Dear Steve:

It is always interesting to hear about local Eocene stratigraphy. As to your new basal sand, the Clinchfield Sand, please don't overlook the name Dellet Sand, distinguished by me in Mississippi Geol. Soc. 9th field trip guide book, p. 41, 58-59, September, 1952. The Clinchfield Sand may be the lateral extension of the Dellet Sand of Alabama.

Good luck!

Sincerely,

H. B. Stenzel
