

March 13, 1970

Professor Raymond C. Moore
Paleontological Institute
University of Kansas
Lawrence, Kansas 66044

Dear Ray:

In response to your letter of 5 March, 1970, the second batch of references sent to you on 17 February, 1970, is the last batch. No more additions are to be made to the "References."

I trust your well-known good judgement and experience as an editor and book arranger to produce the best possible printed copy. It will take some ingenuity.

The only major parts missing now are:

- (1) Morphological terms applied to oysters.
- (2) Two or three references needed for the Chondrodontidae.

If, it were not for my Income Tax Report, we would be going along at a good clip.

Cordially,

H. B. Stenzel
Consulting Professor
