

March 29, 1950

Dr. Jorgen Wind
Lystrup St.
Jylland, Denmark

Dear Doctor Wind:

The parcel containing 3 monographs on Denmark's Paleontology arrived yesterday. I am very grateful to you for this material, particularly do I appreciate your notes which bring the texts up to date.

You know our library here is not complete and lacks very many of the European publications. Hence, such monographs are very welcome.

By the way, the following reference might be of interest to you: Spangler, W. B., and Peterson, J. J., Geology of Atlantic Coastal Plain in New Jersey, Delaware, Maryland, and Virginia: American Assoc. of Petroleum Geologists Bulletin, vol. 34, no. 1, pp. 1 - 99, January 1950. It gives a complete review of the Vincentown formation.

Sincerely yours,

H. B. STENZEL
Professor of Geology
