Professor S. A. Lynch, Head
Department of Geology
Texas A. & M. College
College Station, Texas

Dear Mr. Lynch:

In reference to the talk we had in San Antonio, I wish to call your particular attention to Dr. Peter Misch who is, I believe, still available for teaching. Misch is now in this country, previously he was professor in China and there made a very good impression on some of the American geologists stationed there with the armed forces during the war. He is a German refugee and has excellent training. I have met Misch in Los Angeles and got a very favorable impression of his personality. He is also recommended by Marvin Weller of Chicago. I do not have his present address handy, but I believe you can get it from Marvin Weller. I have written to Charlie Bell about the several questions which you wanted answered.

I am also enclosing a copy of a letter I received from an Australian. I do not know the man nor do I know of his work at present. I am merely giving you that letter as a preliminary notice. I shall find out about him more at a later date. ✓

With best regards,

Sincerely yours,

H. B. STENZEL
Geologist
