CAERNARVONSHIRE.

21st February, 1949.

Dear Dr. Stenzel,

Thank you for your letter of February 4th. I will write to the British Museum (Natural History) as suggested regarding Ostreola stentina, Payraudeau.

I can arrange to supply you with a series of shells of Ostrea edulis and the Portuguese oysters later in the summer. Have you any particular directions as to the method of preparation? Normally I should collect the shells of recently dead oysters and preserve them dry. You would presumably appreciate a series of various ages?

Yours sincerely,

Dr. H. B. Stenzel,
The University of Texas,
Bureau of Economic Geology,
University Station, Box B,
Austin 12,
Texas.
