

505 N. 12th Waco, Texas,
Oct. 25th 1961.

Dr. Stenzel:

On July 26th I sent a small box
of micro fossils to you or to
P. H. Sutherland, to Houston U.
I never heard if they got there.
I insured them.

Not knowing the President's
name, I just addressed my
letter to President of Texas U.
of Houston, and asked who
got the package? - A Mr.
Jules Dukar, answered and
said "Thanks and we will use
them in class room work."

Dr. Brown of Baylor, told me
you had left the U. and
was consultant for Shell Oil Co.
Now, I'm ardent to think that
in this enlightened age, people
do not know U. States Postal law.

²⁰
Now, I will do as you say -
I have relatives living in Aust-
ton, and will have them go
out and get the Jussals, or
let you handle it.

I am not willing for them
to have them if you want
them.

It seems to open other folks
mail is going a bit too far
for me. I'm indignant.

Hope you are trying to rest
all you can. I too, had a blood
vessel to burst on my brain and
my left hand and toes are
numb. Am taking two Peritrate
tablets each day to open the blood
vessels - I had 2 heart attacks, but
seem to be doing nicely now.
Son is grand. Dad - a boy 7 yrs
old - walking in his play-pen and has
2 teeth. Sincerely, Mrs. Geo. W. Harris
