Dr. H. S. Ladd
U. S. Geological Survey
Washington 25, D. C.

Dear Dr. Ladd:

Please find enclosed the "Annotated Bibliography of Tertiary and Later Nautiloids." I have taken the liberty of extending the scope to include the living nautiloids because there is practically nothing on Tertiary nautiloids to list.

I am afraid I will have to disappoint you on the other assignment. There simply is too much of other things to do around here to do all this work. Perhaps this assignment could be postponed for another year.

The rumor about Ohio State is 50% correct. At one time I was ready to accept and go up there; however, a careful check of all angles convinced me that I would run great risk of financial loss by this move. Having a large family makes one rather cautious about these matters. I think I would enjoy being in the East where equipment and libraries are so much better than here.

With best regards,

Sincerely yours,

H. B. Stenzel
