## Popular Numbers Feature Program of Longhorn Band

Many Talented Musicians  
Are Members of Uni-  
versity Band

### SECOND SUMMER

Classical and popular numbers were features of the first program this term given by the Longhorn Band at the Open Air Theater last night.

This is the second summer a band has been organized on the campus. Direction of the band has been held both summers by Burnett Pharr.

The band this summer has been composed of quite a few talented musicians. Some of the members have had direction of a band themselves, among these are: McCulley from Edenburg; Matterson from Laredo; Villers from McAllen; Marvin Baker from Gonzales.

Baker will be a member of the Longhorn Band during the coming long session. Six other members of the band now will be here in the fall term.

The program included the following numbers: coronation march; viking march; I Love You; selections from Roe Marie; Bennett's Triumphal March; In a Little Spanish Town; concluding with The Eyes of Texas.

During the intermission "Red" Sheppard and Thad Sanders entertained. They featured popular songs, one of which was "The Old Accordion Man."

## Newman Club Hears Eby Talk on Ideals

"The subject I am going to mutilate is 'Old Loyalties in the New Age,'" Dr. Frederic Eby who is the director of the summer school of the University, said Sunday morning in opening his talk before the Newman Club, at its regular meeting. "Of course, this age is the most wonderful and greatest of all ages in some respects. But we do not think today—we live too fast—everything is on too large a scale—there is little or no time for quiet—for meditation."

Dr. Eby then quoted a poem which accused the modern world of doing away with form in art, time in music and meter in verse—leaving Futuristic motifs, Jazz and Free verse. The bit of doggerel in addition, cleverly chides the twentieth century for its freak laws, that abolish sex, morals and facts, and are characteristic of modern legislation.

Dr. Eby emphasized the fact that the heyday of art and poetry was during the middle ages when wealth was scarce, but when loyalty to unity, and religion, truth and beauty was rampant. "These were old loyalties then, they are older now, but the present generation can climb up its rung in the ladder of civilization only by remaining loyal to these very old ideals. The general revolt against past conventionalities will produce a strong future."

After Dr. Eby's talk, officers for the second term were elected: president, Leonard Canavespi; vice-president, Lorena Malone; secretary, Lucy Hermes; treasurer, Louis Kocurik; historian, Charline Lallier; sergeant-at-arms, Martin Tudyk.

### THE UNIVERSITY NEWSPAPER

Occupies a particularly important part in the life of every student and faculty member.

Schedule changes, important information about courses, theses, papers due, announcements of lectures and entertainments, statements of new official rules and regulations—all of these things are recorded only in The Texan.

Besides, there is the complete news report of every current event on the campus.

THE DAILY TEXAN

## Committee Called to Provide Activities Funds for Summer

Because of the failure of a great many students to pay their student fee for their student activities fee for the second term, Dean V. I. Moore has called an emergency meeting of the committee on summer activities for this afternoon, to determine what course they will take in regard to continuance of activities for the remainder of the summer.

Due to the passage of the Pollard Fee law last year, the University could not charge any required activities fee for the second term of summer school, but was forced to make the payment optional with the student. This fee was to cover the cost of summer entertainment, in-

cluding lectures, recitals, and dramatic performances, and The Texan.

Of the students remaining in school the second term, only about 400 availed themselves of the privilege of the blanket tax. Since there were so many students who did not pay the fee, there is not enough money to carry on the activities for the remainder of term.

Since the funds are insufficient, the committee on entertainment was called to determine just what features of the program will be cut out.

## SONG PROGRAM TO BE GIVEN

Quartet Featured in Recent  
University Choruses to  
Sing

Featuring the quartet that sang for the recent presentation of the University Choruses, "Stabat Mater," the regular weekly program directed by David Griffin will be composed of quartets, trios, and duets, assisted by the entire chorus.

Mrs. Fred Jones, soprano, Zuleme Herff Simpson, contralto, Charles Stone, tenor, David Griffin, baritone, with Norma Owen at the piano will appear.

The program in full follows:

Lucia, sextet, quartet ar..... Donizetti  
Mesdames Jones, Simpson; Messrs. Stone, Griffin  
Madame Butterfly duet ..... Puccini  
Mr. Jones, Mrs. Simpson  
Forza del Destino ..... Verdi  
Mr. Stone, Mr. Griffin  
Faust, trio finale ..... Gounod  
Mrs. Jones, Mr. Stone, Mr. Griffin  
Samson and Delilah ..... St. Saens  
Mrs. Simpson  
Naughty Marietta ..... Victor Herbert  
Mrs. Jones and University Chorus  
Ah, Mimi, duet ..... Puccini  
Mr. Stone, Mr. Griffin  
La Ci Darem ..... Mozart  
Mrs. Jones, Mr. Griffin  
Bella Figlia ..... Verdi  
Mesdames Jones, Simpson; Messrs. Stone, Griffin  
Norma Owen at the piano

## Library Is to Remain Open

Repairs and Addition of New  
Books Between  
Sessions

According to E. W. Winkler, librarian, the main library will remain open between the summer session and the long session. Students who do not go home between sessions will have an opportunity to become familiar with books in the library other than source books. The hours are 9 to 5 o'clock daily.

It is estimated that 10,000 new volumes at a total cost of \$30,000 will be added to the thousands that are already on the shelves before the opening of school in September.

A number of repairs will be made before the long session begins.

The law library, engineering library, and all other departmental libraries will remain closed during these weeks.

## DESPONDENT DOG DIPS TO DEATH IN LAKE DEPTHS

Doggone!

Something evidently got him down. Maybe Fido got his grade book yesterday and was disappointed.

Anyway he did the awful deed. He committed suicide by jumping into Beck's Lake.

Maybe he thought a long time before he decided to meet his end in just that manner. Why he even might have stood on the corner by the Methodist church sniffing the breeze and digesting the gas that escapes there or maybe he tried the gas of a well-known prof on the campus as he stood beneath the windows of Garrison Hall before he jumped into the icy depths.

Intimations point to the fact that a great many of the programs will be called off all together, and that many others will have so little money with which to prepare that presentation will be almost impossible.

In an attempt to interest students in the necessity of paying the optional fee, each student who did not pay the tax has been mailed a card asking him to pay it at once. It cannot be determined how many students will respond to the call, Dean Moore said.

In the first term, the fee was made compulsory, but with the second term the fee of \$1.50 was made optional with the students.

## Assistant Deans of Women Chosen

Appropriations Made by Re-  
agents for Additional  
Assistants

With the election of Miss Dorothy Louise Gebauer, of Henderson, Kentucky, to the position of assistant dean of women, and Mrs. Frances E. Goldbrick, as assistant to the dean of women, the women's disciplinary departmental organization for the coming year has been completed.

Miss Gebauer was elected to fill the vacancy caused by the death of Mrs. Florence Bell last May.

At the last meeting of the Board of Regents, an appropriation for the salary of an additional assistant to the Dean was allowed. There has been heretofore three members of the staff, but the regents allowed for another assistant to aid in the work of Miss Lula Bewley, the present assistant. Duties of the various deans have not as yet been determined. Miss Ruby Terrill, dean of women said.

Miss Gebauer received her B. A. degree from Oxford College, of Oxford, Ohio, and her master's degree from Columbia. She taught school in Ohio and Indiana for seven years, and for three years served as dean of women at Wilmington College.

Miss Gebauer took special work in sociology, history of women, and guidance of men, while attending college of Columbia. She comes commended by Miss Sarah Sturtevant, director of courses preparatory being deans of women.

Mrs. Goldbrick, formerly Miss Frances Ottley, was a teacher in Austin schools for 20 years, and is now visiting in Europe.

## Dean of Pharmacy Visits in Austin

Making detailed arrangements for the removal of the College of Pharmacy to the Main University campus at the beginning of next long session, Dean Gibler of the College of Pharmacy has been in Austin for the past two days.

Dean Gibler has been consulting with the University Chemistry department, and with George Stephens on the space to be occupied when the College of Pharmacy comes here.

It was arranged that the pharmacists come to the Main University by a decision of the University Board of Regents when they met here last week.

## Pittenger Talks on Texas School Building Types

Lighting, Seating, and Floor  
Plans Discussed Wed-  
nesday

### AT LITTLE CAMPUS

Tracing the gradual growth of types of architecture, floor plans, lighting arrangements, and seating facilities from the earliest school buildings of America down to the most recent in the state of Texas, Dr. B. F. Pittenger, professor of educational administration and dean of the School of Education in the University, delivered a lecture on "The Development of Public School Buildings and of Seating Equipment in Texas" at the Little Campus Theater Wednesday afternoon.

The talk was illustrated throughout by slides which Dr. Pittenger had specially prepared by the Visual Instruction Bureau to portray various types of building and equipment.

Four Parts  
The treatment was divided into four parts, each successively concerning the architecture, the plan, the lighting, and the seating.

Dr. Pittenger began the discussion with a review of the part played by the old missions in the history of education.

"Not very many people realize," he said, "that these missions were the first school buildings established in America by white men. They were intended largely for the education of the Indians. Classes were held in the interior where the arched cloisters stretched above. This was the beginning."

### Pioneer Schools

"The school houses that were in use in pioneer Texas were of four kinds: The old log school house was common in East Texas and still may be found there. The brush-arbor, consisting of a mere framework of poles covered over with a deep thatch of limbs, was very widely used; the persons sitting often on the bare ground.

"Third, the adobe shack was extensively used in the West. It was a crude building. And then homes were always in use.

"These were pioneer schools and they conformed to the community models of pioneer architecture, especially after the various types of homes then being built."

The lecture was amply illustrated with graphic pictures, one and sometimes several slides being presented to bring out one point of the talk.

### Residential Types

"The school buildings about 1805 resembled in design a huge, cumbersome, country hotel. This type was in use as late as 1885 by the academies."

"As a rule, the earliest architecture of the schools was determined by the higher class of residences, bay windows, breaking chimneys, and irregular walls that were then found in the expensive homes being employed to a large extent.

"Later in the development of this tendency the so-called institutional type of building became popular, especially since it was less expensive. This was very much like the Insane Asylum at Austin."

### Colonial Features

"Then a mixture of the old colonial features began to creep into the school buildings, and still later a more modern tendency at arrangement of windows, with a corresponding solidarity of design."

"The John Ball High School at Galveston is a building of fairly recent design but is quite clearly suggestive of the institutional type of building, the two wings, the dome, (Continued on page 4)

## Roach Appointed as Spanish Instructor

Eloise Roach has been appointed instructor in the Spanish department of the University for the second term of the summer session.

She is a Phi Beta Kappa student of the University, getting her B.A. degree in August of last year. She is head of the romance language department in Temple High School during the long term.

## Committee Advises Student Selection of Music Leaders

Jack-Knife Man  
Saturday Night

Open Air Theater Will Feature  
Humble Whittler  
Film

Saturday night the Open Air Theater will feature the "Jack Knife Man," a motion picture film composed of seven reels. The story is a delightful one of life on the Mississippi River. It is taken from Ellis Parker Butler's story of spiritual achievement, filmed in the exact locale on the Mississippi River. The story centers around the love which the humble whittler has for his fellows in the quaint midwestern hamlet typical of the life of that section of the country.

The characters are taken from real life, the central one being the author's own uncle. The story is filled with the pathos and kindly humor of the old man of the Mississippi who seems to take the greatest pleasure of those around him as he spends his life on the shanty-boat on the river.

## University Cruise Credits Uncertain

Reasons Are Given for Not  
Counting Credits Acquired  
on Cruise

"The University Cruise around the World is all right for research," states E. J. Mathews, registrar, "but it is too uncertain for the University to give credit for the work done on the trip." The Cruise is not backed or guaranteed by any standard institution and the conditions are therefore very unstable.

Mr. Mathews gave several reasons as to why credits from the Cruise would not be counted. In the first place, it is a commercial enterprise. The supreme command lies in the "man with the purse" and not with the educational people in charge, for they are limited by the fact that they must make money on the equipment and provisions.

Another reason that the Cruise is not trusted in an educational way is that there is difficulty in making proper provisions for study on the boat. Libraries are ill fitted for the students' use, and there is an unfavorable atmosphere in the overcrowded and rushed boat. Then again, there is no continuity of a teaching staff and a great amount of uncertainty as to who is to teach the various subjects.

Because of these reasons, the University will not grant credit on the year. Measures will be taken, however, work done on the World Cruise next year, to grant the student who have made the trip in preceding years some credit on their work.

## Jackson Appointed to English Position

Dr. Jess Hamilton Jackson of Alexander City, Alabama, has been appointed by the Board of Regents of the University to be acting professor of English during the coming year in the absence of Dr. J. B. Wharey. Dr. Wharey has been granted a year in which to study and travel.

Dr. Jackson is traveling fellow of the American Scandinavian Foundation and is spending this summer in Europe. He taught English during the past several years at Harvard. He has also taught in the University of Alabama, Barnes' School of Boys in Montgomery, Alabama, Radcliffe College, and Boston University, and has been principal of elementary schools in Birmingham, Ala.

### PERSONALS

Leslie King motored to San Antonio last week-end.

Helen Houston, and her mother, of Corsicana, were the guests of Jack King for a few days this week.

## Money Is Appropriated to Pay for Musical Direction

By selecting Burnett Pharr as director of the Longhorn Band for the coming year, and appointing him to rejuvenate the University Orchestra, which has been inactive for some time, the University committee on musical organizations has not attempted to take all authority from the hands of the students and set up a faculty control of student activities, according to Dean V. I. Moore, member of the committee.

By the apportionment of money to musical organizations of the University by the Regents, the faculty has some authority in expenditures of money in the right way. It is the purpose of the committee to advise in the selection of organization leaders, but at all times it attempts to follow the wishes of the members of the clubs, Dean Moore continued.

### Money Allowed

At the last meeting of the Board of Regents \$1,000 was appropriated for instrumental direction, and \$1,500 for directing vocal music in the University for the coming session. With the money for instrumental music, the salary of a director of both the Longhorn band and University Orchestra, and money from the Blanket Tax that has been used for that purpose in the past may be devoted to purchase of new band equipment.

The money allowed for vocal music is the most that has ever been given for that purpose since the department of music was abolished three years ago.

## Degree Candidates Report to Deans

According to Dean T. U. Taylor, Chairman of the Diploma Committee, all those who are prospective candidates for the degree of Bachelor of Business Administration in August should go at once to Dean J. A. Fitzgerlad and sign a diploma card. All candidates for the degree of Bachelor of Science in Education in August should go at once to Dean B. F. Pittenger and sign their diploma cards.

## Marberry Speaks to Educational Club

Phi Delta Kappa fraternity will hold its regular meeting this evening at 6 o'clock, according to acting president, J. W. Baldwin, professor of Education.

After discussions and talks by the members, Dr. James O. Marberry will address the meeting on "The Administration of Public Schools in Centralized and Co-ordinated System."

## Visiting Professor Writes on Sociology

Dr. Carl A. Dawson, professor of sociology and director of the School of Social Workers of McGill University, Montreal, Canada, has been teaching both terms of the University summer school.

Dr. Dawson, in collaboration with Dr. W. E. Gettys, chairman of the department of economics and sociology of the University, is engaged in writing a sociology text book for use in introductory classes. The book is expected to be ready for use in 1928. It will be entitled "Sociology of Community Life."

Professor Dawson is interested in problems of racial movements in the United States, and particularly in Texas. He has had published several articles in the sociological field.

## Today's Program

6 p. m.—Phi Delta Kappa lecture.  
8 p. m.—Campus concert, Open Air Theater.

## DISARMAMENT— A PERPETUAL PROBLEM

AFTER limiting the term "disarmament" to mean any degree of limitation or reduction of armed forces or instruments of war but not, however, to include the obviously humanitarian agreements outlawing certain methods and means of fighting, Dr. P. B. Potter, professor of political science from the University of Wisconsin, recently gave a very illuminating discussion of the problems that the world is now faced with in regard to the adoption of certain prohibitions on the various nations in the accumulation of the materials of conflict. In general he showed that world-wide agreement is an impossibility; that it is neither practicable nor necessary; and that action by the more powerful nations is all that can be hoped for at the present time. He discussed the disarmament question from both the historical and current points of view, showing that many considerations of a very delicate nature complicate the present situation and outlining the positions of the conferring nations in regard to their attitude toward naval disarmament in particular.

The clear cut presentation of issues served to clarify the problem with which the diplomats at Geneva are now confronted; but more significant than the material presented was the method used in presenting it. His exposition served to bring forcibly to the attention of those who heard him the fact that the Geneva conference, or any other conference of a like nature, cannot succeed in solving the difficulties for all time to come. As he said, "I'm not trying to settle questions but to raise them. They are far too complicated for settlement. But they should be faced now as the world is to be burdened with the disarmament problem for fifty years to come."

These observations should be kept in mind by anyone who tries to acquaint himself with the nature of complex international difficulties. An intelligent analysis is always of more value to the individual and goes much farther toward the solution of the problem than an unintelligent and inadequately based opinion hazarded on the slightest provocation. The Geneva conference will be successful in so far as the contracting parties are able to compromise their differences; future conferences for the same purpose will fail or succeed as rational thought is conscientiously given to the complications extant by the citizens and leaders of the several nations of the world.

## UNIVERSITY MUSIC

WITH the definite announcement of the selection of Burnett Pharr to lead the Longhorn Band and to reorganize the University orchestra, the long session committee on musical organizations has launched the first part of its program for the ensuing year. The director of the Men's and Women's Glee Clubs and the Choral Club will not be selected until a later date.

The fine arts at the University of Texas have been neglected for too long a time. The measures that are now being taken to put them on a firmer basis by means of money appropriated from the student life fund, though not such as to be considered adequate for a school of the size of the University, constitute a distinct advance over the wholesale neglect of the past. The \$1000 thus provided should go far toward eliminating much of the regrettable misunderstanding that has arisen in the past as a result of the inefficiency and decentralization of the support given to the band.

The committee has attacked the matter in the right way by choosing a man who has the confidence of the present members of the band. It is likely that they will choose equally well in providing a director for the vocal organizations. Whatever is done will not be too much; and, if it succeeds in arousing additional interest in vocal and instrumental work, it will be money well expended.

## From Other Pens

### ENDORSEMENT

THE elevation of Dr. H. Y. Benedict to the presidency of Texas University meets with the teetotal approbation of State Press. Verily, if it had been a political office this column would have gone on the stump for Dr. Benedict. This notwithstanding there are differences between the new president and S. P. The latter believes that all schools above the grammar grade should major in athletics, while Dr. Benedict holds to the rather medieval theory that a school should devote itself primarily to scholarship. This is because President Benedict himself is a scholar and because S. P. is an athlete. The East is East, and the West is West, and never the twain shall meet, declares the poet, speaking hemispherically. It is not that way between President Benedict and the author of these lines. We can sink our partisanship when we meet and discourse courteously, one for one side and the other for the other. We have done that more than once, and State Press has retained, after such contacts, a lively admiration for the scope and clarity of Dr. Benedict's learning. The latter is given to several of the intellectual activities, not in a tutorial way, but in the cultural sense. He enjoys astronomy perhaps more than the less secular and more imaginative sciences and was tickled all to pieces when the late W. J. McDonald of Paris gave a million dollars to the University for astronomical equipment. It is a fact that Dr. Benedict and State Press differ widely on some aspects of astronomical observation. The doctor accepts the theory and affirmations of Copernicus, Galileo, and Laplace in respect to the form of the earth, while S. P. prefers to go it alone. Dr. Benedict holds that the earth is a globe, while State Press contends that it is radish-shaped and flat at the top, with pie-pie canes to hold the oceans in. Dr. Benedict, like all the cartographers who accept the globular theory, holds that the ocean is curved. State Press holds that not even terrestrial necessity or gravitational power can curve water and keep it curved. State Press denies that any ship ever circumnavigated the earth parallel to the so-called equator, like an ant might circumnavigate an orange. Dr. Benedict and all the orthodox scientists affirm this. State Press holds that a ship which comes back from where it started and reports having sailed around the world only sailed around the top of the world, like a fly circles the scalp of a baldheaded man. All the ordained authorities assert that the oceans are held in place by some mysterious pull conveniently called centrifugal attraction. State Press asserts that if the earth were a globe the Northern oceans would rush to the south and drain the Arctic regions dry, for the reason that the weight of water compels it to seek its level. When we speak of sea level we mean what we say, usually forgetting that the sea couldn't be level if it were curved. With these exceptions, Dr. Benedict and State Press are completely in accord. We differ, but each respects the other's conviction.—State Press in the Dallas News.

## COTTON WEEK IN AUSTIN

FOR a week recently Austin was the scene of one of the most important meetings ever held in the South when experts from foreign countries as well as Texas and the United States assembled here to discuss the various problems involving the growing, marketing and manufacturing of cotton. The informative sessions that were held under the auspices of the School of Business Administration of the University of Texas, and the credit for having secured such an array of internationally prominent authorities on cotton to appear on the "Cotton Week" program goes to Dr. A. B. Cox, who engineered this very successful undertaking.

It is understood that "Cotton Week" is to become an annual event for Austin. The unusual success of the initial meeting warrants the

continuance of it each year. The importance of holding such a session can hardly be estimated because the very nature of the problems dealt with are inextricably interwoven with the economic and business life of Texas.

Nothing is so vital to the welfare of Texas and most of the South as cotton. The problems of this great industry are many and extremely difficult of solution, and all efforts that are made to get at the solution of them deserve the heartiest support and co-operation. Fortunate, indeed, were we to have the different aspects of the cotton industry discussed in our midst by men whose ideas and thoughts along these lines are admittedly among the best. The theory has long lodged in the minds of a few that the problems surrounding cotton will never be solved until the whole industry—and this applies especially to the farmer—has been stabilized and placed upon a scientifically and economically sound basis. All such meetings as that held in Austin during the past week tend to educate all who have to do with cotton along sound theories that rule the industry.

The uninformed have a way of expressing opinions on the various aspects of the cotton industry about which their knowledge is scarce. The blame for fluctuations in prices, as well as other disagreeable and unfortunate phases of the industry, is often placed erroneously. One of the greatest handicaps to the prosperity of cotton is the lack of co-operation between the grower, the broker, and the manufacturer. The different factions do not understand each other and the problems that confront the other fellow. Bringing about a closer understanding in these matters and smoothing out ward better co-operation, which means a healthier condition throughout the cotton industry.

## Official Notices

BEGINNING Tuesday, July 26, the following schedule changes will be effective:

History 162, at 9 o'clock, will meet in G. H. 113 instead of 109.

History 172, at 10 o'clock, will meet in G. H. 113 instead of 109.

Spanish 18c, at 9 o'clock, will meet in G. H. 109 instead of 113.

Business Administration 250, at 10 o'clock, will meet in G. H. 109 instead of 113.

Physics 422b, K. Hall 5, will meet at 10 o'clock instead of 9 o'clock.

English 1c.5, a new section, will meet at 8 o'clock in Ed. B. 210.

Spanish Ac.3, a new section, will meet at 9 o'clock in M. B. 208.

Economics 1c.4, a new section, will meet at 8 o'clock in G. H. 322.

Economics 1b.4, a new section, will meet at 9 o'clock in G. H. 1.

E. J. MATHEWS,  
Registrar.

M. B. 403 WILL soon undergo repairs, and therefore, beginning Tuesday, July 26, the classes assigned there will meet as follows:  
Latin 1a in G. H. 300.  
Latin 1b in G. H. 300.  
Latin 3c in G. H. 300.  
Latin 5a, b, c, in M. B. 206.  
Latin 8a, b, c, and 18a, b, c, in G. H. 300.

E. J. MATHEWS,  
Registrar.

SENIORS who are majoring in Economics will please call at Garrison Hall on or before August 1st to make arrangements with regard to their major examination.

E. E. HALE

ENGLISH 1b.3 meeting at 10 o'clock in G. H. 319 should be and is now changed to 1b.4.

English 1b.4 meeting at 11 o'clock in G. H. 303 should be and is now changed to 1b.5.

English 2a.2 meeting at 10 o'clock in M. B. 315 should be and is now

changed to 2a.3.

English 2c.4 meeting at 11 o'clock in G. H. 319 should be and is now changed to 2c.5.

E. J. MATHEWS,  
Registrar.

PHILOSOPHY 103 will meet in G. H. 203. Philosophy 172 will meet in G. H. 213.

E. J. MATHEWS,  
Registrar.

PROSPECTIVE cruise-around-world students will please take notice that the Committee on Admission from other Colleges of the University of Texas has definitely voted to promise no credit on any work taken on any cruise.

E. J. MATHEWS,  
Registrar.

NOTICE OF change in activities program of July 26-30:

Friday, July 29: 8 p. m.—Lecture, "Masterpieces of Greek Literature," illustrated, Professor H. J. Leon.

Professor Melvin's lecture replaced by that of Professor Leon.

PHI DELTA KAPPA MEETING:

At the regular meeting of Phi Delta Kappa fraternity this (Thursday) evening at 6 o'clock the leading number on the program will be an address by Dr. James O. Marberry, on "The Administration of Public Schools in Centralized and

## Book Returned to Lib After Charge of Eleven Years

Claiming the honor of out-doing Enoch Arden in self, a book by Diego de San Pedro, entitled "Carcel de Amor," has just been turned into the library after an absence of almost eleven years. This book of Spanish fiction was taken out by Miss Lila Casis, professor of Spanish, on December 9, 1916. Long forgotten, the book was returned Tuesday.

Co-ordinated Systems."

J. W. BALDWIN

ALL CANDIDATES for the degree of Bachelor of Business Administration in August should go to Dean Fitzgerald at once and sign a diploma card.

All candidates for the degree of Bachelor of Science in Education in August should go to Dean Pittenger at once and sign a diploma card.

T. U. TAYLOR,  
Chairman Diploma Committee

THE NEWMAN CLUB will hold a watermelon feast Friday evening on the lawn. All members are cordially invited to attend.

# SOCIETY

## Zinnia Show

The second annual zinnia show sponsored by the Violet Crown Garden Club, will be held at the Woman's Building Monday, August 1. Mrs. Ewell Nalle is chairman of the committee in charge of the affair. The exhibition will last from 10 o'clock in the morning to 10 o'clock that night, and prizes have been divided into four divisions with three prizes to each division. The show is open to amateur growers of the flowers.

Assisting Mrs. Nalle are: Miss Martha Lockett, Mrs. Dudley Fisher, Mrs. Niles Graham, Mrs. Herman Pressler, and Mrs. Dalton Richardson.

George Maxwell motored to Waxahatchie last week-end.

Harry Miller of Austin visited in Cleburne last week-end.

Raymond Wofford visited home-folks in Fort Worth recently.

Z. R. Robinson spent several days in Jewett.

Vivian and Maymie Griffin had their mother as their guest this week. Mrs. Griffin lives in Gonzales.

Mrs. Vacker of Gonzales visited her daughter, Virginia, at the Woman's Building this week.

Lois Samera of Annex B of the Woman's Building visited in San Antonio Sunday.

Opal West was the guest of Sofie Smith at her home in San Antonio recently. Both of these students are attending summer school for the second term. Miss Smith is in the Registrar's office.

Annie Laurie Fowler has returned from a few days' visit in Houston. Miss Fowler teaches school in Houston, although her home is in Mississippi.

Nancy Pressley has returned to her home in Dallas. Miss Pressley stayed on the campus a few days after the end of the first term of summer school.

Sybil Thomas has arrived on the campus to attend school for this term. Miss Thomas is a sister to Opal Thomas who has been here all summer. She will live at the Woman's Building with her sister.

Hattie Turner spent last Sunday in San Antonio.

Margaret Horworth has returned to the campus after several days spent with home-folks in Waxahatchie.

Helen Scully is ill at the St. David's Hospital. It is reported that her case is very serious.

Emily See has been in Seton's Infirmary for the last week for an operation for appendicitis. She is now doing very nicely.

Miss Mary E. Decherd, instructor in Mathematics, has left for Junaluska, North Carolina, where she will spend the rest of the summer. She will study and teach in the summer school there conducted by the Methodist Church.

DeWitt Reddick, instructor in Journalism for next long session, is visiting on the campus.

## Enjoy Cabin Party

Despite rain last week-end a group of seven young women enjoyed a cabin party at Oak Lodge, a cabin in the Botanical Gardens which is maintained by the Women's Athletic Association.

Informal games, dancing and music were diversions for the group.

Girls participating in this outing were Bert Black, Opal West, Tiny Whitaker, Fannie Boyles, Bessie Hammond, Sofie Smith, and Gladys Whitley.

Mrs. N. D. Longnecker, of Beaumont, a former student of the University and a member of Phi Mu sorority, is visiting her father Dr. E. C. Golaz. She will leave this week-end for a trip to Colorado.

Doc, Ekdahl, Varsity trainer, is in Austin for the week. He will go to Kerrville next week where he will give a course in Rifle Rang Work at Doc Stewart's Camp.

Carl Jockusch of Galveston, a student in the University last year, left about the middle of July for a tour of Europe. He will not return for the fall term, but will be back for the second term next year.

Jerry Armstrong Rickles, a pre-med student here for the first term of summer school, has accepted a position in the office of a prominent physician in San Antonio for the coming year.

Mrs. Dorothy Broad Beard is spending a few days vacation in Tyler.

Mary Jo Young of Corsicana has been the guest of her sister Tillie Frances Young this week. Miss Young will be a freshman in the University next year.

Stanton Hollowell of San Antonio passed through Austin Wednesday on his way to Boulder, Colorado. He may attend school there, next year, but in the meantime he will visit at the Sigma Nu house.

Vie Moore, Kappa Sig, who has been spending his vacation in Colorado, writes that he has accepted a position with the Ridpath Horner Chautauqua and will be at various points in Kansas, Colorado, and Nebraska, for the rest of the summer.

Mrs. Bess Kirven Rider, a former student of the University has been visiting on the campus. She is a member of Zeta Tau Alpha sorority and graduated in 1923.

## THE CINEMA

Majestic: Thursday, Friday, and Saturday, Irene Rich in "The Climbers."

Hancock: Thursday, Friday, and Saturday, Tom Mix in "Ace of Stars."

Queen: Thursday, Johnny Hines in "All Aboard"; Friday and Saturday, Monte Blue in "Bitter Apples."

Texas: Thursday, Norma Shearer and Lew Cody in "The Demi-Bride"; Friday and Saturday, John Gilbert in "The Show."

## The Demi-Bride

SLIGHT, rambling, and unimportant as is this picture, it is at least amusing and presents two popular actors in their usual roles. Miss Shearer is unquestionably one of the prettiest women on the screen and is not a bad actress when provided with something to do. She is not, however, good enough to do

something significant with nothing, and as a consequence is merely pleasant to look at in "The Demi-Bride."

## Postman Gets No Wonder the Registrar Begs Stray Record Book

University students are getting too sophisticated to continue along the old traveled paths. Collegiate Fords are passing out of existence; we seldom see the boyishly dressed collegiate with an eight foot pipe hanging from the corner of his mouth; no old-fashioned baseball games are seen in the shade of the library building; and now, one young lady refuses to return her record book to the registrar by the usual method. She is too sophisticated to stand in the waiting line just to drop a book in the box.

Yesterday afternoon this young lady started out on a two-fold errand; she was to mail a letter and return her record of work book. She bought a stamp and after stamping her letter walked to the mail box and dropped the record book inside and carried the letter to the registrar's office and was waiting in the dreared line before she realized her mistake! Was this caused from a sophistication or association with absent minded profs—which?

## Pittenger Talks

(Continued from page 1)

and the unique combinations of different types of architecture being the outstanding features.

"Beginning in 1890, a definitely 'school building' type of architecture has been developed to take the place of all the previous haphazard designs.

### Present Day Types

"Here it might be well to include a list of the types used today: First is the classical, the Greek and Roman type, coming down in what is popularly known as the Renaissance architecture. We have it on our campus in the Spanish Renaissance. The type is marked by columns and tri-cornered gable effects with friezes.

"The second is the colonial type, which is really an adaption of classic models to colonial conditions. This is very common in church and state buildings but does not appear to any great extent in the South.

"The third is the Gothic, having pointed arches with multiple spires. This was extensively used in churches, and when carried over into schools, it becomes the 'college Gothic.' A modified form of this college Gothic is the most common type of school building today, the Texas adaptation of the type tending toward the use of the old mission features.

### Two Classifications

"Further, the general types of architecture in school buildings may be classified as either a square, packing-box form or a slender, slating form. The latter was popular during the Queen Anne period and from 1890 to 1910 but is coming back at the present time more especially in the 'residential' types of school buildings.

"As originally planned, the box-like building was constructed about a number of rooms and designed to facilitate the use of those particular rooms. As a result the exterior was

not very pretty. In an effort to beautify the packing cases, the classic features of columns and the like were taken in, friezes were put on, the roof lines were broken, to form arches like the Alamo front line.

### For Beautification

"School architects are learning that the beautification of large buildings is not to be accomplished by using the ornate but in accomplishing the mass effect. This is to be done by window arrangement, contrast of masses of color, which especially are to be noted in the South where the glare of the sun is so extreme.

"The slender, slating forms are frequent in the church Gothic with spires. The Spanish Renaissance is a current combination of the slant roof with the Greek form. This is a type which is developing at the present time. Another adaption is the old mission type spread out into one story except the central tier."

### Floor Plans

The second part of the lecture was devoted to a discussion of advantages and disadvantages of various floor plans. The salient feature of early schools was a separate stair well for each classroom on an upper floor, according to Dr. Pittenger.

"About 1860," he explained, "a corridor replaced the multiple stairs, but there was no cloakroom or wardrobe so far, these appearing later in 1870. In 1880 an entirely new feature was introduced in the 'expanded hall'. This was on each floor, surrounded by classrooms, used for assembly purposes.

"The present junior high school building in Austin has a very definite suggestion of this type of structure," he said. "It makes possible the breaking up of the walls to let in more light and air, but it has the

disadvantage of waste of space.

"By 1890 the hall contracted into a wide corridor large enough for freedom between periods and possibly for play in inclement weather. It was not then used for a study hall.

"A number of changes were effected in 1900; the packing box type was definitely adapted to the internal needs, and a central heating system was installed. The year 1910 saw the open type of building come into vogue, extensively broken up for light and air, with a great deal more ornament, particularly in breaking up the lines of the roof."

### Part Three

Part three of the talk limited itself to an opinion of the types of ventilation and lighting most effective in schools. "The brush arbors," Dr. Pittenger pointed out, "of course let in plenty of both light and air. The old-time dug-outs were almost unusable in dark days, as were the adobe structures. The early Queen Anne types probably let in more than the residential types but not enough.

"Early stages of architectural development saw little grouping of the windows, but it was not long until advancement began. The model now is a large window space in proportion to wall space."

### Seating Facilities

The concluding part of the talk was on seating arrangements. "The earliest models had a broad desk built around the walls of the cabin with a high bench extending along beside it for the larger children. There was a similar bench and board desk square in the center of the room back of the larger children for the tiny tots, who also sometimes sat on the edge of the platform for the teacher's desk, if there were such a platform.

"The next form was a desk wherein the seat on one was attached to the desk of the other behind it. When factories took over the construction of the desks from the hand carpenters, the double desk was formulated. These two types had the fault that one child could by his fidgetings disturb all the others connected with him.

"A great step forward was taken when the standard single desk was invented, and a still greater when these were made adjustable. Further advances within recent years have been the placing of an arm rest on the single desk, and still more, the formulation of a separate desk

## Moore Made Head of Life Staff in Fall

At the beginning of the fall term of the University, V. I. Moore, dean of men, will become dean of student life to head the student life staff of the University. Dean Moore was named to the new position by the Board of Regents upon the retirement of Dr. B. F. Pittenger as dean of students. Dr. Pittenger is also dean of the School of Education of the University.

Moore will continue to be dean of men along with his other duties. The dean of student life is general chairman of all extra-curricular activities and has general supervision over all student affairs outside of scholastic work.

Moore will be assisted as dean of men by Arno Nowotny, a graduate of the University and special assistant dean of men last year.

## Rigid Enforcement of House Rules Made

Rigid enforcement will be made of the new ruling by the Board of Regents that beginning with the fall

and chair attached to each other. "The chair-and-desk," Dr. Pittenger says, "is very efficient, being flexible as to distance, height, ratio, and the other factors.

"This type has been simplified to the typical tablet-arm lecture room chair, which is used here in the University classrooms," Dr. Pittenger concluded.

## Babies Love It

For all stomach and intestinal troubles and disturbances due to teething, there is nothing better than a safe Infants' and Children's Laxative.

of 1927 all students must live in approved houses unless given special permission by the dean of men or dean of women, according to V. I. Moore, dean of men, who will also be dean of student life beginning this fall.

Freshman girls will be required to stay in dormitories except in rare cases, said Miss Ruby Terrill, dean of women of the University. First year men students will be required to live in approved houses, said Dean Moore; however, there may be more exceptions made in the case of upper class men students, he added.

## Students See Places of Local Interest

Excursions to four places of particular interest in the city of Austin have been arranged for summer school students of the University of Texas, according to Miss Lula Bewley, chairman of the local excursion committee.

Beginning the series with a tour

## Zonite

For Cuts and Wounds

Prevent infection! Treat every cut, wound or scratch with this powerful non-poisonous antiseptic. Zonite actually kills germs. Helps to heal, too.

of the campus, the students will visit the Elisabet Ney studio; the old land office where are maintained the museums of the Daughters of the American Republic and the United Daughters of the Confederacy; and the International Institute and city water and light plant.

### LUNN LECTURES

A lecture on "Crystallography" will be given by Prof. A. C. Lunn, of the mathematics department, Friday afternoon in Garrison Hall 1.

Crystallography is the study of forms of the crystals of various elements. Dr. Lunn will discuss the phases of the subject connected with the use of the X-Ray.
