Dear Henryk:

For some time now, it has been apparent that we have not been getting real news coverage of the Gulf Coast for The Micropaleontologist. Doris Malkin has been the correspondent, but whether as a result of her recent marriage or just too much to do, her reports have been few and far between.

The area is far too large and important to be slighted and we are very anxious to have it covered adequately. Consequently I would greatly appreciate having your ideas as to whom should be invited to take over this task for the Gulf Coast.

This brings you kindest personal regards.

Sincerely yours,

Brooks
