

Staff  
SERVOS

Nov. 22, 1955

Mr. Kurt Servos  
Dept. of Geology  
Yale University  
New Haven, Conn.

Dear Mr. Servos:

Thank you for your letter of November 17th. We like to have our applicants fill out the enclosed blank, which later goes into the president's file. So please fill it out and return it to me later.

Pleistocene geology is of course very important around here, and several Houston geologists are actively engaged in this branch.

Dr. Winchell said you are helping in the teaching of a course on the geology of the United States. I believe it would be well for you to outline your teaching in this course and the general contents and character of this course.

Very truly yours,

H. B. Stenzel  
Chairman

Enclosure: Application blank
