and conscientious provision for the very best medical education, now offered at Galveston, hundreds of our young men yearly go out of the State to seek preparation for becoming doctors. Upon investigation it is found that this is not due to the fact that the colleges of other States furnish better facilities for the study of medicine, but just the reverse. This annual exodus of medical students goes largely to fill the halls of third and fourth rate colleges, where the course of instruction is meagre, superficial, and in many instances pernicious and defective. Our medical school has but few students, not because it is undeserving of patronage, but because it is being made the victim of a disastrous competition with the inferior and worthless colleges of other States. Our greatest merit becomes our source of weakness, and we are placed in the humiliating attitude of seeing young men from Texas refusing the high and liberal medical education furnished them at the State's expense rather than submit to the necessary and rigorous tests of thoroughness and efficiency, while they go abroad to obtain the merest smattering of medicine and return to become an actual menace to the health and lives of our people as incompetent and dangerous practitioners.

Now, this can and should be remedied. Our citizens can not be forced by law to send their sons to the medical school of the University. But the State can and should require that the standard of proficiency and learning which is established by the State in the course of medical instruction provided at public expense shall be as nearly as practicable complied with by all who desire to practice the profession of medicine in Texas.

It has long been a matter of humiliating remark among our self-respecting physicians that under the present law Texas is an easy asylum for every grade and species of quackery, incompetency and ignorance in the medical profession. Every year the mountebanks and humbugs of other States, driven out by more salutary restrictions, come among us to prey on our people, debauch public intelligence and corrupt the honesty and dignity of the medical fraternity. In addition to this, our young men are being led off to patronize the inferior medical schools of other portions of the Union, because they are unwilling to comply with the proper requirements of reputable and efficient culture as established by our own University. Under the present law they may attend one session of four or five months at some third-rate college, and then procure a temporary certificate to practice medicine good for one year. They can afterwards

UNIVERSITY OF TEXAS.—JOHN SEALY HOSPITAL, GALVESTON, TEXAS.

attend for one more short session of superficial study and then enter upon full practice as duly authenticated regular physicians, and often they procure certificates upon only one session's study. This is a shame to our civilization and a positive reproach to our intelligence and public spirit as a people. More than that; it is a ruinous injustice to the Medical Department of the State University, and one that should be speedily and effectually removed by a revision of our laws so as to bring the standard of public proficiency in medicine up to the level now prescribed in the course of instruction established in the Medical School at Galveston. This can be done without hardship or injustice to any one now in active practice, and will redound to the manifest protection at once of our people at large and of their highest institution of medical education.

Respectfully submitted,

THOS. D. WOOTEN,
President of the Board of Regents.

PROCTOR'S REPORT.

Exhibit D.

UNIVERSITY OF TEXAS, January 6, 1892.

Dr. T. D. Wooten, President Board of Regents, University of Texas :

SIR — I respectfully submit the following biennial report:

Statement I. Expenditures by me out of the available University fund, from May 17, 1890, to August 20, 1892.

Statement II. Itemized statement of all sums expended by me to this date out of the appropriation of \$25,000 made by the Twenty-second Legislature for a chemical laboratory,

Statement III. Expenditures by me to date out of the appropriation of \$5000 made by the Twenty-second Legislature for completion of central building.

Statement IV. Expenditures to date out of appropriation made by the Twenty-second Legislature of \$10,000 for steam heating.

Statement V. Expenditure to date out of appropriation of \$10,000 made by the Twenty-second Legislature for library.

Statement VI. Statement of all expenditures made by me for the Medical Department of the University of Texas. By order of the Regents no payment on account of the Medical Department has been made by me since February 9, 1892.

Statement VII. Statement of cash received by me and the disposition thereof for the last two scholastic years.

Your obedient servant,

JAMES B. CLARK, Proctor.

STATEMENT I.

General Expense.

Date.	To whom paid.	Vr.	Amount.
May 17, 1890	Geo. Washington, 6 days work on campus.....	1442	\$6 00

EXHIBIT E.

TREASURY DEPARTMENT,
AUSTIN, December 10, 1892.

Dr. T. D. Wooten, President of Board of Regents, University of Texas:

DEAR SIR—In compliance with your request of the 9th instant, I hand you herewith a statement of sales of University lands under the acts of 1889 and 1891 since last report, December 13, 1890:

J. E. Kaufman purchased the south half of northwest quarter, and the west half of northeast quarter of section 23, Lamar county, 201 $\frac{1}{4}$ acres, at \$3 per acre.

J. A. Hayward, purchased quarter section 115, Callahan county, 157 acres, at \$2.10 per acre.

J. A. Hayward purchased quarter section 124, Callahan county, 160 acres, at \$2.10 per acre.

Elias Riddle purchased the north half of southeast quarter of section 3, Grayson county, 80 acres, at \$2 per acre.

T. B. Murrell purchased the west half of the southeast quarter of section 5, Cooke county, 80 acres, at \$2 per acre. (This was a full payment.)

W. F. Ragland purchased fractional section 25, leagues 4-7, Hunt county, 320 acres, at \$2 per acre.

W. S. Smith purchased 80 acres in McLennan county, at \$4 per acre. (No description of land furnished this office. This was a full payment.)

John Kirkpatrick purchased section 2, block 32, Crockett county, 640 acres, at \$2 per acre.

John Kirkpatrick purchased section 3, block 32, Crockett county, 640 acres, at \$2 per acre.

Johan Foit purchased fractional part of section 38, McLennan county, 48 acres, at \$4 per acre.

Joseph Wanka purchased fractional part of section 38, McLennan county, 120 4-10 acres, at \$4 per acre.

Thomas Franklin purchased the south half of southwest quarter of section 3, McLennan county, 80 acres, at \$4 per acre.

D. C. Cogdell purchased east half of subdivision 3, section 6, league 9, in Cooke county, 106 $\frac{1}{3}$ acres, at \$2 per acre.

J. M. Shoemaker purchased northeast quarter of section 8, McLennan county, 160 acres, at \$4 per acre.

C. G. Turner purchased north quarter of section 27, Lamar county, 160 acres, at \$2 per acre.

L. E. Trammell purchased the south quarter of section 27, Lamar county, 160 acres, at \$2.15 per acre.

G. A. Chadwell purchased the southwest quarter of section 6, league 6, Fannin county, 160 acres, at \$4 per acre.

J. S. Fitzhugh purchased the northwest quarter of section 56, McLennan county, 160 acres, at \$3 per acre.

The following accounts were forfeited for non-payment of interest:

J. T. Pilkent, on quarter section 2, Hunt county.

A. J. Thompson, east half of southwest quarter section 6, Cooke county.

E. R. Jackson, section 6, Crockett county.

The following were canceled for non-settlement:

W. C. Merrett, section 2, Crockett county.

W. C. Merrett, section 3, Crockett county.

Very respectfully,

W. B. WORTHAM,
Treasurer.

EXHIBIT F.

TREASURY DEPARTMENT,
AUSTIN, TEXAS, May 22, 1891.

76

Dr. T. D. Wooten, President Board of Regents :

DEAR SIR—Complying with your request, herewith please find statement of University lands leased, as shown by the books of this Department to date, and including the report from this office December 13, 1890, makes a total of 539,360 acres, at three cents per acre, \$16,180.80.

Will say that there are some notices of award on file, aggregating 34,880 acres, the payments on which may be made at an early day, and will be pleased to furnish a supplemental report at any time.

Very Respectfully,

W. B. WORTHAM, Treasurer.

TREASURY DEPARTMENT,
AUSTIN, TEXAS, December 19, 1892.

Dr. T. D. Wooten, President Board of Regents, Austin:

DEAR SIR—Complying with your request of the 17th inst., I hand you herewith statements showing:

First. Land notes held for the State University; and

Second. Amounts received from the sale of University lands since November 30, 1890.

Respectfully,

W. B. WORTHAM,
Treasurer.

*Statement of University land accounts sold under the Acts of 1874, 1879 and 1881,
10 per cent.*

Total amount of unpaid principal..... \$13,996 53

*Statement of University lands sold under the Acts of 1883, 1887, 1889 and 1891,
5 per cent.*

Total amount of unpaid principal..... \$47,718 19

*Statement of amounts, Principal and Interest, received from the sale of University
Lands since November 30, 1890.*

M. A., University of Alabama.

Professor of Law,
ROBERT S. GOULD, LL. D.,
M. A., University of Alabama.

Professor of Mental and Moral Philosophy and of Political Science,
ROBERT L. DABNEY, D. D., LL. D.,
M. A., University of Virginia.

Professor of Chemistry,
EDGAR EVERHART,
M. A., Racine; Ph. D., Freiburg.

* Professors are arranged in the order of their appointment.

UNIVERSITY OF TEXAS.

Professor of Pure Mathematics,
GEORGE BRUCE HALSTED,
 M. A., Princeton ; Ph. D., Johns Hopkins.

Associate Professor of Physics,
ALEXANDER MACFARLANE, LL. D.,
 M. A., D. Sc., Edinburgh, F. R. S. E.

Associate Professor of History,
GEORGE P. GARRISON,
 L. A., University of Edinburgh.

Associate Professor of Applied Mathematics,
THOMAS U. TAYLOR,
 C. E., University of Virginia.

Associate Professor of Latin,
THOMAS FITZ-HUGH,
 M. A., University of Virginia.

Associate Professor of Geology,
FREDERIC W. SIMONDS,
 B. S., M. S., Cornell ; Ph. D., Syracuse.

Adjunct Professor of English,
MORGAN CALLAWAY, JR.,
 M. A., Emory ; Ph. D., Johns Hopkins.

Lecturer on Nervous and Mental Diseases,
ALLEN J. SMITH, A. M., M. D.

Lecturer on Diseases of the Chest,
EDWARD RANDALL, M. D.

Lecturer on Diseases of the Skin,
R. W. KNOX, M. D.

Lecturer on Diseases of Children,
H. P. COOKE, M. D.

Lecturer on Medical Jurisprudence,
T. J. BALLINGER, LL. B.

Tutor in Chemistry,
J. R. BAILEY,
 A. B., University of Texas.

Tutor in Pure Mathematics,
H. Y. BENEDICT.

Fellow in Physics,
G. P. PIERCE.

Fellow in History,
L. G. BUGBEE.

Fellow in Latin,
J. F. ETTER.

Lady Assistant,
MRS. H. M. KIRBY.

Proctor and Librarian,
JAMES B. CLARK.

Adjunct Professor of Mental and Moral Philosophy and of Political Science,
WALTER LEFEVRE,
M. A., University of Virginia; Ph. D., Heidelberg.

Adjunct Professor of Teutonic Languages,
SYLVESTER PRIMER,
A. B., Harvard; Ph. D., Strassburg.

Professor of Pedagogy,
JOSEPH BALDWIN, LL. D.,
M. A., Bethany.

Professor of Greek,
HAROLD N. FOWLER,
Ph. D., Bonn.

Dean of the Medical Faculty, and Professor of Obstetrics and Gynecology,
J. F. Y. PAINE, M. D.

Professor of the Principles and Practice of Medicine and of Clinical Medicine,
H. A. WEST, M. D.

Professor of Materia Medica and Therapeutics,
EDWARD RANDALL, M. D.

Professor of Anatomy,
WILLIAM KEILLER, F. R. C. S., Ed.

Professor of Physiology and Hygiene,
A. G. CLOPTON, M. D.

Professor of Chemistry and Toxicology,
S. M. MORRIS, M. D.

Professor of Pathology,
ALLEN J. SMITH, A. M., M. D.

Professor of Surgery,
JAMES E THOMPSON, F. R. C. S., Lond.

Assistant Professor of Biology,
CHARLES L. EDWARDS,
B. S., M. A., University of Indiana; Ph. D., Leipzig.

Tutor in French,
J. MAGNENAT.

Tutor in German,
JESSIE ANDREWS,
B. Lit., University of Texas.

Instructor in Elocution,
L. R. HAMBERLIN, A. B.

Demonstrator of Anatomy,
GEORGE H. LEE, M. D.

Lecturer on Diseases of the Eye, Ear, Throat and Nose,
R. C. HODGES, M. D.

Respectfully,

WALTER LEFEVRE.

EXHIBIT O.

A MARINE STATION OF BIOLOGY.

In the domain of biology all living things, plants and animals are distributed on the land, in fresh water, and in the sea. It is highly important that all the forms thus differently located should be considered, both in relation to a knowledge of their form and function, and also as of practical benefit or injury to man. In the biological laboratories of the State University, with their properly equipped tables and aquaria, the land and fresh water forms may be studied. For the investigation of the many most interesting plants and animals found in the sea, a station favorably located at the very home of these forms is necessary. In the laboratories of this marine biological station problems relating to the embryology and the adult anatomy of representatives of all classes of animals and of many groups of plants may be studied. In addition, that important range of subjects in economic biology of vast moment to the welfare of the people, can be investigated here.

Such, for instance, is the matter of oyster culture, in which correct methods, founded upon experimental knowledge, are most important. The embryonic oyster, after hatching from the egg, is provided with a ring of whip-like processes placed in front of the mouth, by means of which, when rapidly lashed, it swims about. Thus the millions of little oysters, as they develop and grow in size, and form protecting shells, are distributed far and wide. Then the swimming apparatus is lost and the bivalve, although yet very small, settles down upon some hard shell or other firm substance projecting above the mud. If at this stage no proper resting place be found, the little oyster sinks into the mud and is buried. The natural resting place of the young oyster is upon the older shells already on the oyster reef, although any hard substance sticking out of the mud will answer the purpose. The greatest oyster industry of the world was formerly in the Chesapeake Bay. Here the oystermen went on year after year removing the oysters, and instead of throwing the shells back into the bay, they were burned for lime. This industry was thus threatened with extinction, when Professor Brooks, who had studied the life history of the oyster in the marine laboratory of the Johns Hopkins University, called the attention of the Legislature of Maryland and the gentlemen of the oyster companies to the facts above cited, and under the direction of biology this important food supply is again increasing in the waters of the Chesapeake. This is only one illustration of how often practical results for the amelioration of mankind follow from the solution of some problem undertaken, in the first instance, for the advancement of science.

The shad, likewise, threatened with extinction, was rescued in the aquaria of the marine stations of the United States Fish Commission. This delicious fish was taken not only for the flesh of the adult, but for the famous roe, to the excellence of which every epicurean who has been, in spring, in the middle Atlantic cities, can testify. It is known to science that the greatest mortality among fishes is during the few weeks after hatching. This is especially true of the shad, for the eggs are laid in inland creeks and countless numbers fail to survive the multitude of enemies in the journey between their birthplace and the sea. So the fish commission built hatcheries, artificially fertilized the roe, and then reared the young until strong enough to shift for themselves, and turned them loose toward the ocean. Each year statistics show not only a great increase in the amount of shad and roe taken, but also in the numbers of the fish returning to spawn.

The coast of the great State of Texas, washed by the tides and currents of that magnificent inland sea, the Gulf of Mexico, offers at the very doors of the State University an unrivaled opportunity for the establishment of a marine station. Strange animals and plants of a fauna and flora but little known, invite the research of the student and investigator. Here, too, is an oyster question, faced by unknown and peculiar perils, anxiously awaiting rescue. Is it the creosote, or the silt, or what is it, that has worked such havoc in the Galveston beds? Then, too, the infant lobster industry must be guarded, and indeed all food producing marine animals and plants must be encouraged to yield nourishment to supply the demands of the ever increasing population of Texas. In no other

place than a properly equipped marine station can these matters for scientific investigation and for the welfare of the general public be attended to.

There must be commodious laboratories with aquaria supplied with running sea water, where the animals and plants to be studied may be kept alive under many and varied conditions. Tables, with dissecting instruments and microscopes to reveal the wonderful organizations of forms, from the highest vertebrates to the bits of jelly-like protoplasm constituting the simplest plants and animals. Sailboats and rowboats, with townets for the collection of shallow water forms within the bay; and a steamer, with dredges, tangles, etc., for the exploration of the deeper waters of the Gulf. Thus can be established in Texas a great marine station, vying with those of England, Germany, France, Italy and Austria, and also with those of the Johns Hopkins, Harvard, Pennsylvania, Chicago and Stanford Universities, and of the United States Fish Commission. Opportunities for study and research may be offered the students of Texas, and investigators from abroad attracted to our midst. The lovers of the oyster, the crab, the lobster, the shrimp, and of all the delicious fish that swim to our shores—and where in Texas are they not?—may here find the friend in need.

It is recommended that the present Galveston quarantine station and the land surrounding it, now reserved by the State, being of no further use to the quarantine department, be assigned by the State to the University of Texas, for the purposes of a Marine Biological Station.

Further, that the sum of \$5000 be appropriated for the equipment and current expenses of such Marine Biological Station, the estimate being based upon the following items:

Steam launch	\$3,000 00
Sailboat.....	400 00
Rowboats	100 00
Aquaria.....	300 00
Tank and pump for salt water	200 00
Tables and woodwork	200 00
Net, dredges, and other collecting apparatus.....	400 00
Current expenses.....	400 00
	<hr/>
	\$5,000 00

There are a number of small things and some indefinite expenses, like help, coal, etc., which can be covered by the last item.

In conclusion, it is recommended that the Marine Biological Station be constituted a part of the School of Biology of the University of Texas, and that the professor in charge of said school be made the Director of the Marine Biological Station.

CHARLES L. EDWARDS,
Professor of Biology.
