

December 5. 1932.

Dr. B. Coleman Renick
San Antonio, Texas.

Dear Renick:

I have not heard anything about Leon County. Could you tell me what the developments are?

Some wildcatter from Navasota drilling in northernmost Grimes County in the Yegua wants me to make a report for him. He wants to put a car at my disposal but can otherwise not pay in cash so offered me some acreage. Do you think that it would be worth while. The thing that appeals to me is that it would give me a chance to see some geology without much expenses on my side. How much should I ask for?

The Houston Geological Society was here last Saturday. They wanted to see the Jackson.

Cordially yours

H. B. Stenzel.
