Professor H.B. Stenzel
Shell Development Company
Houston, Texas

Dear Professor Stenzel,

Thank you for your letter of 5/1/61. Yes it was a very great pleasure for me to meet you and your daughter in Copenhagen after nearly ten years. I also met many friends whom I only knew by correspondence. I wish it had been for a longer time.

I handed your letter regarding Avicula corbiensis and Ostrea commercialis to one of our palaeontologists, Mr. J.M. Dickins, who deals with the larger fossils. I think he has written to you already giving you as much information as is available at the Bureau.

So far we are having a cool summer, at least on this side of the Continent. On the western side temperatures are about the century mark.

With all good wishes for the New Year to you and your family.

Yours sincerely

Irene Crespin
