Telegrams: NATHISMU

16th January 1962.

Dear Dr. Stenzel,

As promised six months or more ago, I have just sent, by surface mail, life-sized photographs of typical specimens of Ostrea gigantea Solander from the Upper Eocene of the type locality, Barton, Hampshire, the original type specimen being no longer extant. Unfortunately, the photographer has taken the specimens against a black background although he was instructed that the background was to be white. If, therefore, these photographs are not suitable for your purpose on the present background, would you please let me know, and I will have them done again ?

Yours sincerely,

L.R. COX.
