

TO COMPLETE RESTORATION OF BARKER CENTER

1. Air conditioning
2. Installation of a metal grill, with metal inset, at the top of the stairs on second floor so that restrooms may be made accessible and locking of the library will be less of a physical task. Increased use of the lounge (Room 103) after library hours makes this need of access to the restrooms increasingly imperative.
3. Installation of book stacks on levels six and seven. At least two ranges at one end of the sixth level should have wide shelves with rollers to provide for the historical editions of newspapers. At the end of the sixth level, one range should be enclosed with a grill which can be locked to provide secure working space for a cataloguer for the special collections.
4. Restore shelves and enclose bookcases around walls of James Stephen Hogg Reading Room.
5. ~~Faculty Mail outlet on first floor.~~
6. One special display case for the James Stephen Hogg Reading Room (a long, flat case for display of mss, documents, and maps).
7. ~~Three filing cabinets for microfilm - locked - to be placed on sixth stack level just above office level.~~
8. Three metal chests of drawers (40x28 with eight drawers each) for filing of oversize materials, programs and prints. Two to be located on fourth stack level for such items as Remington and Russell prints — one to be in office area.
9. Card catalog cabinet (60 tray) for expanding files of indexes.
10. Two book trucks — one each for levels six and seven.
11. ~~Two bulletin boards (approx. 24x30 inches), one for entrance to Reading Room and one for page notices and library announcements.~~
12. ~~Six additional stools for use in reaching high shelves in stacks.~~
13. ¹⁰~~Twenty~~ desks and chairs for sixth and seventh stack levels.
14. Plaques to designate Reaugh Collection and James Stephen Hogg Room.
15. One small open bookcase and two closed bookcases for librarian's office.
16. Matching desk and typing desk for librarian's office.
